#### a. State whether your organization is national, regional, or local.

SGM Engineering is a national, regional, and local company. SGM has offices located throughout the Florida <u>region</u> in Orlando, Tampa, and local Deerfield Beach (locally), as well as an office in Chevy Chase, Maryland (nationally). Our multiple office locations throughout the State of Florida allow SGM Engineering to respond efficiently and effectively. Our personnel from all office locations can support any projects administered by the Florida Department of Management Services.

#### b. State the location of the office from which your work is to be performed.

Our office is located in <u>Broward County</u> in South Florida at <u>700 W. Hillsboro Blvd.</u>, <u>Building 3</u>, <u>Suite 212</u>, <u>Deerfield Beach</u>, FL 33441; Phone: (945) 421-1944; Fax: (945) 421-1924; Website: <u>www.sgmengineering.com</u>.

#### c. Describe the firm, including the size, range of activities, etc.

<u>Size:</u> We currently have <u>34 full-time employees</u> dedicated to providing professional services. SGM has the required staff in all disciplines to perform job assignments for this Continuing Contract for Mechanical, Electrical, and Plumbing Engineering Services for the City of Hollywood. The staff committed to this contract will be immediately available for your assignment and the depth of staff will provide support when necessary to handle multiple projects concurrently. Additionally, we have <u>assigned 9 Professional Engineers</u> to work on this contract, upon award.

<u>Range of activities:</u> SGM is registered to do business in 38 states and has an extensive background associated with Mechanical (HVAC, plumbing, fire protection) and Electrical Engineering. We have numerous years of experience in servicing governmental entities; we have worked on a large variety of project types for municipal, state, and federal agencies. SGM is also registered as a member of the U.S. Green Building Council and we have completed over 50 LEED (Leadership in Energy and Environmental Design) certified projects.

Our team of employees is capable and qualified to design all aspects of MEP/FP systems for renovations, additions, and new facilities with knowledgeable emphasis on codes/energy conservation requirements. SGM's staff is structured with many qualified and experienced Project Managers that complete their projects on-time and within budget. Each Project Manager has Engineers, Designers, and CAD Tech personnel who are assigned to a specific project. SGM currently has Certified Commissioning Agents on staff, who are committed to providing quality Commissioning Services; they service projects from early in the design phase, through construction and into the warranty period. The staff assigned to your project will be immediately available for your assignment and the depth of staff will provide support when necessary to handle multiple projects concurrently. The most important aspect of availability will be centered on our Key Management Staff so that the overall program management controls can be implemented quickly and efficiently.

#### Mechanical Engineering:

SGM's Mechanical Engineers have experience in the design of mechanical systems including, but not limited to, the following: fire protection systems, all types/sizes of HVAC systems, high temperature hot water boilers, piping, fluid systems, chilled water, compressed gas systems, elevators, hoists and cranes, specialized mechanical equipment, direct digital controls (DDC), and programmable logic controllers (PLC), as well as, facilities to house the mechanical equipment.

SGM Engineering, Inc. · 700 W. Hillsboro Blvd., Bldg. 3, Suite 212, Deerfield Beach, FL 33441 (954) 421-1944 (Ph) · (954) 421-1924 (Fax)

39

## Electrical Engineering:

SGM's Electrical Engineers are skilled in the design of medium/low voltage AC power systems, uninterruptible power systems, computer power conditioning, grounding, lightning protection, lighting, emergency power, hazardous area electrical installations, and control/monitoring systems. Previous projects varied utilizing electrical system designs, such as: security installation to mass public densities, where CCTV, CATV, fire alarm, detection systems, voice evacuation, cable tray systems, communications systems, communications premise wiring, Electronic Security Systems (ESS), and intercom systems were designed/installed per national and local codes. SGM also has previous project experience associated with the "Anti-Terrorist Force Protection Act" which has been successfully applied to new and existing buildings.

## Plumbing and Fire Protection Engineering:

Our Plumbing Engineers have the ability to design domestic water systems, hot water return systems, equipment/fixture identification, sanitary drainage system, storm drainage piping, liquid propane/natural gas systems, and boilers. Additionally, fire protection areas of expertise include: fire suppression requirements (light, ordinary, and extra hazard classifications), wet/dry, deluge/pre-action systems, backflow prevention/metering specifications, and fire flow tests (static, residual, and flow).

