GENERAL APPLICATION

Tel: (954) 921-3471 Fax: (954) 921-3347

This application must be completed in full and submitted with all documents to be placed on a Board or Committee's agenda.

The applicant is responsible for obtaining the appropriate checklist for each type of application.

Applicant(s) or their authorized legal agent must be present at all Board or Committee meetings.

At least one set of the submitted plans for each application must be signed and sealed (i.e. Architect or Engineer).

Documents and forms can be accessed on the City's website at

http://www.hollywoodfl.org/Do cumentCenter/Home/View/21

GENERAL APPLICATION

CERTIFICATION OF COMPLIANCE WITH APPLICABLE REGULATIONS

The applicant/owner(s) signature certifies that he/she has been made aware of the criteria, regulations and guidelines applicable to the request. This information can be obtained in Room 315 of City Hall or on our website at www.hollywoodfl.org. The owner(s) further certifies that when required by applicable law, including but not limited to the City's Zoning and Land Development Regulations, they will post the site with a sign provided by the Office of Planning and Development Services. The owner(s) will photograph the sign the day of posting and submit photographs to the Office of Planning and Development Services as required by applicable law. Failure to post the sign will result in violation of State and Municipal Notification Requirements and Laws.

(I)(We) certify that (I) (we) understand and will comply with the provisions and regulations of the City's Zoning and Land Development Regulations, Design Guidelines, Design Guidelines for Historic Properties and City's Comprehensive Plan as they apply to this project. (I)(We) further certify that the above statements and drawings made on any paper or plans submitted herewith are true to the best of (my)(our) knowledge. (I)(We) understand that the application and attachments become part of the official public records of the City and are not returnable.

Re: Mawusi Khadija Watson, Planning Administrator, mwatson@hollywoodfl.org, 954-921-3471 **File Number: 23-DP-03**

All,

Please find enclosed the response letter to address the comments provided on 03/15/23 regarding the New Hollywood Police Headquarters.

Responses from the Design Team have been provided in blue as part of the Final TAC Sign-off submittal.

A. <u>APPLICATION SUBMITTAL</u>

Mawusi Khadija Watson, Planning Administrator (<u>mwatson@hollywoodfl.orq</u>) 954-921-3471

1. Folio numbers 2 and 3 on the General Application Form are incorrect and should be revised.

We will continue working with the planning staff to revise the General application accordingly.

2. Continue working with planning staff with respect to the Comprehensive Plan Amendment.

Acknowledge. We will continue working with the planning staff concerning the Comprehensive Plan Amendment.

3. Provide written responses to all comments TAC sign-off. Written responses to all comments have been provided.

B. ZONING

Mawusi Khadija Watson, Planning Administrator (<u>mwatson@hollywoodfl.org</u>) 954-921-3471

- Dimension the state of the stat
- 2. The setback to the main building from the west property line should be measured to the face of the building. Update the site data to be consistent with the site plan.

 The setbacks dimensions from the Main Building and Parking garage have been provided.
- 3. Include the height for the radio tower in the site data on Sheet A-050. The height for the radio tower in the site data on Sheet A-050 has been provided.
- 4. Identify the setback to the east and north property line on the site plan and in the site data for the proposed radio tower.

The Zoning data and the Site Plan have been updated to include the setbacks to the east

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

and North Property Lines.

- 5. Updated the parking data to include a row for the total number of provided spaces for the entire property with the future parking level (377).
 - The Parking data has been updated to include the 377 total parking.
- 6. Ensure the number of parking spaces on each level of the parking garage on the floor plans matches the number of parking spaces for each level of the parking garage in the site data on Sheet A-050 and project diagrams on Sheet A-055.
 - The Sheets A-050 & A-055 have been revised to match the number of parking on every floor.
- 7. The site plan labels 78 surface parking spaces yet the site data states 82 surface spaces are provided. Revise for consistency.
 - The Sheets A-050 & A-055 have been revised to show the 82 Parking spaces.
- Consider providing additional landscape buffering and plantings along the east boundary to buffer the height of the parking garage from the nearby single-family development.
 - Additional buffering and plantings have been considered.
- 9. Work with the City Landscape Architect to ensure all relevant landscape regulations are satisfied.
 - Acknowledged, we will continue working with the City's Landscape Architect. Renderings are an artistic representation of the design. The meeting was held on 03/16/23.

c. ARCHITECTURE AND URBAN DESIGN

Mawusi Khadija Watson, Planning Administrator (<u>mwatson@hollywoodfl.org</u>) 954-921-3471

- 1. Identify the location of any rooftop equipment on the roof plan, including screening for such equipment.
 - The location of any rooftop equipment on the roof plan has been identified and shown on A-105.
- 2. If canopies or structures are proposed over any surface-level parking spaces, provide detail for the canopy/structure and label the location on the site plan.
 - Details for the canopy/structure and label of the location on the site plan have been provided. Refer to New added Enlarged Sheet A-500.

D. SIGNAGE

Mawusi Khadija Watson, Planning Administrator (<u>mwatson@hollywoodfl.org</u>) 954-921-3471

 Application is substantially compliant. Acknowledged.

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

E. LIGHTING

Mawusi Khadija Watson, Planning Administrator (mwatson@hollywoodfl.org) 954-921-3471

 Application is substantially compliant. Acknowledged.

F. GREEN BUILDING & ENVIRONMENTAL SUSTAINABILITY

Mawusi Khadija Watson, Planning Administrator (<u>mwatson@hollywoodfl.orq</u>) 954-921-3471

 Application is substantially compliant. Applicant advises it is pursuing LEED Silver certification.

Acknowledged.

G. **ENGINEERING**

Azita Behmardi, City Engineer (<u>abehmardi@hollywoodfl.org</u>)
954-921-3251 Clarissa Ip, Assistant City Engineer
(<u>cip@hollywoodfl.org</u>) 954-921-3915
Rick Mitinger_Transportation Engineer (<u>rmitinger@hollywoodfl.org</u>) 954-921-3990

1. **New Comment: See attached Memorandum from Engineering dated March 1, 2023.

Refer to the responses in the Attached Engineering Memorandum.

H. LANDSCAPING

Favio Perez, Landscape Reviewer (fperez@hollywoodfl.org) 954-921-3900

**New comments below:

1. Show all trees on-site to scale. The tree legend must include the tree number, common name, botanical name, DBH, overall height, spread, condition, and disposition (to remain, to be relocated, to be removed).

All trees on site are shown to scale, and all existing tree info is added on sheet TS-010.

2. Mitigation: Palm mitigation is 1:1. The following palm species should be used for mitigation or code: Royal Palm, Phoenix sylvestris/Medjool/canariensis, Bismarkia, Foxtail palm and Coconut palm. Minimum height requirements for all palms at planting is 8' of CT. Tree mitigation is inch per inch of dbh, replace with a 12' ht, 2" dbh mitigation tree from the approved city list.

All trees on site are shown to scale, and all existing tree info was added on sheet TS-010.

3. Add a note: All landscaping shall be warranted for 1 year after the final inspection. Note added on sheet L401.

Wednesday, March 22nd, 2023

City of Hollywood Technical Advisory Committee

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

4. Add a note: No landscape substitutions shall be made without the City of Hollywood's approval.

Note added on sheet L401.

- Above-ground equipment: Where required for screening purposes, a hedge shall be
 planted at equipment height for visual screening.
 Hedge was added around the trash area, other equipment does not have a screening
 hedge per Police Department security requirements.
- 6. Revise tree schedule, required trees shall have a minimum of 2" DBH, remove cal. size. The tree schedule revised per comments.
- 7. Provide sight triangles on plans at the intersection of the driveway and property line Sec. 155.12 (d).

The sight triangles were added to landscape plans.

We encourage you to reach out for any questions or clarification at fperez@hollywoodfl.org or 954-921-3900.
 Acknowledged. The meeting was held on 03/16/23.

i. UTILITIES

Alicia Verea-Feria, Engineer (averea-feria@hollywoodfl.org) 954-921-3302

- Survey Shall Note all elevations reference NAVD88 Noted. A revised survey has been provided in the Final TAC Submission. *****COMMENT ADDRESSED***** Noted. No Action is required.
- Survey Shall Identify FEMA Flood Zone Information including zone delineation Noted. A
 revised survey has been provided in the Final TAC Submission. *****COMMENT
 ADDRESSED*****

Noted. No Action is required.

Show Water and Sewer demand calculations on proposed utility plans. Noted.
 Calculations have been provided in the Final TAC Submission. *****COMMENT NOT ADDRESSED. PLEASE SPECIFY WHICH SHEET AND WHERE THE DEMANDS ARE NOTED. *****

Water and Sewer Demand calculations have been provided with the Final TAC submittal. Refer to Water and Sewer Plan. Refer to sheet C500.

4. Include the City's latest applicable standard water and sewer details. The details are available on the City's website via the following link: http://www.hollywoodfl.org/1169/Standard-Details-and-Public-Notices Noted. Standard Water and Sewer Details have been provided in the Final TAC submission.

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

*****COMMENT ADDRESSED*****

Noted. No Action is required.

- 5. This site resides currently within FEMA Flood Zone X and AH with BFE = 6' NAVD88. The proposed FFE = 9' NAVD88 and is acceptable. It has been provided. See Sheet C-003 Civil Site Plan *****COMMENT ADDRESSED*****
 Noted. No Action is required.
- Indicate FFE for all enclosed areas on the ground floor. It has been provided. See Sheet C-003 Civil Site Plan *****COMMENT ADDRESSED***** Noted. No Action required.
- Provide perimeter cross-sections across all property limits including transition areas meeting adjacent property grades.

*****COMMENT PARTIALLY ADDRESSED. SHOW EXISTING ELEVATIONS AND SPECIFY MATCHING EXISTING GRADES AT PROPERTY LIMITS****

Perimeter cross-sections have been provided with the Final TAC submittal. Refer to updated plans. Refer to sheet C302.

- 8. Ensure all stormwater is retained onsite. The stormwater for the New Police Headquarters project will be retained within the overall Orangebrook Golf Course boundaries, all of which is property owned by the City of Hollywood. The stormwater from the project will be pre-treated in a swale to the east of the site boundary, then retained within the overall golf course to the south of the project site boundary. The areas used for stormwater retention are currently "open space" and will remain so, whereas the building site is being converted from "open space" to use for a government facility; the site boundaries have been set to provide this delineation. The overall Orangebrook Golf Course site is all government-use property and owned by the City in perpetuity. Stormwater calculations have been provided as part of the Final TAC submittal. *****COMMENT ADDRESSED******

 Noted. No Action is required.
- 9. Note how roof drainage will be collected and connected to the on-site drainage system Noted. It has been provided in the Final TAC submission *****COMMENT NOT ADDRESSED. PLEASE SPECIFY ON WHICH SHEET THIS IS NOTED*****
 Rainwater leader connections to the drainage system have been provided with the Final TAC submittal. Refer to the Drainage Plan. Refer to Sheet C400.
- 10. Provided preliminary drainage calculations Noted. It has been provided in the Final TAC Submission.

