TO: Planning and Development Board

VIA: Anand Balram, Planning Manager

FROM: Cameron Palmer AICP, MCIP-I, Principal Planner

SUBJECT: G&T Enterprises LLC requests Design and Site Plan for a ten (10) unit residential development located at 1919 Johnson Street.

REQUEST

Design and Site Plan for a ten (10) unit residential development.

RECOMMENDATION

Design: Approval

Site Plan: Approval, if the Design is granted.

REQUEST

The Applicant requests Design and Site Plan for a ten-unit residential development at 1919 Johnson Street. The site is zoned North Downtown Low Intensity Multi-Family District (ND-1) and has a land use of Regional Activity Center (RAC). The property is approximately 0.18 acres in area.

The proposed four-story residential development, at approximately 42 feet in height, is comprised of ten (10) residential units, comprising eight (8) one-bedroom units and two (2) two-bedroom units. Parking is proposed on the first floor with vehicular ingress and egress to Johnson Street. There will be no vehicular access to the alley in the rear. Pedestrian access to the proposed development will be directly from Johnson Street. An outdoor terrace is located on the fourth floor.

The design is contemporary, proposing a series of contrasting volumes consisting of a neutral paint palette, supported by multiple materials and finishes, such as stucco, porcelain tile wood siding, and glass balcony railings. Window sizes are varied, including large floor-to-ceiling glazing on the south façade facing the street. Parking is located at grade and screened, while the design also uses landscaping to enhance and frame the property. The proposed design, meeting all applicable regulations, helps to serve as an example for future revitalization efforts.

SITE DATA

Owner/Applicant: G&T Enterprises, LLC.
Address/Location: 1919 Johnson Street
Net Area of Property: 7,998.55 sq. ft. (0.18 acres)
Land Use: Regional Activity Center (RAC)
Zoning: North Downtown Low Intensity Multi-Family District (ND-1)
Existing Use of Land: Residential
Year Built: 1936 (Broward County Property Appraiser)

ADJACENT LAND USE

North: Regional Activity Center (RAC)
South: Regional Activity Center (RAC)
East: Regional Activity Center (RAC)
West: Regional Activity Center (RAC)

ADJACENT ZONING

North: North Downtown Low Intensity Multi-Family District (ND-1)
South: North Downtown Medium Intensity Multi-Family District (ND-2)
East: North Downtown Low Intensity Multi-Family District (ND-1)
West: North Downtown Low Intensity Multi-Family District (ND-1)

CONSISTENCY WITH THE COMPREHENSIVE PLAN

Located within the Regional Activity Center the subject site is surrounded primarily by single-family and multi-family residential properties. The goal of the Land Use Element is to *promote a distribution of land uses that will enhance and improve the residential, business, resort, and natural communities while allowing land owners to maximize the use of their property.* The intent of the Regional Activity Center land use designation is to *encourage redevelopment or development of areas that are regionally significant. The major purposes of this designation are to facilitate multi-use and mixed-use development, encourage mass transit, reduce the need to automobile travel, provide incentives for quality development, and give definition to the urban form.* Development of this site enhances the neighborhood, encourages redevelopment of the area, and provides a model for new development within the Regional Activity Center. The project is consistent with the Comprehensive Plan based on the following Objectives:

Objective 4: *Maintain and enhance neighborhoods, business, utilities, industrial and tourist areas that are not blighted.*

Objective 6: *Encourage multi-use areas and mixed uses concentrations of density near existing or planned major employment centers and major transportation routes in order to promote energy conservation and mass transit, preserve air quality, reduce the cost of services, encourage affordable housing, and promote economic development.*

CONSISTENCY WITH THE CITY-WIDE MASTER PLAN

The project is located in Sub-Area 2, defined by the Intracoastal Waterway to the east, Dixie Highway to the west, Sheridan Street to the north and Pembroke Road to the south. This area includes the residential neighborhood of the Lakes, West Lake and the residential areas between Federal and Dixie Highways. The proposed project is consistent with the City-Wide Master Plan, based upon the following Guiding Principles and Policies.