#### Commissioning:

Commissioning (Cx) consists of systematically documenting specified components/systems have been installed and started up properly, then functionally tested to verify/document proper operation through all modes and conditions. In addition, personnel training will be verified and final project O&M documents will be reviewed for completeness.

SGM's team will follow a basic approach to every commissioning project produced through this contract which includes pre-design commissioning for existing or new facilities, design phase, construction phase, acceptance phase, and warranty phase of commissioning. Should SGM be selected for this contract, our firm will guarantee substantial savings in the DMS operational costs. All commissioning efforts will be performed through SGM's in-house staff.

#### Current Workload:

SGM Engineering has evaluated our current workload for 2014, and has come to the conclusion that we are able to immediately begin working on tasks assigned by the City upon contract award. All staff assigned to this contract is currently operating at or below 45% capacity. Therefore any/all of our design team is immediately available to take on additional projects and tasks. As part of SGM's operating philosophy, we do not max our total staff beyond 80% in order to accommodate all Continuing Service Contracts and its respective tasks that may arise in a short time frame. All staff assigned to this contract, as outlined in the Organizational Chart, is able to immediately service the City of Hollywood, upon contract award and review.

# 2009: Barnett Park Gymnasium

• James Beverly (407) 839-5800

e. Provide information on any litigation (settled or pending) the firm has been involved in within the last five years. SGM has not been involved in any litigation (settled or pending) over the past five years. This firm has the highest possible ranking by Professional Liability Insurance carriers and has never been found liable in a court suit. Other than reaching the natural end of the contract term, SGM has not had any contracts terminated.

f. Describe the experience in conducting similar projects for each of the staff assigned to the engagement. Describe the relevant educational background of each individual.

Local Government Projects: SGM Engineering prides itself as a market leader in providing exceptional Mechanical, Electrical, and Plumbing design services for local government clients throughout the State of Florida. Our past performance outlines over 300 local government projects since 1991, directly providing Mechanical, Electrical, Plumbing, and Fire Protection. These projects include public safety, police stations, fire stations, street lighting, parks/recreational centers, jail/corrections facilities, museums, and more.

g. Describe the organization of the proposed project team, stressing level of experience and qualification, detailing the level of involvement, field of expertise and estimated hours for each member of the team.

SGMÅ

Why Tony?33 years of Local

- Government Design
- ACG Certified Commissioning Authority
- Estimated hours percentage: 20%

#### Why David?

- 11 years of experience with local government facilities
- Excellent verbal and communication skills
- Familiar with South Florida Building Codes and Guidelines
- Estimated hours percentage: 30%

Tony Shahnami, P.E., CxA, F.E., CES, CHS-II Principal in Charge

Education: Bachelor of Science, Mechanical Engineering, University of Miami Active registration: Registered Professional Engineer – FL #41204, ACG Certified Commissioning

Mr. Shahnami is a registered Mechanical Engineer with thirty three years of experience in design-build projects, facilities management, construction administration, and project management of projects throughout the State of Florida. Mr. Shahnami will serve as Principal in Charge and will provide ideas and methods that will resolve current Mechanical dilemmas. Mr. Shahnami is the President of SGM and has the authority to represent the firm in all contractual matters.

Mr. Shahnami is very experienced in designing integrated city and local government Building Automation Systems. Tony's knowledge of designing innovative solutions for accelerated energy efficiency includes the design of Energy Recovery Wheels for Child Development Centers on MacDill and Hurlburt U.S. Air Force Bases. Additionally, Mr. Shahnami is familiar with EPA Energy Star Portfolio Manager. As an ACG Certified Commissioning Agent, Mr. Shahnami has managed LEED-certification/ design and provided advanced commissioning. Furthermore, he has experience with controllable systems (lighting and thermal comfort), water efficiency, energy efficiency, indoor environmental quality, materials selection (including recycled/reused materials) and low-emitting materials selection.

