1. Contractor shall maintain the contractually covered grassy and landscaped areas, at the frequency rate prescribed, with conventional production style mowing and lawn maintenance equipment.

2. Maintenance as defined for bid purposes shall include: Delittering, mowing, edging, hedge trimming, selective tree trimming up to a 10 foot clearance, raking, sweeping, weeding to maintain a weed free condition, weedeating, herbiciding and other related duties as outlined herein.

When mowing medians or near sidewalks, grass clippings may not be blown into traffic lanes, storm drains, or pedestrian areas. When pedestrians are nearby, blowers shall be turned off until the pedestrian passes and the blower can then be turned on again.
Grass shall not be cut within fourteen (14) days of the previous cut unless approved by the City. Mowing shall not be done when weather conditions will result in damaged turf. Ruts caused by mowing when ground is too soft shall be repaired by the Contractor within 24 hours.
5. **Edging** shall be done along sidewalks, walkways, asphalt paths, and road edges with a gas-operated edger, not a weedeater, during each site visit. Turf will be mechanically edged around all tree rings in lawn areas and approximately ten inches out from the drip line of shrubs and hedges. Edged material shall be swept and collected for proper disposal. Edger must have a protective shield on at all times.
6. The contractor shall trim all hedges and shrubs during each site visit. Separation of various species shall be maintained as well as 24 inches of clearance of shrubs away from tree/palm rings. The Public Works Director or his/her designee shall determine the desirable maximum height of shrubs and hedges based on the location along a right-of-way or at a facility, and shall determine whether shrub groupings shall be maintained by selectively trimming or by shearing. Sheared hedges shall be trimmed to a uniform height and trimmed with a slightly wider width at the base to allow even sunlight penetration. Shrubs shall be selectively trimmed to achieve a natural appearance and to achieve maximum bloom. All shrubs shall be maintained four inches behind the curb and not allowed to extend past the back of the curb.

7. All plant material shall be trimmed to eliminate any possible sight obstructions for vehicular traffic. Trees shall be trimmed according to ANSI A300 Standards. Flush cuts and stub cuts are prohibited. Tree trimming will be required in areas where limbs can be reached from ground level and up to 10 feet high. Trees should be trimmed in a manner to allow pedestrian access, a minimum of ten (10) feet of clearance. The contractor shall be required to trim overgrowth where it obstructs or restricts the sight distance view of vehicles, e.g., limbs branching into the roadway from the median. All trees shall be trimmed of dead, dying, diseased branches and sucker growth. In playground areas, branches shall be trimmed to a minimum clearance of seven (7) feet from playground equipment. Dead and low hanging palm fronds extending to within ten (10) feet of ground shall be properly cut at the trunk and removed at each service interval. Contractor shall disinfect trimming equipment as per ANSI specifications. On trees known to be diseased, disinfect tools after each cut and between trees. The employee performing tree trimming must possess a Class B Tree Trimmer's license or better as required by Broward County.

8. **Raking** of leaves shall be performed over all areas serviced to maintain a neat appearance and include fine-raking under all trees, shrubs, planter beds, landscape areas and open grassy areas where leaves accumulate. Pathways, sidewalks, and curb areas shall be blown clean or swept prior to leaving the site.
9. **Weed control** shall be done to maintain a weed free condition. All turf, planting beds and tree rings shall be maintained in a weed free condition. Weeding shall include but not be limited to ornamental beds, tree rings, base of shrubbery, hedges, sidewalks, curblines, fence lines, sidewalk cracks, playgrounds, irrigation equipment fenced enclosure areas, or any other areas where weeds exist. Weeds shall be manually pulled when necessary during each site visit to prevent an unsightly appearance caused by their presence. The use of herbicides must be approved by the Director of Public Works or his/her designee. The use of a dye is required to clearly indicate where spraying has occurred. Dye is not to be used on concrete medians, sidewalks, or pavers. Herbicides shall only be used to control new growth of weeds no more than two (2) inches in height. The contractor shall manually pull all visible weeds taller than two (2) inches; herbicides are not to be used as a continual maintenance service. All applications shall be performed by persons holding a valid herbicide application license as issued by the State of Florida and shall be done in accordance with the herbicide manufacturer's recommended rates and all applicable Federal, State, County and Municipal regulations. Each applicator must be licensed and may not supervise other applicators. Herbicides may be used only with prior approval by the City's designee as to type, location and method of application. The Contractor shall exercise extreme care so as not to overspray and affect areas not intended for treatment. Areas adversely affected by such overspray shall be restored at the Contractor's expense. The contractor shall be responsible for replacing

all damaged foliage caused by the use of herbicides at no cost to the City. **The Florida Certified Pesticide Applicator license holder MUST be the applicator of pesticides or herbicides. Acceptable licenses are the Department of Agriculture and Consumer Services Florida Limited Commercial Maintenance License Certification or the Bureau of Entomology and Pest Control Commercial Landscape Maintenance license.**

Florida Department of Environmental Protection will be requiring Best Management Practice Certification for fertilizer application in 2014. Contractor must be in compliance with this FDEP certification when required.

10. **Weed eating** shall be done around all fixed objects exposed in the turf to include but not limited to irrigation heads, trees, poles/posts, or other fixtures commonly found in such settings. Weed eating shall be done with string trimmer. When using a string trimmer, weed eating shall be done so that tree trunks are not damaged. Any damage to tree trunks will be cause for Contractor to replace the tree. Weedeating should leave grass at the same height as the mowed, adjacent turf. Trimmings from weedeating must be removed.
11. All grass clippings, vegetative trimmings and overburden existing on or derived from the operation shall be blown from street and walk areas on the day the maintenance is performed, and if necessary to maintain a superior appearance shall be bagged and removed from the site. Debris is not to be blown into the street or onto a pedestrian pathway. The contractor shall at their own expense, remove and properly dispose of all waste, materials, i.e., cans, bottles, paper, resulting from the operation. Where recycling containers are present on site, contractor shall deposit aluminum cans and glass into appropriate containers.
12. Evidence of turf insects shall be brought to the attention of the Director of Public Works or his/her designee. The City may ask the contractor to apply chemicals to control and/or kill pests as needed. Quick kill ant bait shall be supplied by the Contractor and applied at every service as needed.
