SHOW SAFETY & SECURITY PLAN

The fireworks and equipment will arrive at the shoot site the day of the display. Everyone on the pyrotechnic crew has been trained on safety and security awareness. The fireworks are never left unattended.

J & M has a transportation security plan as mandated by the Department of Transportation (DOT). This plan cannot be disclosed according to Federal regulations. J & M Displays abides by all Federal DOT rules and regulations including packaging, shipping, cargo securement, and security.

J & M Displays adheres to NFPA 1123 Code for Fireworks Displays. NFPA approved fire extinguishers are standard equipment at all displays.

During the show, crewmembers will assist in guarding the perimeter to make sure that no one is allowed in the fallout zone during the display. Security is maintained around the perimeter until it is determined safe.

One crewmember will be designated as the "spotter". The spotter observes the fireworks display as it is launched watching for any shells that may come back to the ground unexploded, possible ground fires, etc.

Following the display, the fallout zone is thoroughly checked for the possibility of any live fireworks and/or hot debris. The next morning the site is again checked.