# David McGowan, P.E., LEED AP, BEMP, CPMP

Project Manager

**Education:** Bachelor of Science, Mechanical Engineering, University of Utah **Active registration:** Registered Professional Engineer – FL #69768, **LEED Accredited Professional**, Building Energy Modeling Professional

Mr. McGowan has acted as Project Manager for a variety of projects involving local government facilities including, but not limited to, the following: Sheriff's department/police stations, MEP/ FP renovations/upgrades, fire stations, parks/recreational facilities, and emergency management centers. He will be responsible for scheduling, formal/informal reporting, task order management, and quality control reporting for all task orders under this contract. Additionally, he will review technical quality and timeliness of all activities. His years of experience as a Project Manager and an Engineer of Record makes him well qualified to act as Project Manager for this project.

Dave is a **LEED Accredited Professional** that specializes in design, testing, and modification of building controls systems. Residing in South Florida, Mr. McGowan has a concentrated understanding of the South Florida Building Codes and the State Requirements for local facilities, ADA, and related Florida Statutes. Dave also has experience managing multiple minor projects concurrently. Furthermore, Dave also has an extensive background working with occupied facilities during renovation and design.

Why Mark?

- Prior experience working on Local Government Existing and New Facilities
- ACG Certified Commissioning Authority
- LEED Accredited Professional
- Estimated hours percentage: 30%

#### Why Justin?

- Prior experience working on Local Government Existing and New Facilities
- Professional Electrical Engineer
- Estimated hours percentage: 25%

Mark Escott, P.E., LEED AP, CxA Lead Electrical Engineer/Director of Engineering

**Education:** Bachelor of Science, Electrical Engineering, University of South Florida **Active registration:** Registered Professional Engineer – FL #50737, **LEED Accredited Professional**, ACG Certified Commissioning

Mr. Escott has over 25 years of experience in Electrical Engineering which includes project management, permitting, job costing, major purchases/subcontracts, submittals, scheduling, manpower loading, field coordination, change order estimating, technical assistance to field personnel, and project closeouts.

Mr. Escott is skilled in the design of electrical systems including, but not limited to, the following: fire alarm/detection systems, medium/low voltage AC power systems, Electronic Security Systems (ESS), uninterruptible power systems, computer power conditioning, grounding, lightning protection, lighting control systems, emergency power, hazardous area electrical installations, control/monitoring systems, cable tray systems, communications raceway systems, and communications premise wiring. Mark is also extremely involved in designing integrated city/campus-wide Building Automation Systems. Mr. Escott's knowledge of designing innovative solutions to accelerated return on energy efficiency includes design of LED Lighting, Photovoltaic Systems, and Solar Water Heating. Additionally, Mr. Escott has a strong background with EPA Energy Star Portfolio Manager.

Justin Mundell, P.E., RCDD Electrical Engineer- Systems, Audio, Security

**Education:** Bachelor of Science, Electrical Engineering, University of Central Florida **Active Registrations:** Registered Professional Engineer: Electrical – FL #70700, Registered Communications Distribution Designer

Mr. Mundell has 11 years of experience in the drafting and design of electrical systems including power, lighting, and communications systems for commercial, restaurants, and educational facilities. His expertise is in fire alarm, systems, power distribution, and lighting protection systems. Justin has extensive background with a multitude of facilities including, but not limited to: high profile government projects, public safety complexes, Sheriff's stations, and other local and federal government buildings. Mr. Mundell is also very familiar with local municipality standards, as well as, high performance sustainable lighting design as described in USGBC. Additionally, Justin has experience managing multiple minor projects concurrently. He also has extensive knowledge working with occupied facilities during renovation and design.

Mr. Mundell is well experienced in designing integrated city-wide Building Automation Systems. Justin's background of designing innovative solutions in order to accelerate the return on energy efficiency includes, but is not limited to, the following: design of LED Lighting, Photovoltaic Systems, and Solar Water Heating.

Why John?

- Familiar with sustainable/LEED design
- Excellent verbal and communication skills
- Estimated hours percentage: 30%

John Ball, P.E., LEED AP Mechanical Engineer/Mechanical Department Manager

Education: Bachelor of Science, Mechanical Engineering, Mississippi State University Active registration: Registered Professional Engineer – FL #66893, LEED Accredited Professional

Mr. Ball has 16 years of experience in various phases of mechanical engineering; his experience includes, but is not limited to, the following: HVAC, analysis, design, and construction administration for a variety of building types including governmental facilities, fire stations, Sheriff's offices, and institutional facilities. His expertise is in IAQ, chillers, pumps, AHUs, cooling towers, dehumidification, and BACnet Web-based BAS.