*****COMMENT SUBSTANTIALLY ADDRESSED. FOR TAC SIGN-OFF, SUBMIT CALCULATIONS REFERRING

TO BROWARD COUNTY FUTURE CONDITIONS 100-YEAR MAP via the following link: https://bcgis.maps.arcgis.com/apps/webappviewer/index.html?id=ec160b81e7f84bdeacda

Wednesday, March 22nd, 2023

City of Hollywood Technical Advisory Committee

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

62575e8173 80*****

Calculations have been updated to show Broward County Future conditions.

11. Permit approval from outside agencies will be required.

Noted. It will be addressed during the permit process.

12. Landscape plans shall coordinate with the civil plans to accommodate drainage features.

Noted. Civil and Landscape drawings were coordinated in the Final TAC Submission.

13. Additional comments may follow upon further review of requested items. Noted.

NEW COMMENTS:

- Radio tower plans shall be revised to have all elevations reference NAVD 1988, not NGVD 1929.
- 2. Sheet C500 call out the sizes of the taps along the existing 6" wm to be labeled. Tap size callouts have been added as requested, refer to updated plans.
- Sheet C500 call out 4" water meter.
 Meter callout added as requested, refer to updated plans.
- 4. Sheet C500 meters and backflow preventers shall be located as close to the property line as possible.

Meter and backflow preventers have been relocated as requested, refer to updated plans.

- 5. Sheet C300 may into table of atomic to the structure (nines and intests, manholes, inlets, headwalls, etc.) Specifying size, material, lengths, rim and invert elevations. Summary of Structures has been provided, refer to updated plans.
- 6. Sheet C410 call out existing 12" pvc reclaim water main along median (not ss) and existing stormwater.

Existing utilities have been labeled as requested, refer to updated plans.

CITY OF HOLLYWOOD, FLORIDA INTEROFFICE MEMORANDUM POLICE DEPARTMENT

DATE: March 1, 2023 / Responses: 03/22/22

TO: Mawusi Watson

The Division of Planning and Urban Design

FROM: Doreen Avitabile #2470

Crime Prevention Specialist

SUBJECT: CPTED Blueprint Review/Recommendations – A/E Responses

ISSUE:

Crime Prevention Through Environmental Design Blueprint Review/Recommendations.

EXPLANATION:

The following recommendations were developed during the Crime Prevention Through Environmental Design review of the blueprints for <u>"New Hollywood Police Headquarters, Hollywood, FL - Final".</u> Recommendations requested by and forwarded to Mawusi Watson, The Division of Planning and Urban Design upon completion.

***Note: Application is substantially compliant

<u>Note</u>: Blueprint Crime Prevention Observations/Recommendations per ACPI (American Crime Prevention Institute) reference the addressed premises.

CPTED Strategies

Provide clear border definition of controlled spaces. Examples of border definition may include buildings, fences, pavement treatment, landscaping, signs, lighting, to express ownership and define public, semi-public, and private space, natural territorial reinforcement occurs. Also, clearly mark the public paths, so it will make private areas harder for non-employees to access.

External Lighting

Parking lots, vehicle roadways, pedestrian walkways and building entryways should have "adequate" levels of illumination. The American Crime Prevention Institute recommends the following levels of external illumination:

-Parking Lots 3-5 foot candles -Walking Surfaces 3 foot candles -Recreational Areas 2-3 foot candles -Building Entryways 5 foot candles

OCI Response: Illumination of the parking lots, walking surfaces and building entries will be designed with the "average" foot candles as shown here. Local restrictions in glare and property lines spillage will be in affect and must be taken into consideration.

 These levels may be subject to reduction in specific circumstances where after hours use is restricted. OCI Response: Sensors will be designed to reduce the light levels after midnight and back to 100% when occupancy is detected.

Fully illuminate the exterior of the building and grounds at night.

OCI Response: Building perimeter lighting will be designed to illuminate the outside of the building all the way to the ground.

Fully illuminate all parking areas and driving lanes in parking garage.

OCI Response: Parking garage will be completely illuminated per code.

A system of lighting fixture identification should be developed.

OCI Response: Fixtures can be numbered in design.

 The lighting fixture identification system should enable anyone to easily report a malfunctioning fixture.

OCI Response: See response above.

Exterior lighting should be controlled by automatic devices (preferably by photocell).

OCI Response: Lighting control panels will be designed to control all exterior and parking garage lighting.

 Exterior lighting fixture lenses should be fabricated from polycarbonate, break-resistant materials.

OCI Response: Will Comply.

 Plant materials, particularly tree foliage, should not interfere with or obscure exterior lighting.

HOK LA Response: Will comply.

 If exterior lights are not being used at night, exterior motion-detection lighting should be installed to detect the presence of intruders.

OCI Response: Parking garage and parking lot lighting will have sensors.

 Lighting should be uniformly spread to reduce contrast between shadows and illuminated areas.

OCI Response: A maximum of 12:1 ratio or better will be maintained in design.

 Lighting fixtures must also be reliable, easy to maintain, able to withstand the elements and protected from vandalism.

OCI Response: All exterior fixtures will be vandal-resistant lensing.

Loading docks, internal footpaths should be well lit.

OCI Response: The loading dock will be illuminated with 30-foot candles. Truck lights will be provided.

Natural Surveillance

Use a single, clearly identifiable, point of entry/exit.

HOK Response: Public Entries: The main public entry is clearly established from the prominent memorial plaza. Two subordinate entrances for Public Affairs and Property Exchange are provided for police operational needs and are well-defined.

Public entrances should be clearly defined by walkways and signage.

HOK Response: Entrances are clearly identifiable from the public plaza and walkways.

o Maintain clear visibility from the interior/exterior of all areas of the property.

HOK Response: Public zones are well organized and observable from the public way. Planting and night lighting will conform to CPTED principles.

 Place all entrances/exits under 24-hour visual surveillance, monitored electronically if necessary.

OCI Response: CCTV cameras will be designed at every entry point.

 Loading area, (drop off/pick up) should be clearly visible, have good signage, and not enable hiding places.

HOK Response:

Install a "peephole" on exterior doors to allow employees to verify deliveries.

HOK Response: Glass doors are provided for deliveries made to the lobby. Deliveries to the loading dock are within the secure, fenced yard.

Do not obstruct views from windows or doors.

HOK Response: Will comply.

 Public restrooms should be located close to the entrance to be easily observed and viewed.

HOK Response: Public restrooms were reviewed during the March 16, CPTED meeting. Public restrooms are adjacent to the Pre-Function Space/Community Room around the corner from the reception desk. The area is covered by CCTV which will be able to be monitored from Reception.

 All levels of the parking garage should be visible from the street or ground floor and well-lit to minimize hiding places.

HOK Response: The garage is within the secure yard and under video surveillance.

 Ensure that all POLICE/FIRE emergency entries/exits are clearly marked and clear of obstruction.

HOK Response: Will comply.

Natural Access Control

 Access control is an important means of reducing criminal accessibility/opportunity. It is gained through controlling the entering/exiting of pedestrians and vehicles.

HOK Response: Entrances are controlled and monitored.

o Site entrances should be easily securable.

HOK Response: Entrances are controlled and monitored.

 The entire property should be under 24-hour video/electronic surveillance and wellmonitored.

HOK Response: Will comply.

o Entrances/Exit points to parking areas should be controlled by a fence or gate.

HOK Response: will comply.

Dead-end spaces should be blocked by a fence or gate.

HOK Response: Will comply.

 Common building entrances should have locks that automatically lock when the door closes.

HOK Response: Will comply.

Employee parking should be close to the building.

HOK Response: Will comply.

 The Main Entrance/Police Information Desk, Records Counter, Internal Affairs, Property Exchange and any other public services area should have the following: Enclosed with a break-resistant type of glass.

HOK Response: The information desk is enclosed in Level 3/ballistic resistant construction. Ballistic-rated construction will be provided around public access windows as per the project budget.

Designed with as much glass as possible facing the entry/lobby.

HOK Response: The desk projects into the lobby with glass on three sides to enhance observation.

Equipped with a subtle audible enunciator to indicate when the door is open Have a lockable door, duress alarm, and telephone. Comment deleted per March 16, 2023, meeting.

No response is required.

Employees should be required to wear photo ID badges for identification purposes.

HPD confirmed during the March 16, CPTED meeting that employees will be required to wear photo IDs.

 Visitors should not be able to physically bypass the main entrance area without signing in and obtaining an identification card.

HOK Response: Publicly accessible spaces are separated by controlled access doorway to support this recommendation.

o Delivery entrances should be separate, well-marked, and monitored.

HOK Response: A mail drop is provided to accommodate deliveries to the public lobby. Regular deliveries to the loading area are within the secure yard.

o If deliveries are made, they should be made during the daytime hours.

HOK Response: Deliveries were reviewed during the March 16, CPTED meeting. Small deliveries can be signed for at the reception desk and deposited in the small Mail Drop room in the Public Lobby or directed to the loading dock in the securely fenced portion of the site.

o Dumpsters should be enclosed, secured, and visible.

HOK Response: The dumpster enclosure is within the secure yard.

 Place electrical equipment away from walls or low buildings to avoid climbing opportunities.

HOK Response: Will comply.

 Restrict access to roofs by way of dumpsters, loading docks, stacked items, ladders, etc.

HOK Response: Dumpsters, loading dock, and equipment enclosures are located within the secure yard or well away from the building.

 Roof should be kept secured, locked, and have keycard access for those entering with authorized personnel only.

HOK Response: Review External stair to Wellness Area reviewed during the March 16, CPTED meeting. The top of the stair has a secure gate to prevent unauthorized people from gaining access to the upper levels. Stair was requested to allow access to the ground for physical training.

Internal Circulation and Control

 Doors or gates that can be locked should be used to secure unused sections of the building when the sections are not in use.

HOK Response: Will comply.

 Glass elevators are strongly recommended for safety, and security and for creating visibility inside/out. HOK Response: The lack of glass elevators was reviewed during the March 16, CPTED meeting. Not currently in scope.

