## City of Hollywood Marine Waterway Master Plan

### Community Prioritization of Projects

Project Name	Community Support Level
City Wide Project: Improve Storm Drainage/Flood Control/ Pollution Control	89
City Wide Project: Seawalls	67
Residential Lakes: Dredging Strategy	63
Residential Lakes: North Lake Marine Improvements (Option A)	54
Intracoastal Waterway- Docking and Mooring Coves	46
Holland Park Improvements	32
Rotary Park	30
Residential Lakes- Neighborhood Paths (Option A)	29
Barrier Island- Street Improvements and Beach Connectivity : Linear Park East Side of ICW	26
Anne Kolb Recreation and Eco Tourism: Access to Natural Amenities	25
Day Docking and Beach Connectivity: ICW Day Use Docks (County Park)	14
Barrier Island- Street Improvements and Beach Connectivity : Pedestrian Bridge Connection	8
City Wide Project: Additional Waterway Improvements (Bridge Gateways)	6
City Wide Project: Additional Waterway Improvements (Water Taxi)	5
Day Docking and Beach Connectivity: Pump Stations	2
Barrier Island- Street Improvements and Beach Connectivity : Broadwalk/A1A Pedestrian Connector and Harry Berry Park	1

**\*\*NOTE:** Projects titled Residential Lakes- Neighborhood Paths (Option B) and Residential Lakes: North Lake Marine Improvements (Option B) received less support than their Option A counterparts and will be removed from final project list in the Marine Waterway Master Plan.

## IMPROVE STORM DRAINAGE/FLOOD CONTROL/POLLUTION CONTROL

Description: City-Wide, the lakes and waterways present several environmental issues dealing mainly with the storm water run-off and flooding. The following recommendations will help to reduce the flooding within the neighborhoods and surrounding waterways.

1. The City should install/implement back-flow preventers on outfalls to control the water entering at higher tides.

2. Explore the use of sand traps and filter stations at the outfalls along the waterways to eliminate the silt and toxic pollutants entering the water through storm water run-off. The silt from the run-off creates an unsuitable substrate for the propagation of seagrasses and brings with it pollutants which accumulate to unsafe levels due to poor flushing. Pump stations at the marina (as mentioned above) and golf courses should be carefully designed to include these improvements.

Justification: Reduce the amount of residential flooding, hazard to traffic (flooding). Reduces the need for future dredging removes contaminants associated with storm water run-off (sand trap).

Work: Install pollution retardant catch basins or other filtration systems. Instal backflow preventers.

Related Works: Upland landscaping, etc.

Management: Control operation regulations and control, City of Hollywood, SFWMD.

Cost/Funding: Intermediate, additional funding research required.

City Decision-Making Control: High (Permitting and Construction on City-Owned properties).