John is very familiar and has been heavily involved in, projects that require frequent interaction with government entities, clients, users, and contractors from the start of the project through the final commissioning. Additionally, John has extensive background managing multiple minor projects concurrently. He also has a great deal of involvement working with occupied facilities during renovation and design.

Why Ben?

- Familiar with LEED/sustainable design
- Strong public safety/law enforcement facility experience
- Estimated hours percentage: 25%

Ben Fauser, P.E., LEED AP Mechanical Engineer

Education: Bachelor of Science, Mechanical Engineering, University of Missouri Active registration: Registered Professional Engineer – FL #67008, LEED Accredited Professional

Mr. Fauser has 11 of years experience in various phases of plumbing, fire protection, and mechanical engineering analysis/design, as well as construction administration. He also has exposure with a variety of building types including governmental and educational facilities. Mr. Fauser is particularly skilled in the design of plumbing, mechanical, and fire protection systems with optimum performance for complex, high-profile governmental facilities which require maximum building performance and security in order to accomplish objectives and missions. Ben's specialty areas include pipe sizing/selection, as well as product specifications. Mr. Fauser has a clear understanding of the South Florida Building Codes and Guidelines. Additionally, Ben has experience managing multiple minor projects concurrently. Furthermore, Mr. Fauser has indepth knowledge working with occupied facilities during renovation and design.

Why George?

- 11 years of
- experience with local government facilities
- ACG Certified Commissioning Authority
- Excellent verbal and communication skills
- Estimated hours percentage: 30%

#### Why Jerry?

- 21 years of experience with local government facilities
- Familiarity with Florida Building Code
- Estimated hours percentage: 25%

George Hayner, P.E., CxA Plumbing and Fire Protection Engineer

**Education:** Bachelor of Science, Mechanical Engineering, University of Central Florida **Active registration:** Registered Professional Engineer – FL #70682, ACG Certified Commissioning Authority

Mr. Hayner has 11 years of experience in Plumbing and Fire Protection system analysis, design, and construction administration for a variety of building types including governmental, educational, and commercial facilities. Mr. Hayner has experience in the commissioning management plan of mechanical systems including, but not limited to, the following: fire protection systems, high temperature hot water boilers, piping, fluid systems, chilled water, compressed gas systems, elevators, hoists/cranes, specialized mechanical equipment/controls (including direct digital control), and programmable logic controllers (PLC), as well as facilities to house the mechanical equipment. Mr. Hayner is highly experienced in designing integrated city/campus-wide Building Automation Systems. George's background of designing innovative solutions includes design of Energy Recovery Wheels for Child Development Centers at MacDill and Hurlburt U.S. Air Force Bases. Additionally, Mr. Hayner has knowledge of EPA Energy Star Portfolio Manager.

#### Jerry Schneider

Plumbing and Fire Protection Engineer/Plumbing Engineering Department Manager

#### Education: West Orange High School, 1989

Active registration: Member of American Society of Plumbing Engineers, Member of Autodesk User Group International, Habitat for Humanity

Mr. Schneider has 21 years of plumbing and fire protection design / construction administration experience for local and federal government, commercial, industrial, institutional, healthcare, medical office buildings, clinics, multi-family, and residential type projects throughout Florida. His experience has given him knowledge to perform engineering / design tasks including, but not limited to, the following: equipment selection, pipe sizing, hydraulic calculations, and product specifications for fire suppression/plumbing systems. Jerry is also familiar with Florida's state and local code requirements, ASPE Guidelines, NFPA, and International Code standards.

SGM Engineering, Inc. · 700 W. Hillsboro Blvd., Bldg. 3, Suite 212, Deerfield Beach, FL 33441 (954) 421-1944 (Ph) · (954) 421-1924 (Fax)

Nassi Rahbari, CxA Building Commissioning/Commissioning Department Manager

**Education:** Bachelor of Science, Engineering and Computer Sciences, University of Central Florida **Active Registrations:** Certified Commissioning Authority

Mr. Rahbari has over 29 years experience reviewing Mechanical and HVAC designs for local and federal government entities throughout the United States. Mr. Rahbari is utilized specifically as a Commissioning Agent at SGM Engineering, acting as the Commissioning Department Manager. Nassi is currently overseeing \$400 million worth of construction projects and leads SGM's Commissioning / Retro-Commissioning division; he is a strong asset to this team. Mr. Rahbari is a Licensed Class A certified Air Conditioning Contractor, Licensed Mechanical Inspector, Licensed Mold Assessor, and Mold Remeditator with expertise in the optimization of chiller plant sequencing and operation with DDC controls. Having worked for many years on local and federal governmental facilities, Mr. Rahbari has a comprehensive understanding of Florida Statutes and regulations within mechanical systems.