Design stairwells to be open and visible, without solid walls.

HOK Response: Walls are required for fire rating.

 Areas under stairwells should be enclosed; All descending stairwells should be open into visible accessible hallways.

HOK Response: Stairwells were reviewed during the March 16, CPTED meeting. All stairwells except the external stair to the Wellness Area continue to the floor. The area beneath the Wellness stair is well-lit and observed by CCTV.

Use 24-hour video/electronic surveillance to monitor all stairs and elevators.

HOK Response: Will comply as the project budget allows.

All elevators should be equipped with a panic button.

HOK Response: Will comply.

Do not install permanent stop buttons in elevators.

ODP/HOK Response: Will comply.

 There should not be recessed areas in corridors that could be used for hiding or loitering.

HOK Response: Swallow niches are currently planned to create enhanced suite entries and be reviewed during the March 16, CPTED meeting. The niches were determined to be acceptable. Niches in public corridors should be avoided.

Convex mirrors should be used in corners of hallways and in stairwells.

HOK Response: Convex mirrors were reviewed during the March 16, CPTED meeting. Areas of concern will be covered by CCTV. Mirrors will not be provided.

 Emergency phones should be installed on each level and on opposite corners of the parking garage.

HOK Response: Emergency phones were discussed during the March 16, CPTED meeting. It was agreed that emergency phones will not be provided.

 Use white-dyed concrete or light-colored paint for walls to enhance lighting and visibility within the parking garage.

Paint within the garage was during the March 16, CPTED meeting. COH confirmed painting of concrete within the garage is not included.

 Place Emergency Evacuation Floor Plans within the building on each level for all employees to view. HOK Response: Will comply.

 Have an Emergency Plan in place for employees and have periodic training to ensure they know the plan in the event of an emergency.

The emergency plan was discussed during the March 16, CPTED meeting. HPD confirmed that a plan will be in place for the facility.

 Recommend the placement of bollards near the main entrance and the pathway to the Fallen Officers Memorial Site. The distance between the bollards should be between 3 & 5 feet, enough to allow for pedestrian traffic and wheelchair access, but close enough to deter the entrance of a vehicle.

HOK Response: Requires review. The current plan is to limit the use of bollards and utilize precast concrete benches and stone boulders to deter vehicle intrusion.

 Consider the needs of Police/Fire Emergency vehicles to ensure they are not blocking any passages or fire lanes. Bollards can protect pedestrians and vulnerable sites from vehicular attacks, therefore, acts as a deterrent.

HOK Response: Will comply.

Landscaping:

Keep landscaping trimmed and well-maintained.

HOK LA Response: Will noted on drawing / in spec, the PD landscape maintenance team to provide.

 Plant height-appropriate shrubbery along walkways so as to not obstruct visibility or allow individuals to hide behind.

HOK LA Response: Will comply.

Plants/Shrubbery should not be more than 2ft in height.

HOK LA Response: Will comply.

o Tree canopies should not be lower than 6ft in height.

HOK LA Response: Will comply.

Non-Pedestrian Building Entry Points

Sturdy fencing should enclose locations where gas and electric utilities enter buildings.

OCI Response: Will comply.

Locations, where gas and electric utilities enter buildings, should be well-lighted.

OCI Response: Will comply.

Electrical service disconnects and gas valves should be equipped with locking devices.

OCI Response: Will Comply.

Building(s) Perimeter Doors

 Signs posted at all building perimeter entry/exit points should provide clear direction for employees and patrons.

HOK Response: Will Comply.

 Exterior doors not used as designated entry points, should be locked to prevent entry from the exterior.

HOK Response: Will comply.

o Ideally, exterior doors should be equipped with electronic propped door alarms, which annunciate either locally and/or at the security office.

HOK Response: DPS can be provided on exterior doors. Will Comply.

Perimeter doors should be designed for "heavy duty" (ANSI Grade III) applications.
 HOK Response: Will comply.

General locations

 Mechanical, electrical, HVAC, or other equipment located outside the building should be surrounded by a protective enclosure. Ex. Dumpster Enclosures.

HOK Response: Equipment protection was discussed during the March 16, CPTED meeting. The design team will comply where possible. Note that utility providers have required their service equipment to be located in areas accessible to the public which limits the ability to provide protection. It is my understanding utilities are requiring unobstructed access.

CCTV

o CCTV provides surveillance that can detect criminal activity and record the footage, which can be useful in an investigation. Conspicuous CCTV is another type of deterrent to a criminal. There are some difficulties in monitoring parking facilities because of shadows, spaces between parked vehicles; and columns, ramps, and walls in parking garages; that is why lighting is also essential in these areas.

OCI Response: CCTV cameras will be designed at every entry point and general surveillance around the building. The parking garage will be covered in multiple views in each driving lane.

Check all CCTV systems and ensure that they provide a clearly visible facial picture.

OCI Response: CCTV cameras will be IP-based and focal points set for facial recognition.

Fencing

 (If used) Wrought iron fencing provides for natural surveillance within and onto the property. Ex. Parking lot and to establish a defined border definition of the entire property.

HOK Response: Will comply.

Signage

o Ensure proper signage is posted throughout the property.

HOK Response: Will comply.

 Careful placement of signage will allow employees and visitors the capability of moving quickly in and out of the parking facility.

HOK Response: Code-compliant signage will be provided. Note the garage is staff-only, not public.

o Color coding also helps with locating their parked vehicle when they return to the garage.

HOK Response: Color-coded signage was discussed during the March 16, CPTED meeting. It was agreed that color coding is less important for a private staff garage and not a requirement for the new headquarters.

The purpose of the review is to provide security recommendations. This review is only advisory and is not intended to identify all security weaknesses or to warrant the adequacy of all present and future security measures whether recommended.

City of Hollywood Technical Advisory Committee

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

Hollywood New Police Department Headquarters

Technical Advisory Committee Submittal

File Number: 23-DP-03

Design Criteria Statement

New Hollywood Police Department Design Narrative and Criteria Statement – February 22, 2023

The new Hollywood Police Headquarters will be constructed on the driving range of the existing municipal Orangebrook Golf Course. The site supports the needs of the police, the City of Hollywood, and its citizens in crucial ways. Access to both Hollywood Boulevard and Park Road, major north-south and east-west thoroughfares supports police operations by allowing officers to respond quickly throughout the city when needed. The convenient central location serves to maintain and enhance the department's presence in the community and serve constituents equally. Positioning the new headquarters on the south end of the driving range optimizes the opportunity for future development on Hollywood Boulevard to strengthen the tax base and provide amenities within the neighborhood.

Site design and landscaping

The site development and landscape design support the mission. The new police facility is oriented towards the Hollywood Blvd. and Park Road intersection maintaining a visual connection to the city. Separate entries are provided for public visitors, service vehicles, and secure staff. The single-family residential neighborhood to the east will be buffered by landscaped stormwater management retention ponds along Entrada Drive. Wherever possible, existing mature plantings (trees) are maintained and integrated into the design. Hardscape and softscape elements are placed around the site and designed to complement the overall building mass. A variety of native and compatible species have been selected for their sustainable features, and blend with existing flora. Design features along South Park Road will establish precedence for the future linear park that will connect the future Orangebrook development to Hollywood Boulevard. The existing police memorial will be relocated and featured prominently at the main public entrance to the building.

Building scale and massing

The compact design of the new Hollywood Police Headquarters consists of a new three-story police facility and parking garage. The design team worked with city planners throughout the concept phase to establish a building massing that anticipates future development to the north of the headquarters site. The buildings are appropriately scaled to transition from the three- and four-story commercial and multifamily residential buildings on South Park Road to the single-family residential community to the east. The vertical glass tower signals public entry and anchors the department's identity in the city. The building form takes advantage of the need for a larger first-floor footprint by presenting a full three-story façade on South Park Road and stepping to the north and east enhancing the pedestrian experience.

Architectural and design components

The main building is configured in an L-Shape screening the views of the staff parking garage and secure site areas, such as the sally court, and service functions. Along the public way, the building conveys a sense

Thursday, February 23rd, 2023

City of Hollywood Technical Advisory Committee

of openness with large areas of glazing intended to invite the public in and integrate natural lighting into the building. The main public entrance is marked by a large two-story public lobby, which is easily identifiable from the street public parking. A large, reconfigurable community room is situated off the main entrance. This space is intended to host community briefings and events to create additional interactions between the neighborhood and the police.

The façade design and massing of the new headquarters are modern and forward-looking in the tradition of Joseph Young and the City of Hollywood. The state-of-the-art glass curtainwall entry tower creates a sense of openness and signals the police department's commitment to serve. The richly detailed architectural precast concrete exterior harkens back to the Art Deco era and provides human scale to the building and will establish a level of quality for future development on the site. The entire building envelope is appropriately designed to provide resistance to high wind events anticipated in south Florida using high-quality materials that will maintain their appearance over the life of the facility.

Compatibility

The site and landscape design, building massing, and architectural design components work together to create a harmonious relationship between the existing built environment and the new police headquarters. Site features, such as the landscaped stormwater retention ponds and future linear park, blend and enhance the surrounding streetscape. Building massing is consistent with the surrounding conditions and anticipates new development. Architectural design features and materials are compatible with those found throughout the neighborhood and city. These features enhance the project's compatibility within the local and citywide context and form the basis of the New Police Headquarters that will serve the constituents of Hollywood for many years to come.

November 17, 2020

Heather Baburek Guenot, Assistant Project Manager Department of Design and Construction Management City of Hollywood 2600 Hollywood Boulevard Hollywood, Florida 33022 Via Email Only

Dear Ms. Guenot:

of Hollywood.

Re: Platting requirements for a parcel legally described as a portion of Parcel 1, "Dick Lloyd Plat," according to the Plat thereof, as recorded in Plat Book 110, Page 8, of the Public Records of Broward County, Florida; together with the East 40 feet of Block D, "Hollywood Hills-1968," according to the Plat thereof, as recorded in Plat Book 68, Page 15, of the Public Records of Broward County, Florida; together with Lots 15-20, Block 20 and a portion of the golf course, "Central Golf Section of Hollywood," according to the Plat thereof, as recorded in Plat Book 9, Page 44, of the Public Records of Broward County, Florida. This parcel is generally located on the south side of Hollywood Boulevard, between Park Road and Entrada Drive, in the City

This letter is in response to your correspondence regarding the Broward County Land Use Plan's platting requirements for a proposed mixed-use development on the above referenced parcel. You have indicated that the current proposal is to subdivide the subject property into three (3) parcels for future redevelopment to potentially include both non-residential and residential uses.