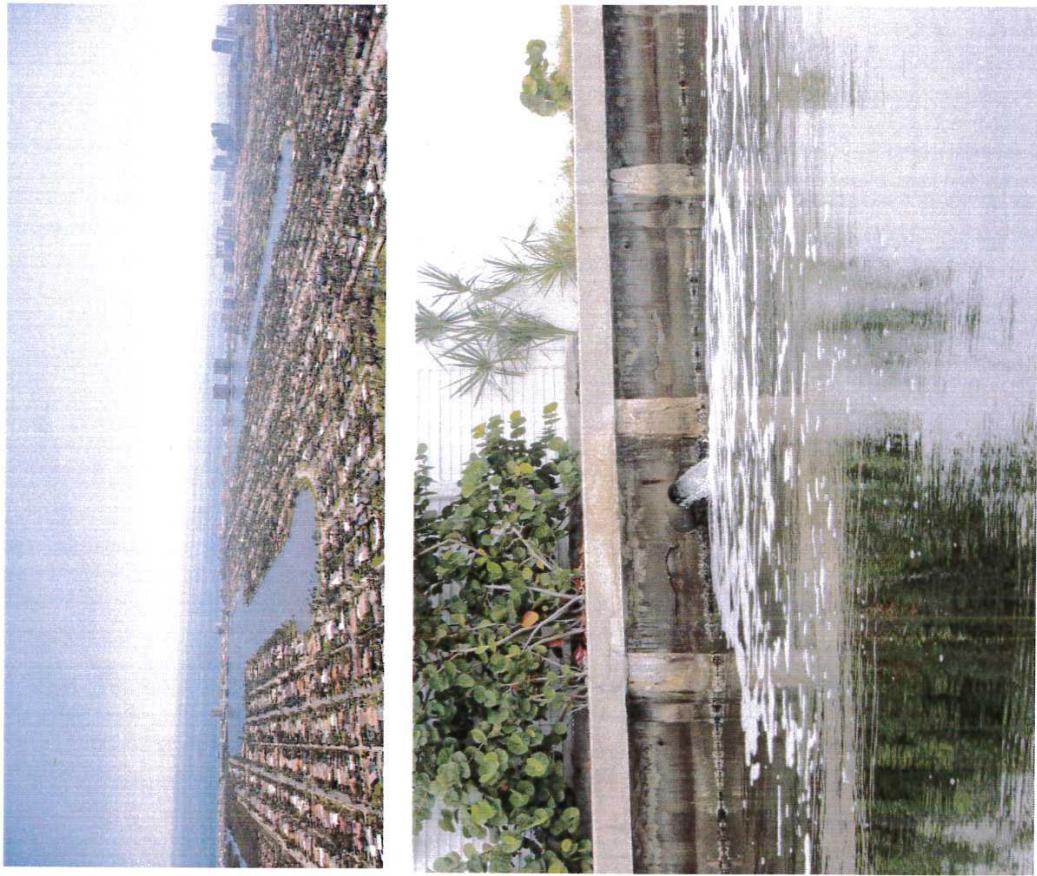

Complexity: Intermediate

Importance: Intermediate

Priority: Low before proposed dredging, intermediate to high after proposed dredging is pursued.

### PROJECT SELECTION:

89

## SEAWALLS

Recommendations: A comprehensive seawall survey/assessment is recommended to assess and develop mechanisms to improve/repair all City owned seawalls as needed. Where seawalls are found to be failing, improvements made should take into account sea level rise and be constructed to a suitable elevation.

Justification: Prevention of flooding, protect adjacent seawalls.

Works: There are many solutions to damaged seawalls and the costs vary by need and site.

Related works: Upland public access, waterfront park, landscaping, etc., depending on the site.

Management: Operation regulations and control, City of Hollywood.

Cost / funding: Intermediate/high. FIND funding may be available. Consider 50/50 split of expenses between residents and City for residential seawall ownership areas - tax zone assessment may be necessary. Seawalls within City ownership to be directly funded by City/potential grants.

City decision-making control: High/intermediate depending on permitting.

Complexity: Intermediate

Importance: Intermediate

Priority: Intermediate

**PROJECT SELECTION:**

67

#### DREDGING STRATEGY:

Description: dredge residential channel near shoreline.

Justification: Preserve and enhance the ability to dock boats along residential seawalls.

Works: Dredging and associated permit/implementation strategy.

Related works: Disposition of dredged fill, potential mitigation, potential aquatic planting to cleanse storm water and mitigate wave action.

Management: City engineering in cooperation with ACOE.

Cost/ Funding: High cost, potential to share between City and homeowners by way of assessments (permitting and construction on city-owned properties).

City Decision-Making Control: Intermediate-subject to ACOE.

Complexity: Intermediate

Importance: Intermediate

Priority: Intermediate

#### PROJECT SELECTION:

603

## NORTH LAKE MARINE IMPROVEMENTS: OPTION A

Description: Navigation improvements to North Lake, including: dredging of shoals, modernization of City Marina, sea level rise adaptation, run-off control improvements and potential environmental restoration.

Justification: Strong viable and sustainable plan for boating infrastructure, valuable City asset, marina modernization may support other improvements, resident's request for dredging, resident's request for trailer traffic reduction, flooding problems during high tide, uncontrolled run-off discharges, FEMA remapping and insurance cost increases, etc.

Works: multiple related improvements:

- Marina Redevelopment (similar slip count, larger vessels, similar footprint, modern standards)
- Lake Dredging (zoning for marina access / sailing school / residential dock access)
- Stormwater Discharge Improvements (possibly seaward of seawall)
- Sailing School Improvements
- Shoreline Improvements with Habitat Restoration (may be used to address seawall maintenance problems)

Related Works: Upland waterfront park / landscaping, signage to redirect trailer traffic through Hollywood Blvd., etc. Environmental mitigation and design elements may affect permitting and cost.