Guiding Principle: *Promote the highest and best use of land in each sector of the City without compromising the goals of the surrounding community.*

Policy CW.15: *Place a priority on protecting, preserving, and enhancing residential neighborhoods.*

Policy CW.44: *Foster economic development through creative land use, zoning and development regulations, City services and City policies.*

Policy 2.10: *Encourage high-density residential development in the Downtown.*

APPLICABLE CRITERIA

Analysis of Criteria and Findings for Design as stated in the City of Hollywood Zoning and Land Development Regulations, Article 5.

CRITERIA 1: *Architectural and Design components.* Architecture refers to the architectural elements of exterior building surfaces. Architectural details should be commensurate with the building mass. The use of traditional materials for new architectural details is recommended. Design of the building(s) shall consider aesthetics and functionality, including the relationship of the pedestrian with the built environment.

ANALYSIS: The design is contemporary, consisting of articulation and a neutral color palette, proposing a series of contrasting volumes, and creating dynamic and visually appealing facades. The different materials emphasize the geometric language. The building faces Johnson Street and provides pedestrian access giving definition to the urban form.

FINDING: Consistent.

CRITERIA 2: *Compatibility.* The relationship between existing architectural styles and proposed construction, including how each building along the street relates to the whole and the pattern created with adjacent structures and the surrounding neighborhood. Buildings should contain architectural details that are characteristic of the surrounding neighborhood.

ANALYSIS: With varying architectural styles and finish materials found throughout the surrounding community, the proposed development exhibits proportionate architectural features and styles that are sensitive and compatible to the surrounding neighborhood. The Applicant has introduced a modern

interpretation of the styles and elements found throughout the neighborhood, introducing a fresh look to the neighborhood, and propelling a sense of community.

FINDING: Consistent.

CRITERIA 3: *Scale/Massing.* Buildings shall be proportionate in scale, with a height which is consistent with the surrounding structures. Building mass shall reflect a simple composition of basic architectural details in relation to its length, width, height, lot coverage, and setting of the structure in context with adjacent buildings. Architectural details include, but are not limited to, banding, molding, and fenestration.

ANALYSIS: The project is compliant with zoning regulations as it pertains to FAR, height, setbacks, and landscape requirements. The proposed scale and height are consistent with the vision of the Regional Activity Center and zoning district.

FINDING: Consistent.

CRITERIA 4: *Landscaping.* Landscaped areas should contain a variety of native and other compatible plant types and forms, and be carefully integrated with existing buildings and paved areas. Existing mature trees and other significant plants on the site should be preserved.

ANALYSIS: The Applicant has worked with the City Landscape Architect to incorporate a variety of compatible plant types and forms into the design. The proposed landscape helps articulate the property and enhance the design of the proposed buildings.

FINDING: Consistent.

SITE PLAN

The Technical Advisory Committee (TAC) found the proposed Site Plan compliant with all regulations as set forth in Article 6 of the Hollywood Zoning and Land Development Regulations. Therefore, staff recommends approval if Design is granted.

The following standards shall be utilized by the Technical Advisory Committee and the Planning and Development Board in the review, evaluation, and approval of all required plans and exhibits:

- A. *Natural Environment.* All proposed development shall be designed in such a manner as to preserve, perpetuate and improve the existing natural character of the site. Existing trees and other landscape features shall, to the maximum extent possible, be preserved in their natural state; and additional landscape features shall be provided to enhance architectural features, to relate structural design to the site, and to conceal unattractive uses. In all instances the city's tree protection, landscaping and all other applicable regulations shall be fully complied with as minimum standards.