Regarding the proposed development located within the "Dick Lloyd" and "Hollywood Hills-1968" plats, Planning Council staff has determined that replatting <u>would not be required</u> by Policy 2.13.1 of the Broward County Land Use Plan. Policy 2.13.1 would not require replatting of parcels included in plats approved by the Broward County Commission and recorded after June 4, 1953. Information from the Broward County Records, Taxes and Treasury Division indicates that the above referenced plats were recorded on June 12, 1981 and April 24, 1969, respectively. Land platted after June 4, 1953 may be divided by metes and bounds and developed in accordance with local regulations and the effective land use plan, unless local regulations are more restrictive and would require platting. The City of Hollywood's platting requirements should be investigated.

Regarding the proposed development located within "Central Golf Section of Hollywood" plat, Planning Council staff has determined that replatting <u>would be required</u> by Policy 2.13.1 of the Broward County Land Use Plan for the proposed development, if any portion of the proposed principal buildings are to be located on this portion of the subject site.

As per the criteria of Policy 2.13.1, replatting is required for the issuance of building permits when constructing a non-residential or multi-family development, unless all of the following conditions are met:

Heather Baburek Guenot November 17, 2020 Page Two

a. The lot or parcel is smaller than 10 acres and is unrelated to any adjacent development;

b. The lot or parcel has been specifically delineated in a recorded plat;

c. All land within the lot or parcel which is necessary to comply with the County

Trafficways Plan has been conveyed to the public by deed or easement; and

d. The proposed development is in compliance with the applicable land development

regulations.

Planning Council notes that although the subject parcel located within the "Central Golf Section of Hollywood" plat is a minority; the entire development parcel is greater than 10 acres (approximately 15.58 acres) and does not meet any additional platting exemptions.

It is recommended that you contact Broward County's Planning and Development Management Division at 954-357-6666, regarding the platting process and/or to inquire about whether additional County review, such as a plat note modification, may be required.

The contents of this letter are not a judgment as to whether this development proposal complies with the Broward County Trafficways Plan, permitted uses and densities, local zoning, the land development regulations of the municipality or the development review requirements of the Broward County Land Use Plan, including concurrency requirements.

If you have any additional questions regarding the Broward County Land Use Plan's platting requirements, please contact Leny Huaman, Planner, at your convenience.

Respectfully,

Barbara Blake Boy Executive Director

BBB:LRH

cc/email: Dr. Wazir Ishmael, City Manager

City of Hollywood

Shiv Newaldass, Director, Development Services

City of Hollywood

Hydrant Flow Test Procedure

Procedure For One & Two Flow Hydrant Test:

- Establish hydrants closest to location and associated water main(s).
- Static/Residual hydrant (**P**) should be located close to location (preferably off same main as to provide future water source).
- Flow hydrant(s) (**F**) should be located off same main up and down stream from mid-point test (static/residual) hydrant.
- Note static system pressure off **P** hydrant before opening any other (note any unusual or remarkable anomalies such as high demand sources, construction, etc.)
- Flow **F1** hydrant and record GPM and residual off **P** hydrant.
- Flow **F2** hydrant and record GPM and residual off **P** hydrant.
- Flow **F1** & **F2** simultaneously and record GPM separately from **F1** and **F2** and record **P** hydrant residual.

Legend:

F1 & F2
Designation shall represent first and second flowed hydrants respectively
P Designation shall represent test hydrant for static and residual distribution system pressures.

FIRE FLOW CALCULATIONS

NEW POLICE HEADQUARTERS A THREE STORY BUILDING

These calculations are for a three (3) story building, with a total ground floor square footage of 42,551 SF. The entire building is non-combustible construction.

Fire Flow Area = 98,865 SF

Based on Type II (222) construction. Per NFPA 18.4.4.1 Fire Flow Area, the fire flow area is based on the total square footage of the three largest floors, which is 98,865 square feet.

Per Table 18.4.5.2.1, the fire flow requirement is 3,500 gpm for 3 hours.

NFPA 18.4.5.3.2 states that the required fire flow can be reduced by 75% if the building has automatic sprinklers.

3,500 gpm X 75% = 2,625 gpm (fire flow credit)

3,500 gpm - 2,625 gpm = 875 gpm

The minimum fire flow per NFPA 18.4.5.3.2 is 1,000 gpm

Fire flow required = 1,000 gpm

If you have any questions or need any additional information, please call me at 954-535-5133.

Sincerely,

KIMLEY-HORN & ASSOCIATES, INC.

Stefano Viola, P.E.

FIRE FLOW CALCULATIONS

POLICE HEADQUARTER GARAGE A THREE STORY GARAGE

These calculations are for a three (3) story parking garage, with a total ground floor square footage of 35,464 SF. The entire building is non-combustible construction.

Fire Flow Area = 96,304 SF

Based on Type II (222) construction. Per NFPA 18.4.4.1 Fire Flow Area, the fire flow area is based on the total square footage of the three largest floors, which is 96,304 square feet.

Per Table 18.4.5.2.1, the fire flow requirement is 3,250 gpm for 3 hours.

NFPA 18.4.5.3.2 states that the required fire flow can be reduced by 75% if the building has automatic sprinklers.

3,250 gpm X 75% = 2,437.50 gpm (fire flow credit)

3,250 gpm - 2,437.50 gpm = 812.50 gpm

The minimum fire flow per NFPA 18.4.5.3.2 is 1,000 gpm

Fire flow required = 1,000 gpm

If you have any questions or need any additional information, please call me at 954-535-5133.

Sincerely,

KIMLEY-HORN & ASSOCIATES, INC.

Stefano Viola, P.E.

LEED NARRATIVE

1. GENERAL

A. Approach:

A holistic and integrated approach to sustainability considers not only the performance of the building and site ecology, but also focuses on producing a high-quality indoor environment to encourage collaboration, productivity, and employee well-being. As a third-party rating system, LEED is utilized to validate the comprehensive sustainability approach, ensuring that minimum sustainability goals are achieved under each of several categories and crediting additional strategies that are selected by the project team based on the project's customized scope and priorities.

2. LEED CERTIFICATION

A. Overview:

The project is registered (LEED Project ID: 1000143669) and a path to LEED Certification under the LEED-NC v4 rating system has been developed. This approach will also utilize LEED v4.1 credit path substitutions where applicable and beneficial to the project. A minimum of 50 points are required for Silver level of LEED certification under this rating system, and 56 points have currently been identified for targeting in our LEED strategy, noted in the 'Yes' column of the LEED checklist, to provide a point cushion and ensure that certification at the Silver level will be achieved. A minimum of 60 points are required for Gold level certification, and additional points are noted in the 'High Maybe/Gold Path' and 'Low Maybe' columns for further opportunity on the project and will continue to be explored as the design phase progresses.

B. Minimum Program Requirements

The new Hollywood Police Headquarters is located on permanent and existing land. As a development within a larger property, the LEED boundary will be established to be consistent with the limit of disturbance for this project's scope of work and will be reasonably defined for this purpose. The project includes over 1,000 square feet of gross floor area. The project meets all the Minimum Project Requirements (MPRs) for LEED certification.

3. CREDIT SUMMARY

A. Integrated Process

In order to establish the priorities and goals of the project for environmental and human performance while meeting Hollywood Police HQ's objectives for program, schedule, budget, aesthetics, comfort and functionality, an integrated team met early and often to collaborate and discuss project strategies and identify the LEED path for the project.

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

B. Location and Transportation

LEED Location and Transportation strategies address recognition of sites that are previously developed, located in areas of high density with existing amenities, transit infrastructure and bicycle network infrastructure, and installation of EV charging stations to support green vehicle commuting for reduced CO₂ emissions. Five (5) 'Yes' points are currently anticipated under this category.

C. Sustainable Site Design

Sustainable Sites strategies encourage the evaluation of existing site conditions to inform the project and designing to provide habitat for the local ecosystem and open space programmed to encourage human activity outdoors. Additional strategies to reduce heat island, exterior light pollution and rainwater runoff help minimize further impacts of construction on the surrounding and downstream ecosystems. Seven (7) 'Yes' points are currently anticipated under this category, with an additional three (3) 'Maybe' points noted for further design phase investigation and benchmarking.

D. Water Efficiency

Water Efficiency strategies span the building and site, targeting fixture and equipment efficiency, opportunities for reuse water to further reduce potable water consumption, and metering infrastructure to allow building operators to monitor actual usage for long-term operational performance. Water efficiency and reuse opportunities will be reviewed as part of the Integrative Process effort to inform the design and development of the Owner's Project Requirements (OPR). Seven (7) 'Yes' points are currently anticipated under this category, with an additional two (2) 'Maybe' points noted for further design phase investigation and benchmarking.

E. Energy & Atmosphere

Energy and Atmosphere strategies address energy efficiency and ensure ongoing performance, as well as associated impacts of energy consumption and refrigerants on CO2 generation, ozone depletion, and global warming. Energy efficiency opportunities will be reviewed and modeled as part of the Integrative Process effort to inform the design and OPR. Fourteen (14) 'Yes' points are currently anticipated under this category, with an additional seventeen (17) 'Maybe' points noted for further design phase investigation and benchmarking.

F. Materials and Resources

Materials and Recourses credit strategies encourage the selection of materials to support responsible environmental sourcing practices and disclosure by manufacturers, as well as responsible waste management during construction and after occupancy to minimize landfill waste. Six (6) 'Yes' points are currently anticipated under this category, with an additional two (2) 'Maybe' points noted for further design phase investigation and construction phase tracking.

Thursday, February 23rd, 2023

City of Hollywood Technical Advisory Committee

2600 Hollywood Boulevard, Room 315 · P.O. Box 229045 · Hollywood, FL 33022

G. Indoor Environmental Quality

Indoor Environmental Quality strategies identify policies, material emissions criteria, and HVAC system design to support healthy indoor air quality, as well as additional human comfort and wellness strategies related to acoustics, lighting, and views. Eight (8) 'Yes' points are currently anticipated under this category, with an additional seven (7) 'Maybe' points noted for further design phase investigation and construction phase tracking.

