NOTICE TO ALL BIDDERS AND PROPOSERS

Cone of Silence

The City of Hollywood City Commission adopted Ordinance No. O-2007-05, which created Section 30.15(F) imposing a Cone of Silence for certain City purchases of goods and services.

The Cone of Silence refers to limits on communications held between vendors and vendor's representatives and City elected officials, management and staff during the period in which a Formal Solicitation is open.

The Ordinance does allow potential vendors or vendor's representatives to communicate with designated employees for the limited purpose of seeking clarification or additional information. The names and contact information of those employees that may be contacted for clarification or additional information are included in the solicitation.

The Cone of Silence does not prohibit a vendor or vendor's representative from communicating verbally, or in writing to the City Manager, the City Manager's designee, the City Attorney or the City Attorney's designee on those procurement items to be considered by the City Commission.

The Cone of Silence does not prohibit a vendor or vendor's representative from making public presentations at a duly noticed pre-bid conference or duly noticed evaluation committee meeting or from communicating with the City Commission during a duly noticed public meeting.

The Cone of Silence shall be imposed when a formal competitive solicitation has been issued and shall remain in effect until an award is made, a contract is approved, or the City Commission takes any other action which ends the solicitation.

12. **Safety Standards:** All manufactured items and fabricated assemblies shall comply with applicable requirements of Occupational Safety and Health Act and any standards thereunder.

No delivery shall become due or be acceptable without a written order by the City, unless otherwise provided in the contract. Such order will contain the quantity, time of delivery and other pertinent data. However, on items urgently required, the seller may be given telephone notice, to be confirmed by an order in writing.
14. **Contract Period (Open-End Contract):** The initial contract period shall start with the expiration date of the previous contract or date of award, whichever is latest, and shall terminate one (1) year from that date, unless otherwise stated within the specifications. The contractor will complete delivery, and the City will receive delivery on any orders mailed to the contractor prior to the date of expiration. The Director of Procurement Services may renew this contract subject to vendor acceptance, satisfactory performance and determination that renewal will be in the best interest of the City. Notification of Intent to Renew will be mailed sixty (60) to one-hundred fifty (150) calendar days in advance of expiration date of this contract. All prices, terms and conditions shall remain firm for the initial period of the contract and for any renewal period unless subject to price adjustment specified as a "special condition" hereto. In the event services are scheduled to end because of the expiration of this contract, the Contractor shall continue the service upon the request of the Director of Procurement Services. The extension period shall not extend for more than ninety

(90) days beyond the expiration date of the existing contract. The Contractor shall be compensated for the service at the rate in effect when this extension clause is invoked by the City.

15. **Fixed Contract Quantities:** Purchase order(s) for full quantities will be issued to successful bidder(s) after notification of award and receipt of all required documents. Fixed contract quantities up to twenty (20) percent of the originally specified quantities may be ordered prior to the expiration of one (1) year after the date of award, provided the contractor agrees to furnish such quantities at the same prices, terms and conditions.