Victor Goykhman QA/QC Manager/Vice President

Education: Bachelor of Science, Electrical Engineering, Polytech University

Mr. Goykhman is the Vice President of SGM and has 39 years of engineering experience. As QA/QC Manager, Victor provides supervision/management for assistance and support of field offices, project management, project coordination, and tracking. Additionally, Victor's scope of work includes reporting daily job activities, developing scope of work for construction modifications, construction QA, reporting, review of contract documents/shop drawings, review of QC plans, and design reviews. Mr. Goykhman will monitor and oversee the A/E team to ensure delivery of quality plans, specifications, and project narratives for each project encountered.

Jim Kloes, CCST III Construction Administrator Manager

Education: Certified Plumbing/ Pipe Fitter Instructor, Purdue University Active Registrations: ISA, Level III Control Technician

Mr. Kloes has over 48 years of experience in supervision, teaching, and knowledge of HVAC, industrial, aeronautical piping, and control systems. Mr. Kloes' experience includes teaching certification, instructor training, Control Design Consultant, and acting as Project Engineer. Jim has worked on many local government projects including, but not limited to: Wolfsonian Museum at Florida International University, City of Chipley LED Street Light Retrofit/Solar Powered Traffic Signal, City of Hollywood Beach Public Safety Facility, and Orange County Government Barnett Park Gymnasium/Recreation Center.

## h. Describe what municipal staff support is anticipated for this type of engagement.

Municipal staff is the key to a successful contract between SGM and City of Hollywood. The Project Manager from City of Hollywood will play a major role in coordination, scheduling, negotiation, and Construction Administration. Other staff members such as facilities maintenance, plans review, and building code officials will be necessary in order to learn about the nature of the project, code compliance, construction phasing, and its impact to the building occupants.

During construction, it is important for SGM to make sure that City of Hollywood staff is familiar with the components being installed and being trained. All of the test & balance report, owner's manual, and commissioning must be coordinated with City of Hollywood staff.

# i. Describe your approach to performing the work. This should include your role and that of other parties involved in the data gathering, data analysis, and recommendation process.

SGM is a quality driven organization. <u>All of SGM's Project Managers and staff are involved in the data gathering, data analysis, and recommendation process.</u> Quality Control is an integral part of the scheduling and production process. For Continuing Service Contracts, SGM Engineering has a multi-tiered approach to quality when handling Continuing Services Contracts. Key components include completion of a detailed Project Management Manual and communication of that plan to the City of Hollywood, assigning qualified staff to designated design tasks, assigning qualified senior personnel as quality control approvers to review/approve design quality production, both discipline, inter-discipline/ constructability, identifying a separate Independent Technical Review (ITR) team from qualified personnel who are not otherwise working the project, use the detailed work plan that outlines the work tasks, budgets, milestones to measure performance, use guide details, specifications, and software programs to maximize efficiency.

SGM ensures that there will be documented and constant communication between the City of Hollywood and our design team. We will involve the facility end users, and City personnel, throughout the entire design process. This will start in pre-design through identification of all key personnel in the Project Outline with name and contact information, along with areas of responsibility correlated to the project's work breakdown structure. A Project Initiation Conference will be held for each project with <u>all team members included</u>. Regular team meetings will be held throughout the entire design process. The regularity of these meetings will be based upon the size and complexity of the particular project. Our experience is that often times the RFP does not address all the needs and concerns of the owner. It is important these issues are discovered to save the City of Hollywood unwanted costs, value engineering, and efficiency of design. SGM will ensure that scheduling is an ongoing cooperative issue. SGM will ensure that all lead engineers will ensure that all design submittals meet the City's Construction Standards, receive ongoing feedback from the City of Hollywood's construction/facilities planning division, answer all questions and comments and ensure the design takes construction cost and efficiency into account.