H. Innovation and Design Process

Up to five (5) credit points are available for Pilot credits (minimum of 1 required to achieve all points in this category), Innovation strategies that have not been addressed anywhere in the LEED for New Construction rating system (maximum of 4), or through Exemplary Performance strategies for exceeding the standard credit requirements (maximum of 2). LEED awards an additional point for having a LEED accredited professional with BD+C specialization as an active core member of the team. All six (6) Innovation and Design Process 'Yes' points are currently anticipated, with the following strategies recommended:

- a. Pilot Credit Strategies Bird Collision Deterrence and Biophilic Design for the Indoor Environment
- b. Innovation Strategies Green Education and Reduced Mercury in Lighting
- c. Exemplary Performance EPDs or Low-Emitting Materials
- d. LEED Accredited Professional

I. Regional Priority

As some environmental issues are particular to a specific geographic region, LEED designates four regional credits, worth one point each, that are based on the project's location. The ultimate goal of regional priority credits is to enhance the ability of LEED project teams to address critical local environmental issues across the country and around the world. The available regional priority credits anticipated or under investigation for this project include:

- a. Bicycle Facilities Anticipated
- b. Light Pollution Reduction Anticipated
- c. Optimize Energy Performance, 8 point achievement Anticipated
- d. Outdoor Water Use Reduction, 2 point achievement Under Investigation

Sensitive Land Protection

High Priority Site

Surrounding Density and Diverse Uses

16 Do not qualify.

1

- Build on previously developed land OR do not build on prime farmland, in a flood plain, near a wetland, or on habitat.
- Option 2 Brownfield Remediation: Verify presense of soil or groundwater contamination that would require remediation.

Density within 1/4 mi radius of site boundary is as follows (can be calculated either way): for calculating residential and non-res combined:

22,000+ sf/acre of buildable land (2 pts - No), 35,000+ sf/acre of buildable land (3 pts - No) -Benchmarking confirmed only 10,500 sf/acre.

for calculating residential and non-res separately:

7 DU/acre resi and 0.5 FAR non-res (2 pts), 12 DU/acre resi and 08 FAR non-res (3 pts)

AND/OR Main entrance within 1/2 mi walk of 4-7 (1 point) or 8+ (2 points - Yes) diverse uses. 8+ amenities anticipated. Community center, tennis center, courthouse, retail, restaurants, fire department, golf course...

Existing police station site to be redeveloped, some indended density, but not contracted. Nonbuildable utility: drinking water treatment plant to north-west of site can be excluded.

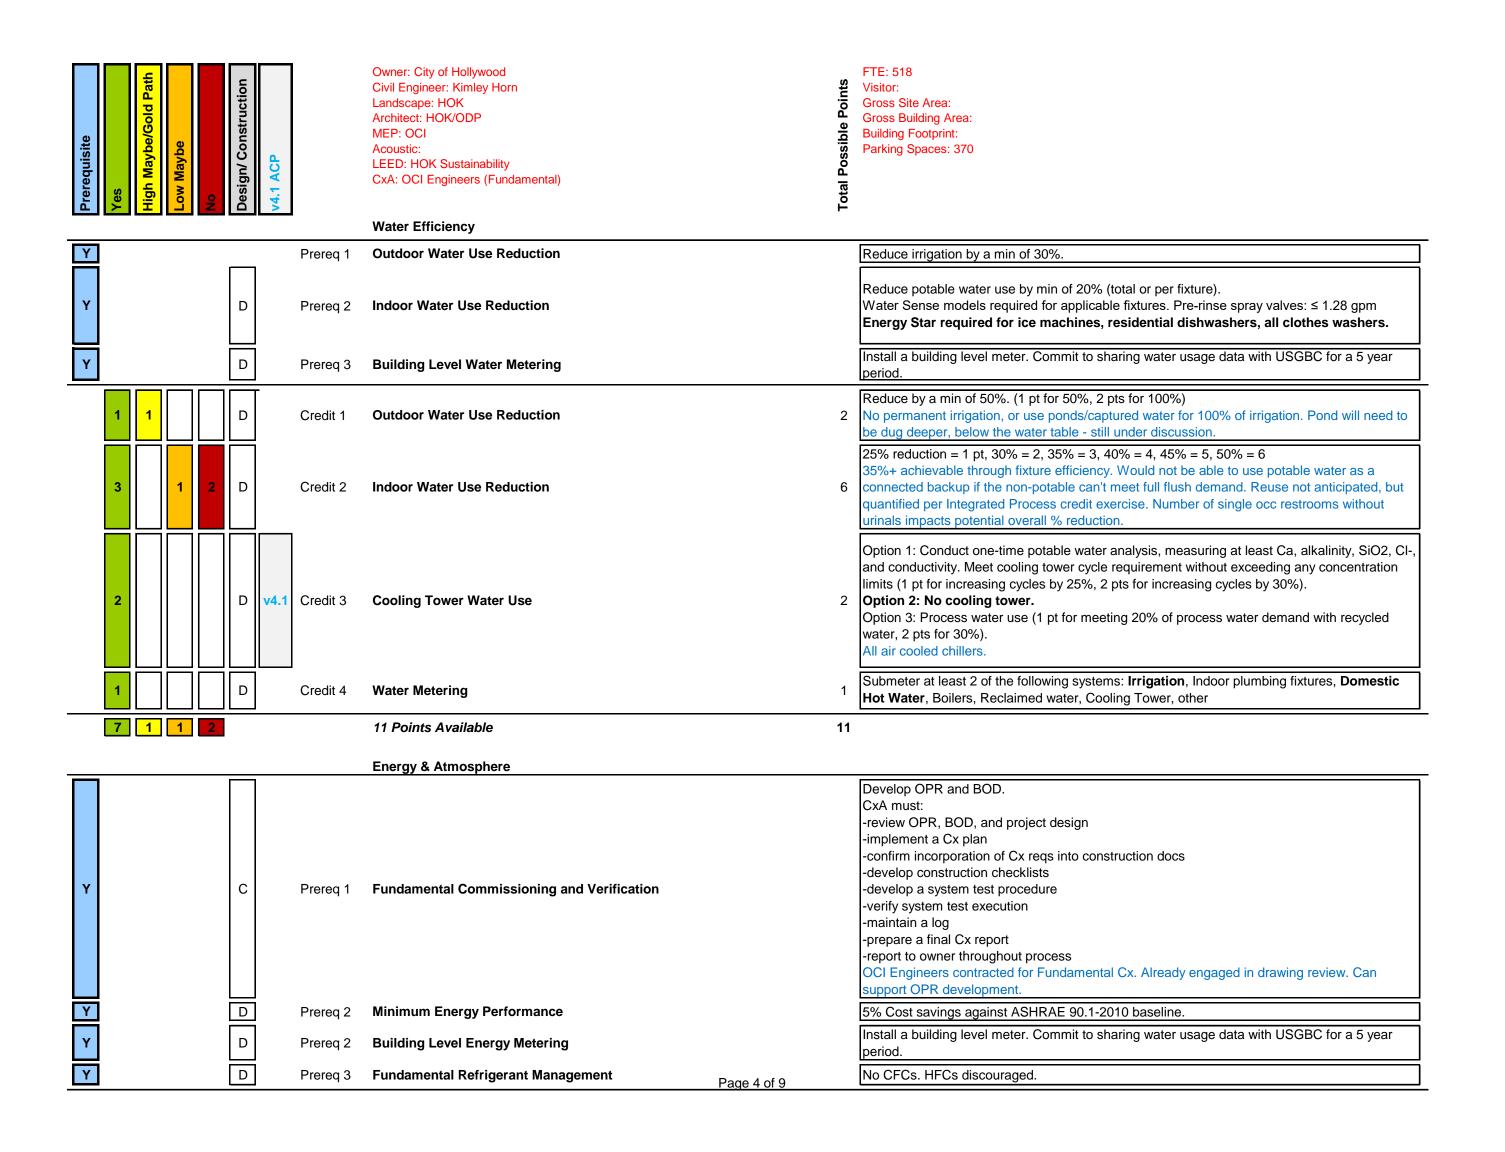

Prerequisite	Yes	High Maybe/Gold Path	Low Maybe	No	Design/ Construction	v4.1 ACP		Owner: City of Hollywood Civil Engineer: Kimley Horn Landscape: HOK Architect: HOK/ODP MEP: OCI Acoustic: LEED: HOK Sustainability CxA: OCI Engineers (Fundamental)	Total Possible Points	FTE: 518 Visitor: Gross Site Area: Gross Building Area: Building Footprint: Parking Spaces: 370
				5	D	v4.1	Credit 5	Access to Quality Transit	5	Route 07: 37 weekday trips, 35 Saturday trips. Check on 2nd route (15), and revisit later in design or construction for additional routes/trips.
	1				D	v4.1	Credit 6	Bicycle Facilities	1	Locate bike storage or entrance w/in 200 yards of a bike network that connects to at least 1 of the following, within 3-mi from the project boundary: -10+ diverse uses -a bus rapid transit stop, rail station, or ferry terminal AND provide short-term bike storage for at least 2.5% of peak visitors, no fewer than 4 spaces per building. Provide min 4 to serve up to 160 peak visitors. AND provide long-term bike storage for at least 5% of regular building occupants, no fewer than 4 spaces per building (in addition to the short-term). Provide 26 bike parking capacity in garage for 518 staff (serves up to 520 FTE). AND provide at least 1 on site shower with changing facility for first 100 regular bldg occupants and 1 additional for every 150 thereafter. Min 5 showers for 518 peak FTE (can be 2 male, 2 female and 1 unisex, or provide 3 male and 3 female for a total of 6). 75% SD set shows 3 female, 3+ male, and 1 unisex - Meets LEED criteria for up to 1000 FTE.
				1	D	v4.1	Credit 7	Reduced Parking Footprint	1	Not anticipated.
	1				D	v4.1	Credit 8	Green Vehicles	1	v4: Reserve 5% of spaces for LEFE and install 2% of spaces as charging stations OR install alternative gas (ethanol) facility. V4.1 Nov. 2020: Install EV charging stations for 5% of parking, must meet charger criteria. Are current/future fleet vehicles electric or electric/hybrid? Policy update to increase % of fleet vehicles that are electric, will need infrastructure to support. Timeline undetermined. Infrastructure for EV-ready is required by city, so will use v4.1 path. Will tag the required spaces for coordination. Need total parking spaces (subtract out fleet spaces).