 - B. **Payment from Contractor to Subcontractor and Materials Supplier:** When a contractor receives from the City of Hollywood any payment for contractual services, commodities, materials, supplies, or construction contracts, the contractor shall pay such moneys received to each Subcontractor and Material Supplier in proportion to the percentage of work completed by each Subcontractor and Material Supplier at the time of receipt. If the contractor receives less than full payment, then the contractor shall be required to disburse only the funds received on a pro rata basis with the Subcontractors and Material Suppliers, each receiving a prorated portion based on the amount due on the payment. If the contractor without reasonable cause fails to make payments required by this section to Subcontractors and Material Suppliers within fifteen (15) working days after the receipt by the contractor of full or partial payment, the contractor shall pay to the Subcontractors and Material Suppliers a penalty in the amount of one percent (1%) of the amount due, per month, from the expiration of the period allowed herein for payment. Such penalty shall be in addition to actual payments owed. Retainage is also subject to the prompt payment requirement and must be returned to the Subcontractor or Material Supplier whose work has been completed, even if the prime contract has not been completed. The Contractor shall include the above obligation in each subcontract it signs with a Subcontractor or Material Supplier.
17. **Manufacturer's Name and Approved Equivalents:** Manufacturer's names, trade names, brand names, information and/or catalog number listed in a specification are for information and establishment of quality level desired and are not intended to limit competition. The bidder should also explain in detail the reason(s) why and submit proof that the proposed equivalent will meet the specifications and not be considered an exception thereto. The City of Hollywood reserves the right to be the sole judge of what is equal and acceptable. Bids which do not comply with these requirements are subject to rejection. If Bidder fails to name a substitute it will be assumed that he is bidding on goods identical to bid standard, and he will be required to furnish such goods.
18. **Variations to Specifications:** Bidder must indicate any variance to our specifications, terms and/or conditions, no matter how slight. If variations are not stated in the Bid, it will be assumed that the product or service fully complies with our specifications, terms and/or conditions. The City will not interpret variances based on any attached sales or manufacturer's literature unless otherwise specified herein by the City.
19. **Interpretations:** Any questions concerning conditions and specifications shall be directed in writing to the Procurement Division. No interpretation(s) shall be considered binding unless provided to all Bidders in writing by the Director of the Procurement Services.
20. **Awards:** If a specific basis of award is not established in the invitation for Bid, the award shall be to the responsible bidder with the lowest responsive bid meeting the written specifications. As the best interest of the City may require, the right is reserved to make award(s) by individual commodities/services, group of commodities/services, all or none or any combination thereof. When a group is specified, all items within the group must be bid. A bidder desiring to bid "No Charge" on an item in a group must so indicate, otherwise the bid for the group will be construed as incomplete and may be rejected. However, if bidders do not bid all items within a group, the City reserves the right to award on an item by item basis. When a group bid is indicated for variable quantities and the bid for the group shows evidence of unbalanced bid prices, such bid may be rejected. The Director of Procurement Services, or the City Commission, whichever is applicable, reserves the right to waive technicalities and irregularities and to reject any or all bids, or any part of any bid. **The City also reserves the right to award any resulting agreement as it deems will best serve the interests of the City.**

If samples are required subsequent to the bid opening, they should be delivered within ten (10) calendar days of the request. The City will not be responsible for returning samples.

24. **Assignment:** Contractor shall not transfer or assign the performance required by this bid without the prior written consent of the Director of Procurement Services. G. LOCATION OF WORK:

1. There are ten (10) zones of work being advertised. Please see the attached pricing sheets for the itemized list. Pricing pages are to be awarded individually, in a group, or in whole, whichever is in the best interest of the City.
2. By submitting a bid, the Contractor acknowledges that he/she is familiar with the sites and the proposed scope of work, prior to submitting a bid. The City reserves the right to remove specific areas on a temporary or permanent basis, as may be required. This removal will reduce the invoice amount by the amount indicated for this specific location on the next invoice submitted for payment. City may add locations or delete locations whereby the cost of service shall be calculated based upon the indicated bid price for that zone. All City facilities, parks, and lots include the swale areas for maintenance.

It is the individual responsibility of each Contractor to visit the sites/areas on which you tender a Bid. Should you have further questions on site locations, please view the pricing pages. Bidders must attend the mandatory pre-bid conference in order to submit a bid and for clarification.

H. EQUIPMENT:

1. Contractor shall submit an inventory list of all equipment to be used for this work. City reserves the right to inspect and reject any or all equipment that will be used in the City. Bidder must demonstrate an adequate number of employees and equipment to satisfactorily perform landscape maintenance to the zones awarded, including, but not limited to cases of stolen/lost equipment, so that normal operations can continue as scheduled. All equipment shall be maintained in an efficient and safe operating condition while performing work under the contract. Equipment shall have proper safety devices maintained at all times while in use. If equipment does not contain proper safety devices and/or is being operated in an unsafe manner, the City shall direct the Contractor to remove such equipment and/or the operator until the deficiency is corrected to the satisfaction of the City of Hollywood. The Contractor shall be responsible and liable for injury to persons or damage to property caused by the operation of the equipment.

I. SCHEDULE

1. Contractor shall provide a monthly schedule of all services no later than the last week of the preceding month. Any deviations to the schedule must have prior approval by the City five days in advance. Service schedule shall be set by the Director of Public Works or his/her designee resulting in approximately twenty-three services annually.

The City reserves the right to adjust the frequency for any site or area for the life of the contract. The City will notify the contractor in writing or email of any frequency or schedule change a minimum of twenty-four (24) hours in advance.

Work in the Downtown area and the Beach area is subject to scheduling restrictions to accommodate the businesses. No work is to be done before 7:00 a.m. or after 11:30 a.m., as directed by the City's designee.

Most properties will be mowed once every 15 days for 23 service cuts per year. Other locations will be serviced at a different frequency as noted on the pricing pages.

J. SCOPE OF WORK:

1. Contractor shall maintain the contractually covered grassy and landscaped areas, at the frequency rate prescribed, with conventional production style mowing and lawn maintenance equipment.