Management: Marina and trailer parking regulations and control through City Marina manager.

Cost / Funding: High cost, FIND and Broward Co. Improvement funding available for public use boating infrastructure (marina docks and dredging) City CIP.

City Decision-Making Control: High (permitting and construction on City-owned properties)

Complexity: High - close coordination with residents and existing clubs, potential high cost and permitting challenges may require innovative approaches (SEPA)

Importance: High

Priority: Intermediate

## PROJECT SELECTION:

5A

## ICW COVES

**Description:** Transient docking and / or mooring field in the coves north and south sides of Sheridan St. On the east side of the ICW. Removal and replacement of invasive species with native planting.

**Justification:** Strong demand for boating infrastructure, connectivity ICW-beach.

**Works:** Dockage / managed mooring field; day use docks

**Related works:** Coordinate access, etc.

**Management:** Coordination with Broward Co., Potentially managed through the city marina

**Cost / Funding:** Intermediate cost. FIND and Broward Co. Improvement funding available for boating infrastructure. Work with FDOT, County, and City to establish equitable cost sharing.

**City Decision-Making Control:** Intermediate (requires coordination with county).

**Complexity:** Intermediate (requires coordination with county) and seagrass issues.

**Importance:** Intermediate

**Priority:** Intermediate

## PROJECT SELECTION:

WATERWAY'S MASTER PLAN | SCALE: 1:100

E. INTRACOASTAL WATERWAY-DOCKING AND MOORING COVES

EDSA  
Engineering Services  
Architectural Services  
Project Manager

EDSA  
Engineering Services  
Architectural Services  
Project Manager

HOLLAND PARK

**Description:** Property improvements to expand areas for non-motorized uses, waterfront park and landscaping, and environmental restoration.

**Justification:** Strong demand for boating infrastructure, valuable city asset with limited present use, active base for non-motorized uses, synergies with city marina, and most residents support for ~~existing~~ proposed expansion.

Wooles: Multiple Policed Environments

- WWSLS: multiple related improvements.
  - Expansion space for various non-motorized uses
  - \* Trailers boat parking
  - \* Shortening time requirements with boats & concentrations

卷之三

**Management:** Motorized boating operation regulations and control through

**Cost / funding:** Intermediate cost. FIND and Broward Co. improvement funding

**City Decision-Making Control:** High permitting and construction on city-owned

**Complexity:** Intermediate (close coordination with residents and existing clubs, minimize boat trailer traffic, balance motorized and non-motorized use)

### Importance: High

DOLL AND PARK IMPROVEMENTS

WATERWAYS MASTER PLAN

## ROTARY PARK

Description: Improvements to the boat ramp and day use dockage at rotary park should be addressed. Parking for trailers needs improvement. Evaluate the potential for day use docks adjacent to the boat ramp. Improvements should also be made to allow better views of the water.

Justification: Access and revitalization

Works: Retrofit boat ramp to include stable dockage without utilities (day use dockage) along the shoreline, vegetation removal/trimming

Related Works: Upland public access, waterfront park, landscaping, etc.

Management: Operation regulations and control, City of Hollywood

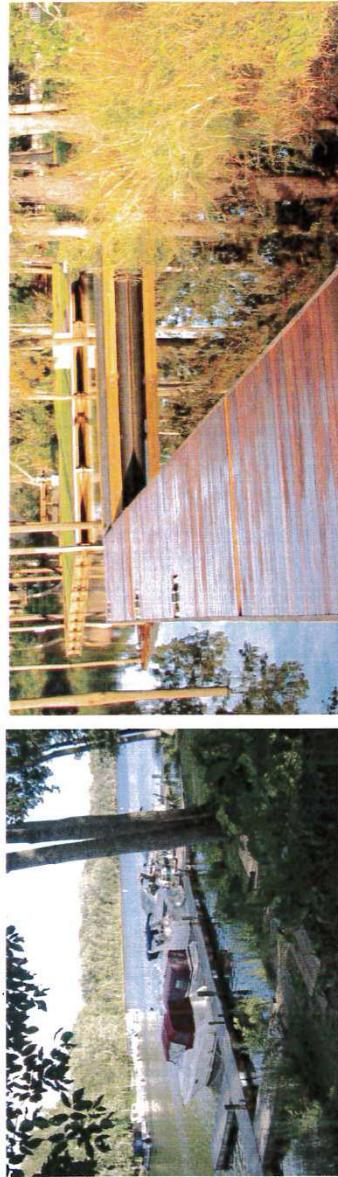

Cost / Funding: Relatively low cost. FIND and Broward Co. Improvement funding available.

