Aventura, FL

Turnberry and Associates c/o Plaza Construction (construction manager)

Contract \$297,339.00

Contact: Krys Gouverneur, 786-475-1439

Structural separation of the existing food court area from mall to allow for new addition. Selectively remove existing structural members without disturbing recently constructed weather wall and existing structure to remain. All structural members had to be hand separated and removed with large machinery one joist/ beam at a time while the mall continued its daily operations. The existing mall operations were not interrupted at any time during the phase one demolition. The project required day and night shift crews to perform the work within budget and on schedule. This is a two-phase project with the second phase being performed late summer of 2016.

Project substantially complete April 2017

**Dania Pointe (Boomers) Demolition**

Dania Beach, FL  
Hoar Construction

Contract \$811,417.00

Contact: Brandon Smith, 407-244-8965

This project consisted of many different demolition activities being performed simultaneously to maintain a very aggressive schedule. AlliedBean Demolition committed to utilizing a multitude of men, equipment and resources to perform this project within the allotted time frame.

Specialized high reach equipment was used to safely dismantle the large wooden rollercoaster consisting of approximately 1.6 million board feet of treated wood and heights of 110 feet above the ground. The means and methods of safely demolishing the rollercoaster were engineered and put into action by many of AlliedBean's highly experienced team. The structure was brought down without any incidents despite its close proximity to the very active I-95 expressway. All wood was manifested and brought to a Class-A landfill in north Florida.

Many concrete structures were demolished and safely brought down to the ground, totaling approximately 100,000 square feet. The materials generated by the demolition were separated and all concrete was crushed on site to be used for road base.

The removal and demolition of the existing mini golf course posed many challenges due to the artificial lakes and streams that surrounded the course. Controlled access areas were put in place and monitored until all demolition was completed. All concrete was transported using company owned articulated dump trucks to staging area. The concrete generated was crushed and used on site for road base and fill.
