Education Advisory Committee - Questions*

Teachers are facing unfair working conditions with more expectation and no pay raises in 7 years.
Teachers are being paid based on their evaluations plus student test scores for a pay raise, if scores are equal to highly effective

OPT out testing will ensure to help students with minimizing high stake testing as a measure to pay teachers salaries based on scores. Behavior issues in school and lack of Counselors in schools to have the time for small group therapy to meet the needs of the students.

Vision is to see more taxpayers & parents attend weekly meetings at the BROWARD school Board on Tues 11am- the address is : 600 SE 3rd Ave. Ft Lauderdale. Your voice makes a difference, Please attend June 21st for the last summer meeting. 11am- 5pm.

I recommend a one time a month face to face meeting and once a month phone conference for 45 min.

Importance is based on safety first. There are schools with MOLD and the district does not care to do anything but mask the smell. There are mold tests showing facts and school administrators don't care. Teachers are afraid to speak up in fear of retaliation.

Goals are accomplished one at a time when the result meets the needs of the student / school etc

Please answer these five questions above. 1. What are the current challenges facing education? 2. What is your vision for education in Hollywood? 3. What do you see as the primary work of the Education Advisory Committee? 4. With only one meeting a month, the Committee is limited in what it can do. How does/should the Committee decide what's most important? 5. How can the Committee know if its mission and goals are being accomplished?

Are you interested in serving on more than one board/committee?*

Yes

If so, how many?*

2

Applicant must attend at least one board/committee meeting prior to consideration of application for every board applied. Please list board/committee meetings you attended in the last year?*

0

Are you currently on a County or City Board?*

No

If yes, please describe

Education Advisory Committee - Questions*

1. There are many challenges facing public education in our area. To name a few there is, lack of funding, the struggle to keep students engaged, poor technology integration into learning approaches, and the unintentional neglect to students facing a mental disability.
2. I believe the education system in Hollywood should encourage students to better value their education. They should also teach non-traditional life skills such as applying for a job, buying/renting a first home, and how to manage a bank account and personal savings. Students should take part in more school sports and clubs as this can also teach them valuable life skills such as perseverance, determination, and how to work with a large group of people.
3. I see the primary work in the Education Advisory Committee is to make sure that students, teachers, and parents are all satisfied with the education system that they are associated with. By finding and solving problems that are persistent in classrooms and with faculty, everyone involved with the educational system will be satisfied.
4. The Committee can decide on which issues are important by preparing ideas in advance. At the meetings, then everyone can share what they think is important. Members can then vote or individually decide on which ideas the Committee should and will focus on. By preparing in advance, we can have more valuable ideas.
5. The Committee will know that it's goals are being accomplished by collecting feedback from schools. We can get students to fill out surveys on how they feel their education system is being handled. We can hold this survey at the beginning of the school year and at the end of the school year. If the students say that their school has improved of the year, then we know that the Committee's mission is being accomplished. We can also take data from standardized tests and Grade Point Average of the common student. If these numbers improve throughout the year then we know we are making progress.

Please answer these five questions above 1. What are the current challenges facing education? 2. What is your vision for education in Hollywood? 3. What do you see as the primary work of the Education Advisory Committee? 4. With only one meeting a month, the Committee is limited in what it can do. How does/should the Committee decide what's most important? 5. How can the Committee know if its mission and goals are being accomplished?

Are you interested in serving on more than one board/committee?*

Education Advisory Committee - Questions*

1. The major problems of education today are funding, bullying and social media. Schools need funding to update its technology and programming, and have resources that coincide with the curriculum. Another immense challenge to education is bullying. Both, cyberbullying and traditional bullying can take over ones life, and distracts them from learning, and even appearing in the classroom. Next, social media is yet another problem to the development of a students education. Social media distracts students and doesn't allow them to focus on what is important.
2. In a perfect world, I envision a state of the art facilities for the Hollywood public schools as well as an advanced caliber of education. I envision engaging activities which would motivate and drive the students to learn. Ideally the educational environment would be free of social and technological distractions. Finally, I envision the majority of the student body moving on to higher education.
3. The primary goal of the education advisory committee is to create an engaging learning environment, and improve the future of the students of Hollywood.
4. The committee must prioritize issues through debate, discussion, and polls.
5. The committee can know if its goals are being accomplished through performance measurements, surveys, graduation rates and test scores.

Please answer these five questions above. 1. What are the current challenges facing education? 2. What is your vision for education in Hollywood? 3. What do you see as the primary work of the Education Advisory Committee? 4. With only one meeting a month, the Committee is limited in what it can do. How does/should the Committee decide what's most important? 5. How can the Committee know if its mission and goals are being accomplished?