City Decision-Making Control: High (permitting and construction on City-owned properties).

Complexity: Intermediate

Importance: Intermediate

Priority: Low

WATERFRONT MASTER PLAN | 44 | SCALE 1:20

## I. ROTARY PARK

Rotary Park  
Improvement  
Project Plan  
EDSA

PROJECT SELECTION:	30
--------------------	----

## RESIDENTIAL LAKES: OPTION A

Description: Linear parks at West ends of North and South Lake, with options of expressing a range of features.

Justification: To increase visual and physical access to the water and improve the visual quality of these unique lake edges

Works: Option 1 includes landside improvements with meandering paths, benches, road intersection treatment, pedestrian level lighting, and enhanced landscape.

Related Works: Reconstruct storm water outfalls to incorporate pollution control devices and backflow preventers.

Management: City public works/parks and recreation.

Cost / Funding: Low to intermediate cost. Potential FUND grant funding as the planned improvements increase public access to the water.

City Decision-Making Control: High

Complexity: Low to intermediate

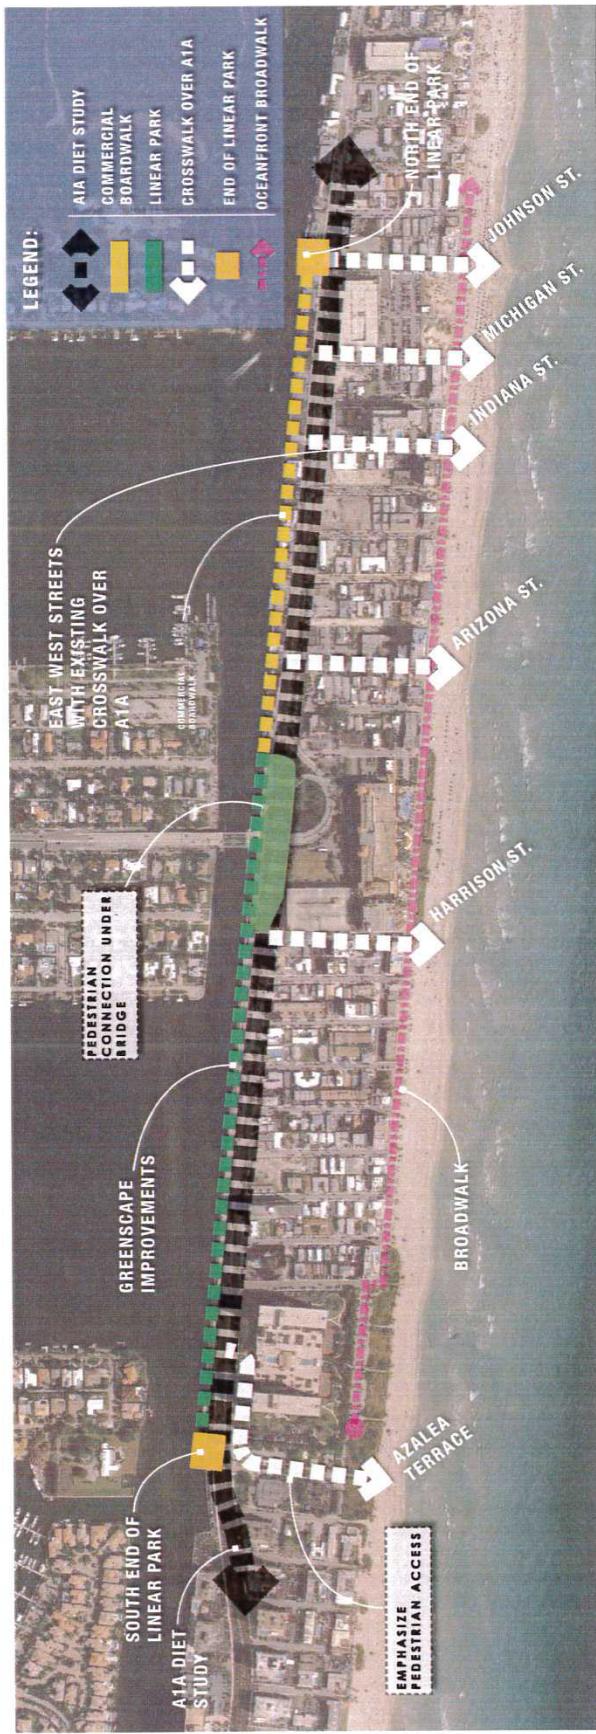

Importance: High

Priority: Intermediate to high. This option is a relatively simple project as it does not involve permitting of over-water structures.

PROJECT SELECTION:

29

### LINEAR PARK- EAST SIDE OF ICW

Description: Create continuous pedestrian/bike public access along east side of ICW north and south of Hollywood Blvd.

Justification: Portions of ICW frontage are not visible or accessible by the public in a primary view corridor.