2. Maintenance as defined for bid purposes shall include: Delittering, mowing, edging, hedge trimming, selective tree trimming up to a 10 foot clearance, raking, sweeping, weeding to maintain a weed free condition, weedeating, herbiciding and other related duties as outlined herein.
3. Upon arriving at a jobsite, the Contractor shall immediately survey the area to remove all litter, glass, rocks, dead foliage, metal, branches, palm fronds, cigarette butts and other debris from all areas of responsibility including any playgrounds, pavers, sidewalks, curblines, and catch basins. **Contractor shall haul and legally dispose of all such material at his own expense unless otherwise indicated herein.** All debris removed from the City shall be disposed of at an EPA and State of Florida approved dumping site at the contractor's expense.
4. **Mowing** shall be done to a height of three (3) inches unless otherwise specified by the Director of Public Works or his/her designee. All mowed areas are to be cut with a rotary type mower with sharp blades. Mowing patterns shall be changed frequently to avoid wear. Grass clippings left on site must be raked, bagged and removed so as not to leave evidence of clumps. Landscape lighting shall be wiped, blown off or vacuumed as needed to prevent accumulation of clippings and dead insects. When mowing medians or near sidewalks, grass clippings may not be blown into traffic lanes, storm drains, or pedestrian areas. When pedestrians are nearby, blowers shall be turned off until the pedestrian passes and the blower can then be turned on again.
Grass shall not be cut within fourteen (14) days of the previous cut unless approved by the City. Mowing shall not be done when weather conditions will result in damaged turf. Ruts caused by mowing when ground is too soft shall be repaired by the Contractor within 24 hours.
5. **Edging** shall be done along sidewalks, walkways, asphalt paths, and road edges with a gas-operated edger, not a weedeater, during each site visit. Grass shall also be edged where it encroaches upon the street from the swale or other areas back to the road edge so as to clearly and evenly expose the road edge markings. Turf will be mechanically edged around all tree rings in lawn areas and approximately ten inches out from the drip line of shrubs and hedges. Edged material shall be swept and collected for proper disposal. Edger must have a protective shield on at all times.
6. The contractor shall trim all hedges and shrubs during each site visit. Separation of various species shall be maintained as well as 24 inches of clearance of shrubs away from tree/palm rings. The Public Works Director or his/her designee shall determine the desirable maximum height of shrubs and hedges based on the location along a right-of-way or at a facility, and shall determine whether shrub groupings shall be maintained by selectively trimming or by shearing. Sheared hedges shall be trimmed to a uniform height and trimmed with a slightly wider width at the base to allow even sunlight penetration. Shrubs shall be selectively trimmed to achieve a natural appearance and to achieve maximum bloom. All shrubs shall be maintained four inches behind the curb and not allowed to extend past the back of the curb.

7. All plant material shall be trimmed to eliminate any possible sight obstructions for vehicular traffic. Trees shall be trimmed according to ANSI A300 Standards. Flush cuts and stub cuts are prohibited. Tree trimming will be required in areas where limbs can be reached from ground level and up to 10 feet high. Trees should be trimmed in a manner to allow pedestrian access, a minimum of ten (10) feet of clearance. The contractor shall be required to trim overgrowth where it obstructs or restricts the sight distance view of vehicles, e.g., limbs branching into the roadway from the median. All trees shall be trimmed of dead, dying, diseased branches and sucker growth. In playground areas, branches shall be trimmed to a minimum clearance of seven (7) feet from playground equipment. Dead and low hanging palm fronds extending to within ten (10) feet of ground shall be properly cut at the trunk and removed at each service interval. Contractor shall disinfect trimming equipment as per ANSI specifications. On trees known to be diseased, disinfect tools after each cut and between trees. The employee performing tree trimming must possess a Class B Tree Trimmer's license or better as required by Broward County..

Contractor shall also be responsible for removing limbs from the roadway during the maintenance operation that emanate from areas under contract. The contractor shall be alert to remove traffic hazards or unsafe conditions caused by tree limb obstruction during each site visit.