The first critical element of SGM's Quality Control Program is development and implementation of the Project Schedule; we maintain our own computerized scheduling system. We develop and maintain a sophisticated project schedule utilizing Microsoft Project. We establish a master project schedule that encompasses all design development and construction document preparation. This master schedule serves to establish a work plan for accomplishing period and systematic reviews as design progresses and to ensure significant quality control requirements are accommodated. As design development reaches completion, quality control activities identified through the integrated design review process are then entered into the schedule where they become identifiable as discreet required activities.

The second critical element will be to establish and implement procedures for comprehensive and interdisciplinary design document review. This will be accomplished through use of time proven concepts: integrative conceptual design teams, in-house design quality control/quality assurance review, office standards, quality assurance reviews, interdisciplinary review, project organization/team communications, training/intern development, and technical review.

Thirdly, we will quickly establish routine and frequent (bi-weekly) coordination meetings. These take on a decidedly design oriented tone during design development, but serve as the basis for the more frequent (weekly) Quality Control Coordination meetings as the construction documents are completed.

Additionally, SGM Engineering has the ability to complete plans within budget and schedule as evidenced by previous projects, addressing the accuracy of original estimates vs. actual completed project costs, and completed schedules.

#### SGM's Design/Modeling Software:

SGM has integrated industry standard computer technology into every phase of the design process, resulting in an efficient use of resources and allowing greater focus on delivering the best design solutions. Our information and design technology network is comprised of servers and workstations and are standardized on Intel processors/Microsoft operating system. Our offices are connected by a virtual private network [VPN] operating across our dedicated tier 1 provisioned T1 data lines. Each SGM professional is provided with a high-end, graphics workstation. They are equipped for three-dimensional modeling, visualization, and the production of project contract documents. SGM maintains an array of graphic and office productivity software application licenses including Autodesk AutoCAD, AutoCAD MEP, Autodesk Revit, Adobe Suite, and Microsoft Office Suite. Our CAD systems includes AutoCAD 2014 and AutoCAD MEP 2014 (updated via subscription as new releases are made available). Within Autodesk products, the keynoting capabilities allow us to note our drawings uniformly and use MasterSpec for specification creation. Within AutoCAD we use dynamic blocks and custom organizational tools to create a very client oriented approach. We are licensed to use Arcom "MasterSpec" specification database software, as well as, the Construction Specifications Institute "Manual of Practice". "MasterSpec" software is electronically revised every 3 months so that new technology, code requirements, and industry standards are always up to date. Additionally, SGM is fully capable and experienced with designed in BIM, if the project requires.

City of Hollywood Beach Continuing Contract for Mechanical, Electrical, and Plumbing Engineering Services RFQ: 4422-14-RD Hold Harmless Statement and Disclosure of Conflict of Interest

# HOLD HARMLESS AND INDEMNITY CLAUSE:

SGM Engineering, Inc., Tony Shahnami, PE, FE, CxA, CES, President

(Company Name and Authorized Signature, Print Name)

,the contractor shall indemnify, defend and hold harmless the City of Hollywood, its elected and appointed officials, employees and agents for any and all suits, actions, legal or administrative proceedings, claims, damage, liabilities, interest, attorney's fees, costs of any kind whether arising prior to the start of activities or following the completion or acceptance and in any manner directly or indirectly caused, occasioned or contributed to in whole or in part by reason of any act, error or omission, fault or negligence whether active or passive by the contractor, or anyone acting under its direction, control, or on its behalf in connection with or incident to its performance of the contract.

SGM Engineering, Inc., Tony Shahnami, PE, FE, CxA, CES, President

(Company Name and Authorized Signature, Print Name)

further certifies that it will meet all insurance requirements of the City of Hollywood and agrees to produce valid, timely certificates of coverage.

# XXI: DISCLOSURE OF CONFLICT OF INTEREST:

Vendor shall disclose below, to the best of his or her knowledge, any City of Hollywood officer or employee, or any relative of any such officer or employee as defined in Section 112.3135, Florida Statutes, who is an officer, partner, director or proprietor of, or has a material interest in the vendor's business or its parent company, any subsidiary, or affiliated company, whether such City official or employee is in a position to influence this procurement or not.

