PROJECT NARRATIVE

1. Federal Financial Assistance Funding Opportunity Number: 21-DG-11083112-001-A	2. Amount of funds requested for this project: 59-6000338
3. Subrecipient Legal Name: City of Hollywood	
Please note section XII Public Records in the Notice of Federal Financial Assistance Funding Opportunity before including any proprietary or confidential information.	
<p>Project Narrative:</p> <p>The City of Hollywood has been a Tree City USA for the last 41 years. The densely populated urban community has incorporated improving its urban forest into its capital improvement plan and provides an on-staff Urban Forestry Supervisor to manage both installation and maintenance projects. With five full-time personnel the Urban Forestry Division of the Public Works Department implements the Urban Forestry Program, which includes various aspects of tree and palm maintenance including tree trimming and pruning, hazardous tree removal, and tree relocations. Urban Forestry ensures clearance is provided over rights-of-way and sidewalks. Staff oversees and administers the City's contract for tree trimming to provide adequate and timely service. Functions of this program are performed by both in-house staff and contractual services.</p> <p>Over the last several years the City has increased its focus on not only protecting but expanding its urban forest. A tree fund was established that provides funding each year as part of the capital improvement program to replace, install, and protect existing canopies. This dedicated funding source ensures that the City's tree management efforts will continue each year and not be subject to budgetary decisions made during the annual budget process. The revenue for the Tree fund comes from fees paid by property owners who cannot meet the tree planting mitigation requirement. The City collects \$325 per tree through this program. While the City traditionally uses the funding to plant trees as projects are implemented, the need for comprehensive tree inventory has driven the request for federal financial assistance to enhance the City's efforts.</p>

3. Subrecipient Legal Name: City of Hollywood	
Please note section XII Public Records in the Notice of Federal Financial Assistance Funding Opportunity before including any proprietary or confidential information.	
<p>Project Narrative: Continued...</p> <p>Using funds from the Tree Fund, the City will engage an experienced consultant to complete a city-wide tree inventory. The inventory will identify and collect data on every tree located on City-owned or managed property. These sites will include parks, common areas, rights-of-way, and facilities such as community centers. The City has 70 parks and open spaces along with miles of roadway and dozens of community facilities such as City Hall. The project will provide GIS mapping, species classification, size, and condition info. Once complete, the public will have access to the information and be able to view the maps to better understand the significant role the urban forest plays in everyday life. The grant funding will allow the City to develop a comprehensive data and mapping tool that will serve as the foundation for the long-term success of the community forestry program.</p> <p>The objectives of the project consist of the following:</p> <ul style="list-style-type: none">• Develop data on all trees located within City-managed properties• Increase awareness of the urban forest through education and access to data• Improve knowledge of tree management and care through education• Utilize designated tree funds in the most cost-effective manner• Be better prepared for post-disaster recovery and mitigation funding <p>The City is requesting \$30,000 to assist with the development of the inventory. The City will provide a cash match of \$30,000. The match will come from a dedicated fund required to be used for tree-related activities. The fund receives approximately \$35,000 each year.</p>

Hurricane Resilient Trees

Building Hurricane Resilience into our Tree Canopy

Every major storm gives us an opportunity to assess where improvements must be made so that we fare better in the next one. One major impact the City of Hollywood saw from Hurricane Irma (2017) was a loss of tree canopy.

Creating tree canopy that will weather future storms is beneficial to our economies, quality of life, and environment. Fallen trees and branches result in power outages, physical hazards, and debris. Tree loss opens canopy and results in a loss of the benefit of that canopy including energy use reduction, property value benefits, neighborhood safety, stormwater management, air and water quality, and wildlife habitat.

The Urban Heat Island Effect is a concern in cities whose temperatures will rise in the future faster than the average global rate. Tree canopy is an effective and cost efficient way of mitigating the Urban Heat Island. When we lose tree canopy, we lose that mitigation benefit.