Prerequisite Yes	High Maybe/Gold Path	May belooid	Low Maybe	No	Design/ Construction	v4.1 ACP			Owner: City of Hollywood Civil Engineer: Kimley Horn Landscape: HOK Architect: HOK/ODP MEP: OCI Acoustic: LEED: HOK Sustainability CxA: OCI Engineers (Fundamental)	Total Possible Points	FTE: 518 Visitor: Gross Site Area: Gross Building Area: Building Footprint: Parking Spaces: 370			
									Sustainable Sites		Create ESC plan for all construction associated with the project. Must comply with 2012 EPA			
Υ					С		Pr	ereq 1	Construction Activity Pollution Prevention		Construction General Permit. Local FL standards will meet or exceed.			
1					D		Cr	edit 1	Site Assessment	1	Complete site survey or assessment covering: (Arch) Human Use, and Human Health Effects (Landscape) Vegetation, support Soils as appropriate (Sust) Climate			
	1	1	1		D	v4.1	Cr	edit 2	Site Development - Protect or Restore Habitat	2	Plant native plants over a total 25% of site area (incl footprint). Soils in disturbed areas must be restored, and must be tested for compliance. (Revisit per revised v4.1 criteria - 1 pt for 15%, 2 pts for 25%) Likely LEED boundary to include wet/dry area to north-east, and pond to south. Dry retention beds to east of building (in scope but outside of property line). Recommended to use limit of disturbance for LEED boundary.			
	1	1			D	v4.1	Cr	edit 3	Open Space	1	Provide outdoor open space for 30% of site area (incl footprint), min of 25% of that area must be vegetated. Open space must be pedestrian oriented, REC specific, gardens, or habitat (or a combination). Under v4.1 path, all accessible green roofs and rooftop pedestrian hardscape can count towards the 25% open space requirement. Wetland and naturally designed ponds count if the side slope gradients average 1:4 or less. West street front and possible rooftop amenity space could support achievement. Continue to			
3					D	v4.1	Cr	edit 4	Rainwater Management	3	benchmark. Opportunity for pedestrian trail over wet/dry stormwater area. Retain rainwater on site for 80th, 85th or 90th percentile storm. Retention, infiltration, evapotranspiration, capture and reuse. 100% onsite retention required for South Florida stormwater. Must include the pond within the LEED boundary.			
2					D		Cr	edit 5	Heat Island Reduction	2	High SRI paving and concrete with some shading. SR of 0.28 min. and/or roof with SRI of 39 for high slope, 82 for low slope (1-2 pts). AND/OR Place min 75% of parking spaces under cover (1 pt). Any roof used to shade parking must have SRI of at least 32, or be green roof, or be covered by energy generation systems. Will have some shade structures over asphalt parking on interior of the site.			
1					D		Cr	edit 6	Light Pollution Reduction	1	Comply with either BUG rating method or calculation method for both Uplight and Light Trespass. AND Exterior signage may not exceed luminance 200 cd/m2 during night and 2000 cd/m2 during day. Lighting zone 2 anticipated. Will design to comply. Fixtures being mapped out now, anticipated by 12/7. Factoring in shielding and pole mounting heights at ground level and garage top level.

10 Points Available

Prerequisite		High Maybe/Gold Path	Low Maybe	No	Design/ Construction	v4.1 ACP		Owner: City of Hollywood Civil Engineer: Kimley Horn Landscape: HOK Architect: HOK/ODP MEP: OCI Acoustic: LEED: HOK Sustainability CxA: OCI Engineers (Fundamental)	Total Possible Points	FTE: 518 Visitor: Gross Site Area: Gross Building Area: Building Footprint: Parking Spaces: 370
	3	1		2	D		Credit 1	Enhanced Commissioning	6	Option 1: Enhanced Systems Cx (3-4 pts) CxA must do the following for MEP and renewable energy systems: -review contractor submittals -verify inclusion of systems manual reqs in construction docs -verify inclusion of operator and occupant training reqs in construction docs -verify systems manual updates and delivery -verify operator and occupant training delivery -verify seasonal testing -review building operations 10 months after substantial completion -develop an ongoing Cx plan and/or Option 2: Envelope Cx (2 additional pts - No) CxA must do all of the above as they apply to the building's thermal envelope. Request proposal from OCI Engineers for Enhanced.
	10		8		D		Credit 2	Optimize Energy Performance	18	Achieve points based on additional energy reduction from baseline. (6% earns 1 pt - 50% earns 18 pts) 10 pts = 24% energy cost reduction. 8 pts achieves the Regional Priority point (20% reduction). Conducting comparative load modeling to verify in non-insulated glass is viable (design case with and without).
	1				С		Credit 3	Advanced Energy Metering	1	Install building level and system level energy use management system (BAS or BMS system), and submeter each end use over 10% of total project energy use. Design electrical panels to isolate end uses. Provide sub-meters, flow monitors on HVAC equipment. Separate lighting, plug and mechanical panels.
			2		С	v4.1	Credit 4	Demand Response/Grid Harmonization (v4.1 or v4 ACP)	2	Participate in a Demand Response Program if available (2 pts) - Could be viable with generator use, but would require additional performance/filtration for EPA. Cost impact. Install infrastructure to take advantage of future DRP if not yet available (1 pt) Load flexibility and management strategies (1-2 pts) • Peak Load Optimization: strategy to reduce on-peak load by at least 10% as compared to peak electrical demand referenced to the ASHRAE 90.1-2016 compliant case (1 point) • Flexible Operating Scenarios: Stratey to move at least 10% of peak load by a time period of 2 hours (1 point) • On-site thermal and/or electricity storage: Strategy to reduce on-peak load by at least 10% as compared to peak electrical demand (1 point) • Grid resilience technologies: project served by utilities with resilience programs in place, which leverage strategies such as islanding and part-load operation, automatically achieve this credit (1 point) Ice plant may be an option, with rebate available for cost of tanks. Also lower energy rate for shifted peak energy use. Can peak load reduction result in smaller HVAC equipment? Who is the energy utility, and what programs are available?
			3		D		Credit 5	Renewable Energy Production	3	Generate 1% (1pt) 5% (2 pts) or 10% (3 pts) renewable energy. Review with life cycle cost effective assessment. Any utility programs for provision of PV over parking garage? FPNL?
			1		С		Credit 6	Enhanced Refrigerant Management	1	No CFCs, No Halons in fire suppression. Dependent in part on the selected HVAC equipment type.
			2		С		Credit 7	Green Power and Carbon Offsets	2	Purchase 50% (1 pt) or 100% (2 pts) of project's energy from green power, carbon offsets, or RECs.
	14	1	16	2				33 Points Available	33	

Prerequisite	Yes	High Maybe/Gold Path	Low Maybe	No	Design/ Construction	v4.1 ACP		Owner: City of Hollywood Civil Engineer: Kimley Horn Landscape: HOK Architect: HOK/ODP MEP: OCI Acoustic: LEED: HOK Sustainability CxA: OCI Engineers (Fundamental)
Y					D		Prereq 2	Environmental Tobacco Smoke (ETS) Control
	2				D		Credit 1	Enhanced IAQ strategies
	3				D	v4.1	Credit 2	Low Emitting Materials
	1				С		Credit 3	Construction IAQ Management Plan

FTE: 518 Visitor: Gross Site Area: Gross Building Area: Building Footprint: Parking Spaces: 370

Prohibit smoking inside the building AND Prohibit smoking outside the building except in designated smoking areas located at least 25 feet (7.5 meters) from all entries, outdoor air intakes, and operable windows. Also prohibit smoking outside the property line in spaces used for business purposes.

Signage must be posted within 10 feet (3 meters) of all building entrances indicating the nosmoking policy.

Option 1: Enhanced IAQ strategies for Mechanically ventilated spaces (Meet all three - 1 point)

- entryway systems (10 feet in the direction of travel)
- interior cross contamination prevention (sufficiently exhaust hazardous gas spaces)
- filtration (MERV 13 or higher)

Option 2: Additional enhanced IAQ strategies (Select one of the following - 1 point)

- Exterior contamination prevention (Design to minimize entry of pollutants, ensure results through CFD, Gaussian dispersion analysis, wind tunnel modeling, or tracer gas modeling that contaminants are below NAAQS)
 - Increased Ventilation (Increase breathing zone 30% over min rates of IEQp1)
 - CO2 monitoring (for all densely occupied spaces)
- Additional source control and monitoring (where contaminants likely, evaluate potential sources, develop and implement a materials handling plan to reduce likelihood of contaminant release. Install monitoring systems w/ sensors designed to detect specific contaminants. alarm must indicate unusual or unsafe conditions)

v4.1 Path: 2 categories = 1 pt, 3 categories = 2 pts, 4 cat. = 3 pts, 5 cat. = 3 pts + 1 EP Calculate via either surface area, volume, or cost, as indicated.

Interior Paints & Coatings, 75% VOC emissions, by volume or surface area, 100% VOC content.

Interior Adhesives & Sealants, 75% VOC emissions, by volume or surface area, 100% VOC content.

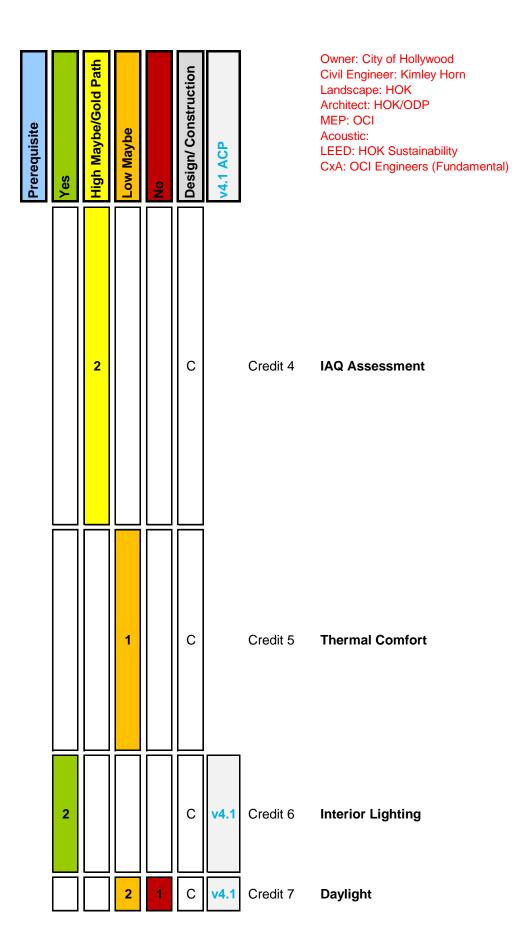

Flooring, 90% VOC emissions, by cost or surface area. Subflooring is excluded.

Wall Panels, 75% VOC emissions, by cost or surface area.

Ceilings, 90% VOC emissions, by cost or surface area.