Works: Reconfiguration of parking areas under bridge ramps to create water front walking paths; enhanced walking paths south of Hollywood Blvd; pursuit of water front promenade adjacent to private property to the north.

Related Works: Short term- secure and screen beach maintenance equipment; long term- relocate. Project displaces small parking areas in favor of pedestrian space.

Management: City engineering, public works

Cost / Funding: Low to intermediate cost. As this concept increases public access to the water it may be eligible for FIND grant.

City Decision-Making Control: Low to medium

Complexity: Low to media

Importance: High- physical improvements are not a difficult undertaking.

Priority: High

### PROJECT SELECTION:

260

## ACCESS TO NATURAL AMENITIES

**DESCRIPTION:** Capitalize on natural amenities and recreational opportunities such as kayaking and paddle boarding. Focus on eco tourism.

**JUSTIFICATION:** Provides educational opportunities as the largest remaining mangrove ecosystem in the urban coastal zone from Miami to West Palm Beach.

**WORKS:** Increase pedestrian access with trails and crosswalks.

**RELATED WORKS:** Potential water taxi accessibility

**MANAGEMENT:** Operation regulations and control in coordination with county

**COST / FUNDING:** Low

**CITY DECISION-MAKING CONTROL:** Low (coordination with county)

**COMPLEXITY:** Low

**IMPORTANCE:** Low

**PRIORITY:** Low

**PROJECT SELECTION:**

25

### **ICW DAY USE DOCKS (COUNTY BEACH PARK)**

**Description:** Consider reconfiguring the County-owned boardwalks along the east (beach) side of the ICW (Hollywood North Beach Park) to allow connection between ICW and beach by means of dockage for day use, drop-off, water taxi stops, etc.