Resources for restoring or replacing tree canopy and landscaping:

UF|IFAS

The University of Florida (UF) Institute of Food and Agricultural Sciences (IFAS) has great and comprehensive resources for recovering and restoring your trees after a hurricane.

Learn, among other things:

[Restoring your trees:](#)

- How to straighten a young tree that fell during a storm
- How to safely remove damaged branches
- Trees that look dead or damaged after a storm may still recover. Learn how much time your trees will need to recover and how to prune and care for them while they do

[Manage trees for future wind resistance:](#)

- How to prune your trees to prevent wind damage in future storms

[Design new plantings for wind resistance:](#)

- Right tree, right place.
 - Plant trees under powerlines with mature heights shorter than the lines
 - avoid utilities by calling 811 before you dig
- How to design your planting to maximize wind resistance
 - trees planted together are more resistant than those alone
- How to choose species that are naturally more wind resistant
 - Native trees perform better than non-native

[What species to plant for hurricane resistance:](#)

- Suggestions based on performance in past storms. Stay tuned for lessons learned from Irma.

Native Plants and Wildlife Habitat

Take advantage of the opportunity to restore your landscape to improve it! Plants native to coastal South Florida are adapted to high wind conditions and are better able to survive and recover after a hurricane than non-native plants. Using native plants reduces costs associated with watering and fertilizing. Native landscapes require less maintenance, saving you time! Native landscapes also provide environmental benefits by improving stormwater quality, reducing water pollution, and providing habitat for birds, butterflies, and other desirable wildlife.

- The [Florida Native Plant Society Broward Chapter](#) is an excellent resource to learn about plants native to Broward County and where to find them.
- The Institute for Regional Conservation's [Natives for Your Neighborhood](#) will provide you with a comprehensive data base of Florida native plants, searchable by zip code, including links to nurseries which carry them, butterflies that use them, and gardening tips.
- [NatureScape Broward](#) is your one stop shop for all things wildlife and Florida Friendly.
- The UF/IFAS [Florida Friendly Landscaping](#) Program will help you design your yard to maximize water conservation and utilize sustainable gardening practices.

The City of Hollywood is a Certified Community Wildlife Habitat through the National Wildlife Federation. Help us maintain our standing by certifying your yard today!

[Certify here!](#)

Your yard will need:

1. Food (can be plants with fruits, butterfly nectar plants, feeders, etc.)
2. Water (bird bath, pond, rain garden, canal, pool, ocean, etc.)
3. Cover (bushes and other dense vegetation)
4. Place to raise young (mature trees, shrubs, butterfly host plants, nest boxes, etc.)

How do street trees translate to dollar value? See below to find out.

What is the value of street trees?

Economic

- Increase property values
- Reduce energy and water bills
- Absorb storm water to reduce flooding

Social

- Reduce driver speeds
- Improve safety
- Encourage walking
- Improve health and wellbeing of residents
- Improve neighborhood aesthetics

Environmental

- Enhance ecosystems and benefit wildlife
- Absorb storm water
- Reduce ambient temperature
- Improve air quality
- Absorb carbon

How can I learn the value of my trees?

You can measure the value of your own trees using the very simple tool at the [National Tree Benefit Calculator](#). It's easy!

- Step 1: Identify your tree species.
- Step 2: Measure the diameter at 4.5 feet above ground. To get diameter, take a regular measuring tape and measure around the trunk (circumference) and divide by 3.14 (π)
- Step 3: Answer a basic question about the tree's location.

The National Tree Benefit Calculator will then give you an annual dollar value of benefits provided by your tree broken down by property value improvements, stormwater management, energy savings, air quality improvements, and CO₂ benefits.

How do I choose a tree to maximize value?

If you want to plan your tree planting in order to maximize the value and benefits of your trees, don't fret! There is a tool for that.

In the iTree suite of tools, used to measure the value