Insulation, 75% VOC emissions, by cost or surface area. MEP application is excluded. **Composite Wood**, 75% compliant with formaldehyde emissions, by cost or surface area. Furniture, 75% VOC emissions, by cost (still a challenge)

Develop and implement an indoor air quality (IAQ) management plan for the construction and preoccupancy phases of the building. During construction, meet or exceed all applicable recommended control measures of the Sheet Metal and Air Conditioning National Contractors Association (SMACNA) IAQ Guidelines for Occupied Buildings under Construction, 2nd edition, 2007, ANSI/SMACNA 008–2008, Chapter 3. Protect absorptive materials stored onsite and installed from moisture damage. Do not operate permanently installed air-handling equipment during construction unless filtration media with a minimum efficiency reporting value (MERV) of 8. Prohibit the use of tobacco products inside the building and within 25 feet (8 meters) of the building entrance during construction.

Page 8 of 9

FTE: 518
Visitor:
Gross Site Area:
Gross Building Area:
Building Footprint:
Parking Spaces: 370

Select one of the following two options, to be implemented after construction ends and the building has been completely cleaned. All interior finishes, such as millwork, doors, paint, carpet, acoustic tiles, and movable furnishings (e.g., workstations, partitions), must be installed, and major VOC punch list items must be finished. The options cannot be combined.

Option 1: Flush-out (1 point) Install new filtration media and perform a building flush-out by supplying a total air volume of 14,000 cubic feet of outdoor air per square foot of gross floor area while maintaining an internal temperature of at least 60°F and no higher than 80°F and relative humidity no higher than 60%.

Option 2: Air Testing (2 points): After construction ends and before occupancy, but under ventilation conditions typical for occupancy, conduct baseline IAQ testing using protocols consistent with the methods listed in Table 1 of the Guide for all occupied spaces. Use current versions of ASTM standard methods, EPA compendium methods, or ISO methods, as indicated. Laboratories that conduct the tests for chemical analysis of formaldehyde and volatile organic compounds must be accredited under ISO/IEC 17025 for the test methods they use. Retail projects may conduct the testing within 14 days of occupancy.

Thermal Comfort Design:

Option 1. ASHRAE Standard 55-2010: Design heating, ventilating, and air-conditioning (HVAC) systems and the building envelope to meet the requirements of ASHRAE Standard 55–2010, Thermal Comfort Conditions for Human Occupancy

Option 2: Comply with ISO 7730:20025 or CEN Standard EN 15251;2007 AND

Thermal Comfort Control: Provide individual thermal comfort controls for at least 50% of individual occupant spaces. Provide group thermal comfort controls for all shared multioccupant spaces, and for any individual occupant spaces without individual controls. Thermal comfort controls allow occupants, whether in individual spaces or shared multioccupant spaces, to adjust at least one of the following in their local environment: air temperature, radiant temperature, air speed, and humidity.

- 1 strategy for 1 point, 3 strategies for 2 pts:
- Glare Control (max luminance of 7000 candela/sm 45 to 90 degrees from nadir, **OR** UGR < 19 as modeled)
- Color Rendering (CRI of 90+ OR color fidelity index of 78+ and gamut index between 97 and
 - **Lighting control** (dimmable or multi-level lighting control for 90% of occupied spaces) **Finish surface reflectivity** (ceilings, walls, work surface, moveable partitions)
- Demonstrate through annual computer simulations a spatial daylight autonomy for 55%, 75% or 90% of spaces. Use regularly occupied area.

Notice of Public Meeting

City of Hollywood New Police Headquarters Project

Date: Thursday, November 10, 2022

Time: 6:00 pm – 8:00 pm

Location: David Park Community Center

108 North 33rd Court, Hollywood, Florida 33021

Virtual

Attendance: https://us06web.zoom.us/webinar/register/WN_-Cmxo3XCQj69zKLCEuoFsw

The webinar ID is: 874 5082 5143

The virtual attendants must register with names and email addresses, once

registered the link to the actual meeting will be provided via email

A link for the meeting will also be available at https://newhollywoodpolicehq.com

Artis's Rendering of New Police Headquarters Concept

Project Overview: In March of 2019, the voters approved a General Obligation Bond, which included funding for a new Police Headquarters. The new facility will be built south of the existing facility, on land currently being used for the Orangebrook Golf & Country Club driving range. The current Police Headquarters will remain in use during construction. The new Police Headquarters is envisioned to be approximately 105,000 SF in size, with a secure parking structure for the Police Department staff. The facility will house all necessary police functions. The facility will be designed to accommodate the changing needs of the Police Department for many years to come.

Please join us to meet the project team and discuss the next steps in the City of Hollywood New Police Headquarters Project. Thank you.

For additional information, please contact us at 1-888-361-0603, HollywoodPolice@garthsolutions.com or visit the project website at https://newhollywoodpolicehq.com

PROJECT DESIGN PROCESS OVERVIEW

STAKEHOLDER INPUT

City Stakeholder Input:

- Visioning Session and ongoing meetings and project coordination
- Police Department
- City Stakeholders
- City Officials

Key Stakeholder Goals for the Project from Public Meeting #1:

- A welcoming Police Headquarters building that is open to the community
- Landscaped public spaces around the building
- A community landmark

Additional Key Input Received from Public Meeting #2:

 Desire for a buffer space between neighborhood & project/future development

QUESTIONS OR COMMENTS?

RADIO TOWER

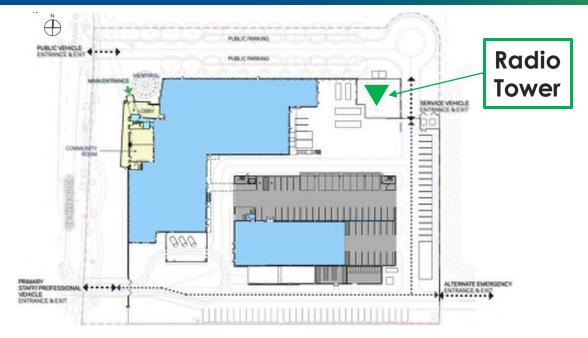

Radio Communications Tower Update

RADIO TOWER

Objective: Design & construct new radio tower to replace existing Police Headquarters Radio Tower

- Existing tower has shown signs of aging and is structurally unable to accommodate the equipment needed to service the City's needs according to a 3rd party analysis performed in May 2015
- New Tower will hold the City's public safety equipment and the City radio equipment
- Existing, aging radio tower will be dismantled and recycled

Update:

- Replacement tower is being engineered using the latest ANSI/TIA-222-Revision H engineering guidelines, benefitting the City and residents with a stronger, safer tower.
- Concept Design phase of proposed Radio Tower is complete, including preliminary FAA approval and geotechnical soil analysis.
- Radio Tower completed PACO review on May 2, 2022.
- Radio Tower has been submitted for Preliminary TAC review as part of the overall New Police Headquarters project.

Yvonne Garth, President of Garth Solutions, opened the meeting and introduced Chris O'Brien, Chief of Police for the City of Hollywood. Chief O'Brien shared his thanks on behalf of city staff for the residents passing the bond referendum to fund the new police headquarters and mentioned the importance of staying within the budget while ensuring a cost-efficient project that is well managed from start to finish. The remaining members of the project team were then introduced.

Project Manager, Heather Guenot, provided the planned timeline of the project and briefly provided residents with a better understanding of what this project will entail from start to finish. She provided information on the feedback given at the last meeting

^{*}The notes below are based on feedback from attendees and information provided*

where there was great emphasis on the need for buffers between the Police Station and Adjacent communities and explained how this feedback had been integrated into the project design. She went on to provide information requested about the linear park and explained that the park would eventually be extended to Hollywood Boulevard once the north side of the parcel is developed.

Architect Ed O'Donnell went through the site plan and the various facility perspectives. He explained that although the rendering does not include the landscape, there is landscaping included in the building/site design.

Major Marino provided information on the community shared space and lobby. He explained that the rooms will serve multiple purposes including community meeting places, as a recreational area for police officers working long hours, and as an emergency center and shelter in the event of natural disasters.

Mr. Karamitsos provided a brief overview of the elements within the design and construction of the new police department headquarters which were meant to address the sustainability aspect as provided in feedback from residents at previous meetings.

Mayor Levy informed the audience that there are preliminary conversations being had between government agencies regarding the possibility of putting a county courthouse at the location. Mayor Levy also mentioned that they are looking at opportunities for synergy in transportation and more transportation enhancement opportunities and confirmed Hollywood Blvd would be a main corridor for this to take place.

Mr. Zadikoff explained that the building would comply with all current building codes and will be constructed to withstand hurricanes and other natural disasters.

Mr. Viola provided information relating to stormwater drainage and the proposed temporary retention pond on the south end near the golf course.

Questions and Answers/Comments from Audience:

Will solar energy be used, or will it be considered down the line if not in the initial design/construction?

Ms. Heran stated that during the current design phase of this project the team has been looking into way to incorporate elements of sustainability and the building will be built to current LEED Silver Standard.

Are there going to be any drainage issues?

Ms. Heran stated that drainage issues and analysis were considered when the designs were being developed.

Will residents be able to use this new location as a safe place where transactions can be done for the exchange of goods, like Offer Up and other services?

Ms. Heran explained that any public spaces can be used for the transactions described.

What will happen to the existing headquarters?

Ms. Heran advised the building would be demolished after the construction of the new police headquarters.

Will the linear path be safe and secure?