- B. *Open space.* Adequate landscaped open space shall be provided which meets the particular needs and demands of the proposed development and all specific zoning district requirements. Legal methods assuring the continued preservation and maintenance of required open space shall be submitted to and approved by the City Attorney. The type and distribution of all open space shall be determined by the character, intensity and anticipated residential or user composition of the proposed development.
1. Passive open spaces (those areas not planned for intensive activity) shall be arranged as to enhance internal spatial relationships between proposed structures, to provide buffers between the project and adjacent less intensive uses, to facilitate pedestrian movements within the development, and to improve the overall visual quality of the site.
 2. Active open spaces (those areas containing activities such as playgrounds, tennis courts, swimming pools and other active recreational facilities) shall be located so as to permit easy access to all residents or users within a development. Private recreational facilities and activities within specific projects shall, wherever possible, complement, rather than duplicate, nearby public recreational activities.
- C. *Circulation and parking.* All circulation systems and parking facilities within a proposed development shall be designed and located in such a manner as to comply with the following:
1. A clearly defined vehicular circulation system shall be provided which allows free movement within the proposed development while discouraging excessive speeds. Said systems shall be separated insofar as practicable from pedestrian circulation systems. Pavement widths and access points to peripheral streets shall be provided which adequately serve the proposed development and which are compatible and functional with circulation systems outside the development.
 2. Whenever possible in proposed residential developments, living units should be located on residential streets or courts which are designed to discourage nonlocal through traffic.
 3. Off-street parking areas shall be provided which adequately accommodate maximum vehicle storage demands for the proposed project and are located and designed in such a manner so as to conveniently serve the uses to which they are accessory and not create incompatible visual relationships.
 4. Safe and efficient access to all areas of the proposed development shall be provided for emergency and service vehicles, as required by the Florida Building Code in effect in Broward County, Florida, as revised from time to time.
 5. Sidewalks shall be provided as required by the city regulations.
 6. Handicapped Accessibility shall be provided as required by all applicable regulations.
- D. *Community services and utilities.* All proposed developments shall be designed and located in such a manner as to insure the adequate provision, use and compatibility of necessary community services and utilities.

1. An adequate sanitary sewer collection system including all necessary extensions and connections, shall be provided in accordance with city standards for location and design. Where necessitated by the size of the development and/or by the unavailability of city treatment facilities, sanitary sewage treatment and disposal systems must be provided in accordance with city and state standards and regulations.
 2. An efficient solid waste collection system, including the provisions of an adequate number of properly screened local receptacles in locations which afford maximum use and collection convenience, shall be provided in accordance with all applicable city standards.
 3. A well designed internal system for fire protection, including the provisions of an adequate number of properly located fire hydrants and an efficient access arrangement for emergency fire vehicles, shall be provided to insure the safety of all persons within the project.
- E. *Building and other structures.* All buildings and structures proposed to be located within a development shall be oriented and designed in such a manner as to enhance, rather than detract from, the overall quality of the site and its immediate environment. The following guidelines shall be followed in the review and evaluation of all buildings and structures:
1. Proposed buildings and structures shall be related harmoniously to the terrain, other buildings and the surrounding neighborhood, and shall not create through their location, style, color or texture incompatible physical or visual relationships.
 2. All buildings and structures shall be designed and oriented in a manner insuring maximum privacy of residential uses and related activities both on the site being developed and property adjacent thereto.
 3. All permanent outdoor identification features which are intended to call attention to proposed projects and/or structures shall be designed and located in such a manner as to be an integral part of the total project and/or structural design and shall not exceed a size and scale necessary for the recognition from vehicles moving along adjacent streets at prescribed legal speeds.
- F. *Level of service standards.* For the purpose of the issuance of development orders and permits, the city has adopted level of service standards for public facilities and services which include roads, sanitary sewer, solid waste, drainage, potable water, and parks and recreation. All Applicants are required to prove concurrency pursuant to the City's Comprehensive Plan and F.S. Chapter 163, as amended from time to time.
- G. *Other requirements.* Requirements and recommendations as provided in the city tree and landscape regulations shall be observed as will the requirements of all applicable standards and regulations.
