RE: Proposal for Legal Services – Phase 2

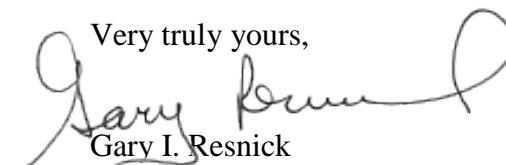

Dear Azita:

Per our communications, the Mayor and Commission have requested an Ordinance to address utilities in the public rights-of-way other than communications facilities, particularly to address leaning utility poles and poles that should be removed or replaced. We would amend Ch 55 Part I of the City Code, expressly to address such utility poles and other utilities in the public rights-of-way, consistent with Florida law including PSC regulations.

We would estimate that such ordinance and services related thereto would require approximately 95 hours, which based on my current hourly rate of \$385, would not be expected to exceed \$40,000.00. My services would include working with you and the City staff, researching applicable state law and regulations, and other relevant authorities including the FDOT Utility Accommodation Manual, Broward County and other relevant Codes and regulations, as well as reviewing the City's franchises with various utilities, addressing stakeholder comments, and preparing a draft ordinance for the City staff's review and making revisions as needed. We would also present the Ordinance to the City Commission. Following adoption, we would be available for training and assistance with the City's internal procedures.

In other respects, the terms of our existing engagement with the City would continue to apply. Please notify us if this proposal is accepted by the City. If you have any questions, please do not hesitate to contact us.

Very truly yours,

Gary I. Resnick