**Justification:** Connectivity and revitalization

**Works:** Retrofit side-tie dockage without utilities (day use dockage) along the shoreline.

**Related Works:** Upland public access, pedestrian crosswalks, landscaping, etc. Reassessment of wake zones along ICW.

**Management:** Operation regulations and control in coordination with county

**Cost / Funding:** Relatively low cost. FInD and Broward Co. Improvement funding available.

**City decision-making control:** Low (coordination with county)

**Complexity:** Intermediate (coordination with county)

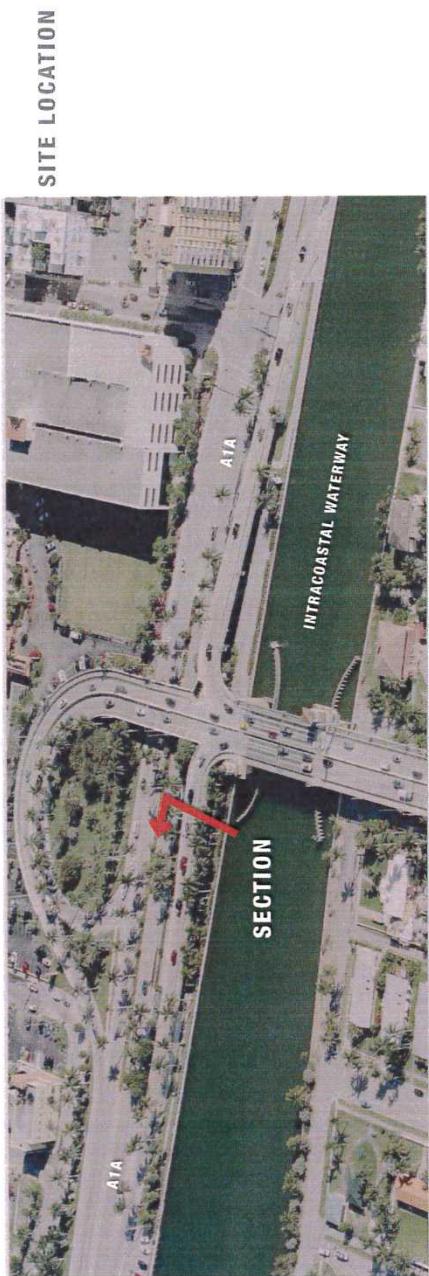

**Importance:** Intermediate

**Priority:** Intermediate

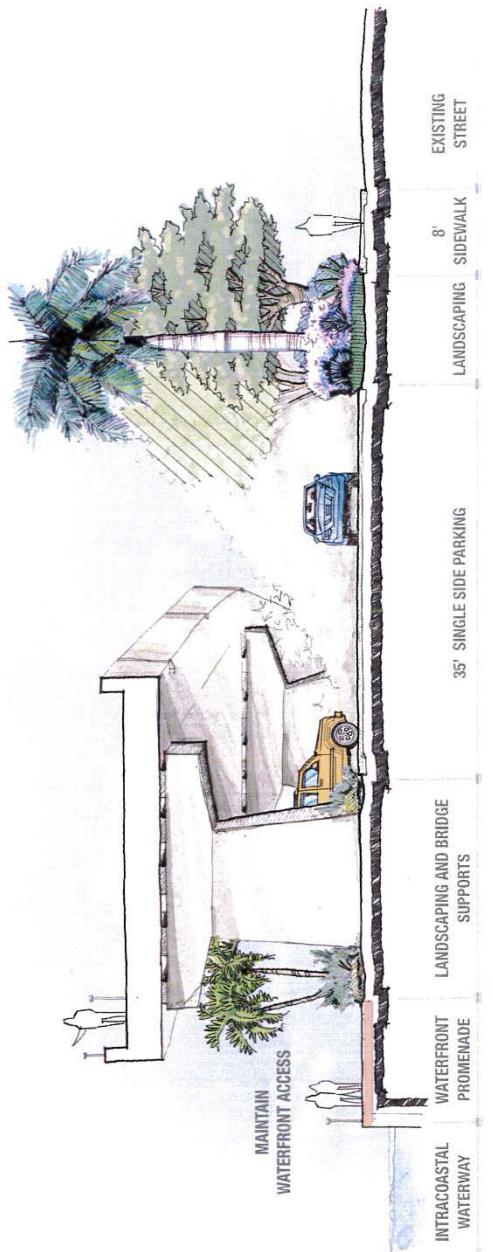

**PROJECT SELECTION:**

**F-1. BARRIER ISLAND-STREET IMPROVEMENTS AND BEACH CONNECTIVITY**

## ADDITIONAL WATERWAY IMPROVEMENTS (BRIDGE GATEWAYS)

Description: City identification elements on drawbridges.

Justification: Expand awareness and signature for the City of Hollywood.

Works: Applied graphics or painted identification elements to draw spans and/or piers.

Related Works: Overall City marketing strategy.

Management: City public works in coordination with FOIT and ACOE.

### PROJECT SELECTION:

6

## BRIDGE GATEWAYS

LEGEND:	
PROPOSED WATERWAY GATEWAYS	blue dot

Cost / Funding: City's cost, potential to be a public art project.

City Decision-Making Control: Intermediate to low-subject to outside permitting entities with rigid standards.

Complexity: Intermediate

Importance: Intermediate

Priority: Intermediate

## ADDITIONAL WATERWAY IMPROVEMENTS (WATER TAXI)

Description: Additional water taxi stops at Anne Kolb Nature Center and Margaritaville.

Justification: Improved waterway circulation along ICW.

Complexity: Low

Importance: Intermediate

Priority: Intermediate

### PROJECT SELECTION:

5

## WATER TAXI

LEGEND:	
EXISTING WATER TAXI STOP	yellow dot