Failure of a vendor to disclose any relationship described herein shall be reason for debarment in accordance with the provisions of the City of Hollywood Purchasing Ordinance.

Name	Relationship	
NONE	N/A	

In the event the vendor does not indicate any names, the City shall interpret this to mean that no such relationship exists.

City of Hollywood, Florida

PROCUREMENT SERVICES RM. 303 P. O. Box 229045 ZIP 33022-9045

# NOTICE TO PROPOSERS

NOTICE IS HEREBY GIVEN, that the City Commission of the City of Hollywood, Florida is advertising for Sealed Request for Qualifications, which will be received by the City Clerk of the City of Hollywood, Florida until **3:00 P.M., May 30, 2014**, at which time they will be opened and publicly read in the Procurement Services Division, Room 303, City Hall, 2600 Hollywood Boulevard, Hollywood, Florida. FOR: **Continuing Contract for Mechanical, Electrical & Plumbing Engineering Services (PW 14-010)** 

# RFQ NO. 4422-14-RD ADDENDUM NO. 1

Please make the following changes (additions, deletions or corrections) in the above named RFQ.

Questions submitted in regards to the above RFP and corresponding answers:

Q1: Can you please clarify the following excerpts from the referenced RFQ?

Page 8, Section VII, Initial Selection Criteria reads: "Selected firms shall be able to provide full mechanical, electrical and plumbing engineering services to the City using in-house staff."

Since the City intends to award contracts up to 3 firms, can firms who only offer one (1) of the three (3) services requested be allowed to submit i.e. an electrical engineering firm? Or is it the intent of the City to award up to 3 contracts to firms that each offer full MEP services?

A1: Page 8, Section VII, Initial Selection Criteria changed to read: Selected firms shall be able to provide full mechanical, electrical and plumbing engineering services to the City using "proposers" in-house staff.

The City is seeking up to three (3) qualified engineering firms to provide mechanical, electrical and plumbing engineering design services. While a proposal submitted by an electrical engineering firm with sub-consultants may not be disqualified, the City is currently not inclined to accept a situation that would require it to deal with multiple parties.

Q2: On Page 5 of 16, the third bullet point says: "Provide the necessary structural engineering consulting services to complete the project identified."

If we are the MEP, we cannot "provide" structural services. Structural, Civil and Architectural would be by others.

A2: On Page 5, the third bullet point is revised to read as follows:

"Provide the necessary mechanical, electrical and plumbing engineering consulting services to complete the project identified."

Q3: Page 5 of 16 – second bullet states "Perform all field tests, laboratory tests and collect...etc" – what types of testing would be required? Typically this is not a normal service performed under a Mechanical, Electrical and Plumbing Services Contract.

# A3: CLARIFICATION:

Any testing to be done would be determined on a project by project basis. If any required testing cannot be done by the Mechanical, Electrical & Plumbing Engineering Consultant, then the City would order the testing directly from other Testing Services".

- Q4: Page 5 of 16 third bullet states "Provide necessary structural engineering consultant services..." is this an error?
- A4: Yes, see the answer to number 2.
- Q5: Please clarify if we are to submit 8 copies per the RFQ or 1 original with 10 copies per the RFQ Checklist provided on page 16 or 16.
- A5: Page 16 is correct: please submit one (1) original and ten (10) copies of entire proposal with addendums.

#### All other specifications, terms & conditions remain the same.

#### MAILED RFQ'S

If you have already submitted your printed Request for Qualifications, it will be retained in the City Clerk's Office until the Proposal opening time and date. If you wish to pick up your RFQ that has already been submitted, you can do so by showing proper identification, in the Office of the City Clerk, 2600 Hollywood Blvd, Room 221, Hollywood, Florida 33020.

