LFIR # 1552

The Area Agency on Aging Broward County has identified a gap in dementia-related day care services in Southeastern Broward County. As such, the proposed Adult Day Care Center would serve patients experiencing Alzheimer's, dementia, Parkinson's, strokes, hearing/vision loss by ensuring a safe, caring, social environment that provides physical and cognitive stimulation for the participant and respite for the caregiver.

b. What activities and services will be provided to meet the intended purpose of these funds?

The Oak Lake Park Community Center will be retrofitted to create a safe environment for the Adult Day Care Program. Programming will be centered around a structured, safe, caring, social environment that provides physical and cognitive stimulation for the participant. Exercise is a daily activity, along with brain games and either music or art therapy. All potential participants are given a mini-mental test so that the staff is aware of their functioning level. This allows for the program to be more client centered.

c. What direct services will be provided to citizens by the appropriation project?

This 5 day a week Adult Day Care Program, licensed through AHCA, provides socialization, recreation, education, and lunch supervised by a nurse and staffed by trained individuals. Adult Day Care also provides respite for the caregivers. This prevents or postpones the need for costly placement.

d. Who is the target population served by this project? How many individuals are expected to be served?

Individuals with Alzheimer's and dementia related disease, including elderly individuals and those experiencing poor mental/physical health. The Center is expected to serve 25-50 individuals at a given time.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Clients are able to remain at home longer and are participating in brain stimulating activities and socialization in a structured, safe environment. In addition, caregivers are provided needed respite which allows them to continue their caregiving. Our goal is to encourage clients to participate in physical activities to assure that they don't become frailer. Each client is assessed using the 701B assessment upon intake and annually thereafter which tracks ADL's. By providing daily exercises, such as dancing, chair yoga, chair exercises and other activities, the client is able to maintain a level of flexibility. Each client is given an activity plan upon entry into the day care program and progress is tracked weekly. In addition, participation in cognitive exercises such as trivia and brain game activities as well as art and music therapy, supports cognitive function. Likewise, each client is given an activity plan and progress is tracked weekly.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Standard Contract Compliance penalties. Funding for deliverables not met will be returned to the State.
