Produced sulphuric acid is normally a clear and particle free product. Transportation and handling equipment (pumps, storage tanks, truck trailers, rail cars etc.) generate particulates that could be visible in the sulphuric acid. For process or applications that require particle free product, acid filtration equipment is recommended.

Yes, our BOL includes a certificate on analysis that is printed for each shipment. The COA includes the NSF certification stamp, concentration, specific gravity and iron.

Also on the BOL there will be the commodity information as well as loading information (ie: tank it loaded from, Net tons, driver info etc.)
