Historic Preservation Board - Questions*

1. I have served on the Historic Preservation Board for about 4 years and have been an active and vocal member of this board.

2. My design background has been very helpful in showing why some projects that come across the board work or don't work. I have not been someone that has blocked or supported any project based on personal feelings, but rather, I have leaned on my design skills and knowledge, as well as technical and common sense perspectives in arguing my points to the rest of the board.

3. As a long time resident I understand the need for growth and fully support it. I also understand that our historic properties are the DNA of our city so careful attention needs to be paid to preserving the elements that define our city and character. I support growth, but with careful attention to protecting our character and heritage. As far as historic cities are concerned, Hollywood is not a very old city at all, but what we have is what we have, and once that's gone our past will be relegated to historic books only. Common sense development is the way forward in my opinion.

4. The balance of historic architecture with modern styles starts with historic architecture. Modern styles are welcome but they must always take into consideration the location on which they are built and how they relate to the older homes. This is a basic principle of architectural design. The best designs play off each other. A perfect example is the Louvre Museum. The glass pyramid in front of the old Louvre Museum building and the contrast and dynamic they create, modern vs. historic, and how by the existence of each, the other is enhanced. Those are the principles I look at when someone brings a project to the board.

5. What I like about the City's different historic districts are the stories that they hold. The things that have happened over time and how we are still able to stand in some of those locations and envision the events that took place while looking at the buildings that s

Please answer these five questions above. 1. How have you prepared yourself to serve on the Historic Preservation Board? 2. Explain how your personal and/or professional experiences will contribute to the meeting the goal(s) of the Board or City. * Personal experiences, * Professional experiences. 3. What is your perspective on balancing growth of the City's tax base, within the Historic Districts, while maintaining neighborhood stabilization? 4. How would you balance historic architecture with modern architectural styles? 5. What do you like about the City's different Historic Districts?

Which of the following disciplines are you most passionate? * Property Management, * Rental Housing Affordability, * Housing Market Stability, * New Housing Construction, * Fair Housing. 4. What other relevant organizations, clubs, or associations were you previously, and/or currently are involved in? 6. How does parks, recreation and cultural arts contribute to quality of life?

Planning & Development Board - Questions*

1. I have sat on the Historic Preservation board for around 4 years. Most of the projects that have come across our board are new single family residential or multi family residential buildings. I have extensive experience in design and have been very helpful in guiding designs that have come across that board so that they work better in the project location. I have a good eye for design and am very good with design solutions, both in architecture as in interior design. I am a designer with an almost 40 year design career.

2. Again, I have extensive experience in design and have been very helpful in guiding designs that have come across that board so that they work better in the project location. I have a good eye for design and am very good with design solutions, both in architecture as in interior design. I am a designer with an almost 40 year design career.

3. I believe in a common sense approach to balancing growth of the city's tax base while maintaining neighborhood stabilization. Again, principles of good design are that the immediate surroundings have to be taken into consideration when designing a building. Design is the key. One shouldn't blindly design a building for a particular lot without walking that street and looking at how this design will relate to the existing surrounding buildings. It is a design problem with a design solution and it falls squarely on the architect to work this out successfully.

4. I love the new residential buildings in the downtown area and Dixie Hwy. I love what these have done to our city. We have to be careful to not overdo it however, because that risks erasing the character of our downtown and surrounding areas.

5. The comprehensive plan is the City's plan for growth going forward.