8. **Raking** of leaves shall be performed over all areas serviced to maintain a neat appearance and include fine-raking under all trees, shrubs, planter beds, landscape areas and open grassy areas where leaves accumulate. Pathways, sidewalks, and curb areas shall be blown clean or swept prior to leaving the site.
9. **Weed control** shall be done to maintain a weed free condition. All turf, planting beds and tree rings shall be maintained in a weed free condition. Weeding shall include but not be limited to ornamental beds, tree rings, base of shrubbery, hedges, sidewalks, curblines, fence lines, sidewalk cracks, playgrounds, irrigation equipment fenced enclosure areas, or any other areas where weeds exist. Weeds shall be manually pulled when necessary during each site visit to prevent an unsightly appearance caused by their presence. The use of herbicides must be approved by the Director of Public Works or his/her designee. The use of a dye is required to clearly indicate where spraying has occurred. Dye is not to be used on concrete medians, sidewalks, or pavers. Herbicides shall only be used to control new growth of weeds no more than two (2) inches in height. The contractor shall manually pull all visible weeds taller than two (2) inches; herbicides are not to be used as a continual maintenance service. All applications shall be performed by persons holding a valid herbicide application license as issued by the State of Florida and shall be done in accordance with the herbicide manufacturer's recommended rates and all applicable Federal, State, County and Municipal regulations. Each applicator must be licensed and may not supervise other applicators. Herbicides may be used only with prior approval by the City's designee as to type, location and method of application. The Contractor shall exercise extreme care so as not to overspray and affect areas not intended for treatment. Areas adversely affected by such overspray shall be restored at the Contractor's expense. The contractor shall be responsible for replacing

all damaged foliage caused by the use of herbicides at no cost to the City. **The Florida Certified Pesticide Applicator license holder MUST be the applicator of pesticides or herbicides. Acceptable licenses are the Department of Agriculture and Consumer Services Florida Limited Commercial Maintenance License Certification or the Bureau of Entomology and Pest Control Commercial Landscape Maintenance license.**

~~Florida Department of Environmental Protection will be requiring Best Management Practice Certification for fertilizer application in 2014. Contractor must be in compliance with this FDEP certification when required.~~

10. **Weed eating** shall be done around all fixed objects exposed in the turf to include but not limited to irrigation heads, trees, poles/posts, or other fixtures commonly found in such settings. Weed eating shall be done with string trimmer. When using a string trimmer, weed eating shall be done so that tree trunks are not damaged. Any damage to tree trunks will be cause for Contractor to replace the tree. Weedeating should leave grass at the same height as the mowed, adjacent turf. Trimmings from weedeating must be removed.
11. All grass clippings, vegetative trimmings and overburden existing on or derived from the operation shall be blown from street and walk areas on the day the maintenance is performed, and if necessary to maintain a superior appearance shall be bagged and removed from the site. Debris is not to be blown into the street or onto a pedestrian pathway. The contractor shall at their own expense, remove and properly dispose of all waste, materials, i.e., cans, bottles, paper, resulting from the operation. Where recycling containers are present on site, contractor shall deposit aluminum cans and glass into appropriate containers.
12. Evidence of turf insects shall be brought to the attention of the Director of Public Works or his/her designee. The City may ask the contractor to apply chemicals to control and/or kill pests as needed. Quick kill ant bait shall be supplied by the Contractor and applied at every service as needed. The Contractor shall maintain an approved pesticide license for the duration of this contract. The use of chemicals must be approved by the Director of Public Works or his/her designee.
13. The contractor shall be responsible for notifying the Director of Public Works or her designee of any sprinkler system malfunctions, as evidenced through brown patches, broken parts, missing heads, or washed out areas.
14. The contractor shall inform the City's designee of any immediate safety hazards or vandalism (including graffiti or theft of plant material) upon discovery in the field. The Contractor shall contact the City's designee to supply barricades where hazards exist to safeguard the area until the City can correct the situation. The contractor shall fill any holes found constituting a hazard.
15. The Contractor shall notify the Director of Public Works or his/her designee, regarding all plant materials damaged by weather or traffic accidents.

16. The Contractor shall respond to all City emergency calls within twenty-four (24) hours after being notified. During emergencies declared as natural disasters, the Contractor must respond within eight (8) hours after being notified by the City.
17. The Contractor will give the City an hourly labor rate for his/her Bid locations for additional services. The City reserves the right to seek other sources for the provision of these services.

Contractor shall mix and apply the chemicals in accordance with the manufacturer's recommendations. The use of a dye is required to clearly indicate where spraying has occurred. Dye is not to be used on concrete medians, sidewalks, or pavers. All work involving the use of chemicals shall be in compliance with all federal, state, and local laws and shall be accomplished by a Florida Certified Pesticide Applicator. A current Florida Certified Pesticide Applicator License copy must be submitted to the City with your bid response. The minimum license required is the Florida Limited Commercial Maintenance license.
