Good afternoon,

For T-Mobile Cyber insurance is not applicable.

Attached find COI for approval.

Thank you,

Subject: FW: questions regarding COIs

1. Cyber is only needed if there is a risk for data breach. If you feel this is not applicable to cellular service, then it will not be required.
2. Question #2 should be directed to Procurement. Please include risk on their reply.

Subject: questions regarding COIs

Folks, had a couple more questions regarding the COIs:

1. Are there criteria as far as what companies or services need cyber insurance? I guess we are trying to understand why cellular service providers need cyber insurance.
2. Most of our purchases are done via piggyback contracts. If the contracts we piggyback already have insurance requirements, are the vendors required to provide us additional insurance upon request or are we bound by the insurance terms provided in the contract and if they are not acceptable, then we cannot use that contract?

Let me know if this is better discussed as a meeting and we can set something up.

Thanks

Steven Viscardi