#### Please sign and return with your RFQ.

City of Hollywood 2600 Hollywood Boulevard Hollywood, Florida 33020 Office of City Clerk, Room 221

RE: RFQ No. 4422-14-RD, Continuing Contract for Mechanical, Electrical, and Plumbing Engineering Services

Dear Selection Committee:

SGM Engineering, Inc. is pleased to present this Request for Qualifications to the City of Hollywood in response to the Request for Qualification for this **Continuing Contract for Mechanical, Electrical, Plumbing (MEP) Engineering Services.** 

The City of Hollywood's <u>Point of Contact and person authorized to make representations for the company</u> from SGM Engineering for this contract will be the following:

SGM Engineering, Inc. 700 W. Hillsboro Blvd., Bldg. 3, Suite 212, Deerfield Beach, FL 33441 Tony Shahnami: President, (ph) 954-421-1944, (f) 954-421-1924, <u>Tony@SGMEngineering.com</u>

SGM is a Mechanical, Electrical, and Plumbing design firm established in the State of Florida in 1991. *SGM is a Small Disadvantaged, Minority Owned Business Enterprise.* We provide full service design, engineering analysis and inspection professional services specializing in HVAC, lighting, power, LEED design, Commissioning, plumbing, fire protection/alarm, Construction Administration, and QA/QC. We employ highly qualified engineers who are certified with the Indoor Air Quality Council, American Forensic Engineering, U.S. Green Building Council, ACG Commissioning Group, and the U.S. Army Corps of Engineers Construction Quality Management.

## SGM's Understanding of the Work under this Contract

SGM will work to enhance the City Engineering Department's program to improve the energy efficiency of City owned and operated buildings with a goal of reducing power/consumption, and improving the City's carbon footprint. SGM will help the City of Hollywood make decisions regarding the most economical and efficient systems to be utilized for each building, in order to reduce and improve energy usage.

SGM views the City as a large-spread campus. We understand that all of your facilities are scattered across the City, however, SGM will provide guidance and show the City how its buildings are working and connected by creating a webbased integrated network. Our team will make sure that all fire stations, recreation centers, public works buildings, etc. will be integrated into this city/campus-wide Building Automation System web based access point. With a web-based integrated network, the City's Engineering Department will be able to go online and observe the building's deficiencies and make the necessary corrections.

SGM has been involved with energy grants through U.S. Department of Energy, which assisted the staff through energy grant applications, back up documentations, semi-annual/annual reports, and construction implementation. We received up to \$5,000,000 worth of energy grants through U.S. Department of Energy through the Florida State Governor's Energy Office.

SGM's portfolio includes many LEED certified and registered projects, totaling more than 2 million square feet of green space. Additionally, our engineers are knowledgeable of EPA's Energy Start Portfolio Manager.

SGM is staffed with certified Commissioning Agents and has established a standard for efficiency. SGM's commissioning services include consultation with owners on project goals, design reviews, custom/pre-functional test writing, submittal reviews, observation of staff training, Cx specifications, Cx reports, and the creation of system manuals. SGM provides construction and enhanced commissioning services, as well as retro-commissioning.

SGM promotes integrated design analyzing with multiple options for building features including the building envelope, HVAC equipment, and lighting systems in order to identify the most effective energy saving strategies. SGM has extensive experience using 3D energy modeling software packages to demonstrate the value of energy saving strategies. Additionally, we utilize daylight modeling to evaluate fenestration, types of glazing, and architectural features.

Our resources, combined knowledge, and experience will allow SGM to be flexible and cost effective. Our team has the ability to commit as soon as the notice to proceed is issued. Our team has completed thousands of projects at various sites across the State of Florida and abroad. Additionally, SGM's team is capable of performing multiple projects concurrently. We have evaluated our current workload over the course of this year along with the time frame of this contract, and we have determined that SGM has the resources available to immediately begin work on these assignments. Due to consistently completing projects on time and within budget, we have built and solidified a stream of satisfied repeat clients.

I hereby state that the entire assigned SGM team and Project Manager for this services contract will remain committed with the City of Hollywood contract to ensure each task will receive full dedication and necessary time.

It is our hope that the City of Hollywood will consider SGM to fulfill their **Continuing Contract for Mechanical, Electrical, and Plumbing Engineering Services.** We are confident that you will find our team to be knowledgeable and competent, proven by our track record during the 23 years in business. SGM Engineering supports the best interest of the City of Hollywood by ensuring that projects are completed on time and within budget.

SGM Engineering's goal is for a long and productive working relationship with the City of Hollywood and we are devoted to providing the highest level of professional services. We greatly appreciate your time and consideration.

Sincerely,

MMSh PE

Tony Shahnami, P.E., F.E., CxA, CES, CHS – III , President of SGM Engineering, Inc.