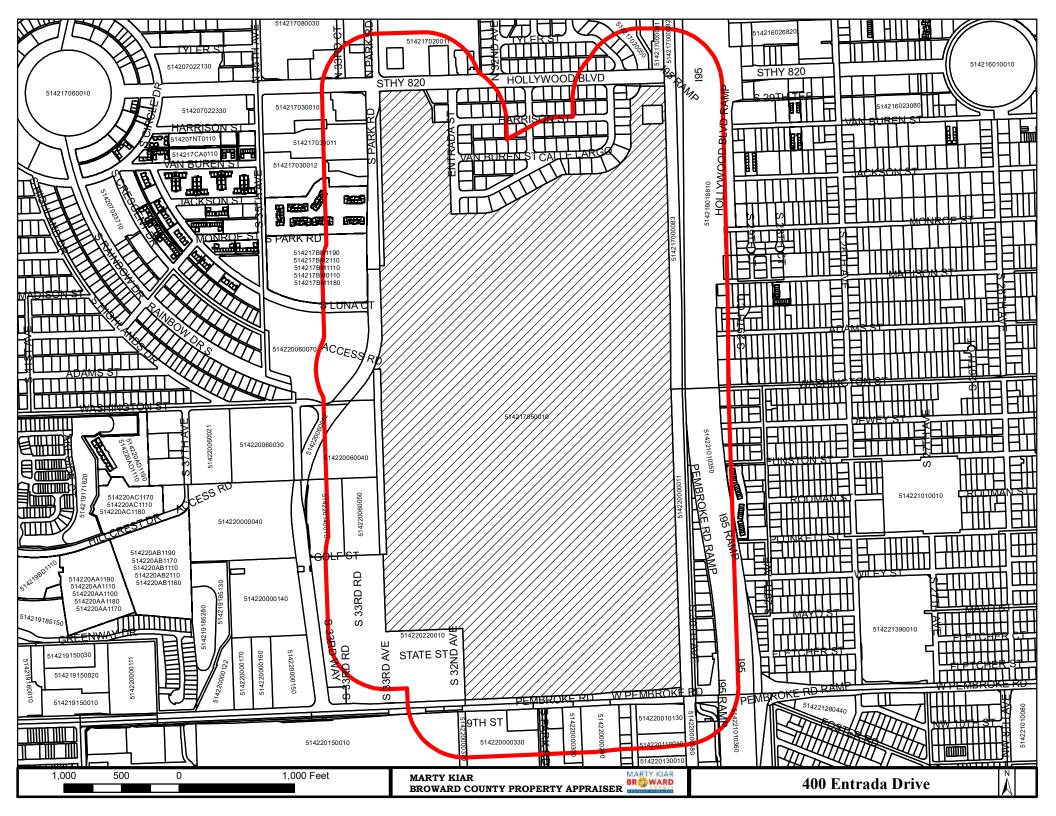

Ms. Heran explained that the police team work diligently to design it in a way that it is secure.

Could the current police headquarters site be turned into an arcade or a movie theater?

Ms. Heran explained that plans for the property outside of demolishing the building have not yet been contemplated by staff. Mayor Levy mentioned that there is a possibility of a county courthouse being put there, or that the location could be utilized for commercial purposes.

A resident expressed their frustration about a pros and cons list not being provided based on the concerns shared in previous meetings along with an explanation as to what was considered and why it was/was not included in the design plans.

Ms. Heran explained the architects work in conjunction and collaboration with the city and are a part of the decision-making process, of which took a total of 8 months to complete. Ms. Heran offered to provide the resident with any of the information and research he needs or felt was not represented.

PROJECT DESCRIPTION

The City of Hollywood is proposing a new Hollywood Police Department Headquarters, located in a ±4.99-acre parcel located south of the current Hollywood Police Department headquarters, on 3250 Hollywood Boulevard in Hollywood, Florida, along South Park Road. The current site is mostly undeveloped, with around 1.58-acres of asphalt parking lots, surrounded by roadways on the east and west sides.

The proposed improvements include the following: a main building with a radio tower and a parking garage along with street parking, enclosed by fence, with three (3) gated driveway entrances. The northmost entrance will also contain visitor parking, and a memorial plaza with landscaping improvements throughout. The Project proposes two retention areas, and an outfall to an existing lake to the South.

EXISTING CONDITIONS

As shown in the project location map, Exhibit A-1, Appendix A, the lot current consists of sod and approximately 1.58-acres of asphalt. Since most of the existing site is pervious, the current stormwater management system consists of surface storage.

FUTURE CONDITIONS

The proposed Police Headquarters improvements include the following: a main building (42,479 SF) with a radio tower and a parking garage (35,464 SF) along with street parking, enclosed by fence, with three (3) gated driveway entrances. The northmost entrance will also contain visitor parking, and a memorial plaza with landscaping improvements throughout. The proposed drainage system will consist of two retention areas, and an outfall to an existing lake to the South.

OBJECTIVE

The objective of this submittal is to provide calculations to support the drainage design of the project as required by South Florida Water Management District (SFWMD), Broward County Environmental Protection and Growth Management Department (BCEPGMD), Broward County Surface Water Management Program (BCSWMP), Broward County Water Resource Management (BCWRM), and the City of Hollywood (City).

Calculations and modeling for applicable various storm events were preformed using Cascade.

In addition to the information provided in this report, engineering plans that depict the proposed redevelopment of the site are provided. All elevations in this report reference the North American Vertical Datum of 1988 (NAVD).

LAND USE BREAKDOWN

EXISTING LAND USE BREAKDOWN

Table 1-Existing Area Breakdown

Existing Area Type	Area (square feet)	Area (acres)	Percentage
<u>Pervious</u>			
Green	202,366	4.64	74.6%
TOTAL PERVIOUS	202,366	4.64	74.6%
	·		
<u>Impervious</u>			
Asphalt	68,677	1.58	25.4%
TOTAL IMPERVIOUS	68,677	1.58	25.4%
TOTAL AREA SITE	271,043	6.22	100.00%

PROPOSED LAND USE BREAKDOWN

Table 2-Proposed Area Breakdown

Propose Area Type	Area (square feet)	Area (acres)	Percentage
<u>Pervious</u>			
Green	83,005	1.91	30.7%
Gravel	1,739	0.04	0.6%
TOTAL PERVIOUS	84,744	1.95	31.4%
<u>Impervious</u>			
H.D. Concrete	15,860	0.36	5.8%
Concrete	23,059	0.53	8.5%
Building	1,665	0.04	0.6%
Asphalt	65,899	1.51	24.3%
Concrete	79,817	1.83	29.4%
TOTAL IMPERVIOUS	186,899	4.27	68.6%
			1
TOTAL AREA SITE	271,043	6.22	100.00%

PERMIT CRITERIA

The future stormwater drainage system was analyzed following the standard methods of SFWMD, BCEPGMD, and the City. The most stringent design requirements were followed in the design of the stormwater improvements. The design criteria are as follows:

WATER QUANTITY CRITERIA

BUILDING FLOOD PROTECTION (SFWMD, BCEPGMD, & COL)

The proposed building's finished floor elevations are 9.0' NAVD.

FEMA FLOOD ZONE

The project is in Map Number 12011C0568H of the Flood Insurance Rate Map (FIRM), effective August 2014. According to the FIRM Map, the site is located within special flood hazard zones X and AE. See Appendix A, Exhibit A-4 for reference.

BROWARD COUNTY 100-YEAR FLOOD ELEVATION

The base flood elevation (BFE) was determined by the Broward County 100-Year Flood Elevations Map (Appendix A, Exhibit A-3). The 100-year base flood is **6.5' NAVD** throughout the site.

FLOOD PROTECTION: 5-YEAR 24-HOUR RAINFALL

A storm event with a return period of 5-Year 24-Hour duration shall be used for computing the minimum elevation within the project site.

OFFSITE DISCHARGE: 25-YEAR 72-HOUR RAINFALL (SFWMD)

A storm event with a return period of 25-Year 72-Hour duration shall be used for computing minimum offsite discharge stages. This will prevent the site from discharging to any neighboring stormwater systems. No stormwater is to be discharged offsite until flood stages are above the maximum stages calculated for a 25-Year 72-Hour storm event. The site cannot be bermed due to existing adjacent conditions, but proposed retention areas will compensate for the increase in impervious area.

WATER QUALITY CRITERIA

TOTAL VOLUMETRIC REQUIREMENT (SFWMD)

SFWMD water criteria and procedures were followed during this analysis. The total volumes for water quality are provided for the greater of the first inch of storm runoff from the entire site, or the amount of 2.5 inches times the percentage of impervious area. Volumetric calculations for the required and provided amounts can be found in Appendix B, Exhibits B-2 and B-3.

PROPOSED DESIGN PARAMETERS

The future stormwater management system includes a retention area, which will provide water quality and satisfy the ½" pre-treatment requirements.

The proposed retention area, concrete, asphalt and all other features are to be designed to conform to the applicable standards.

WATER TABLE ELEVATION

The design water table elevation was obtained from Broward County's Future Ground Water Elevation Map included in Appendix A, Exhibit A-2.

Groundwater table elevation = 1.0' NAVD

RAINFALL DATA

Rainfall data was gathered from *Isohyetal Maps from SFWMD Technical Memorandum, Frequency Analysis of One and Three-Day Rainfall Maxima for Central and Southern Florida* (Trimble, 1990). Rainfall depths are listed below in Table 3 with accompanying isohyetal maps provided in Appendix A, Exhibit A-5.

Table 3-Rainfall Depths

Rainfall Frequency	Rainfall Depth (inches)
5-year/24-hour	7
25-year/72-hour	14
100-year/72-hour	16

SOIL STORAGE

Soil storage is calculated based on soil type, the average depth to the water table across the project site, and the percentage of pervious area, in accordance with the SFWMD *Environmental Resource Permit Applicant's Handbook Volume II.* Soil storage calculations can be found in Appendix B, Exhibit B-4.

Existing Calculated Soil Storage = 6.10 inches Proposed Calculated Soil Storage = 2.56 inches

WATER QUANTITY CALCULATIONS

To portray the project area's relationship of stormwater storage volume to stormwater stage, a stagestorage relationship was developed for the proposed conditions of the site.

PROPOSED WATER QUANTITY CALCULATIONS

A stage-storage relationship was developed for the proposed project conditions for surface storage. Surface storage is assumed to be a linear relationship between average low and average high elevations.

Stage-storage parameters used to calculate all proposed storage can be found in Exhibit B-6, Appendix B.

WATER QUALITY CALCULATIONS

The site currently does not provide water quality. The additional water quality for the development is to be provided through the retention area no less than the first inch of runoff from the site, or 2.5 inches times the percentage of imperviousness, whichever is greater. As per Section 4.2.2 (c) of the SFWMD Environmental Resource Permit Applicant's Handbook Volume II, "Water surface and roofed areas can be deducted from site areas only for water quality pervious/impervious calculations." The required water quality calculations can be found in Appendix B, Exhibit B-2.

Required Water Treatment Volume = 0.72 ac-ft (8.64 ac-in)

Water Quality Provided through North Retention Area = 0.63 ac-ft (7.584 ac-in)
Water Quality Provided through South Retention Areas = 0.43 ac-ft (5.16 ac-in)

Total Water Treatment Volume Provided= 1.062 ac-ft (12.74 ac-in)

FLOOD ROUTING MODEL

Flood routing models were prepared for both the existing and proposed conditions using Cascade. Maximum flood stages resulting from the flood routing model performed with Cascade are provided in Table 4 below. The full model report can be found in Appendix C.

CONCLUSION

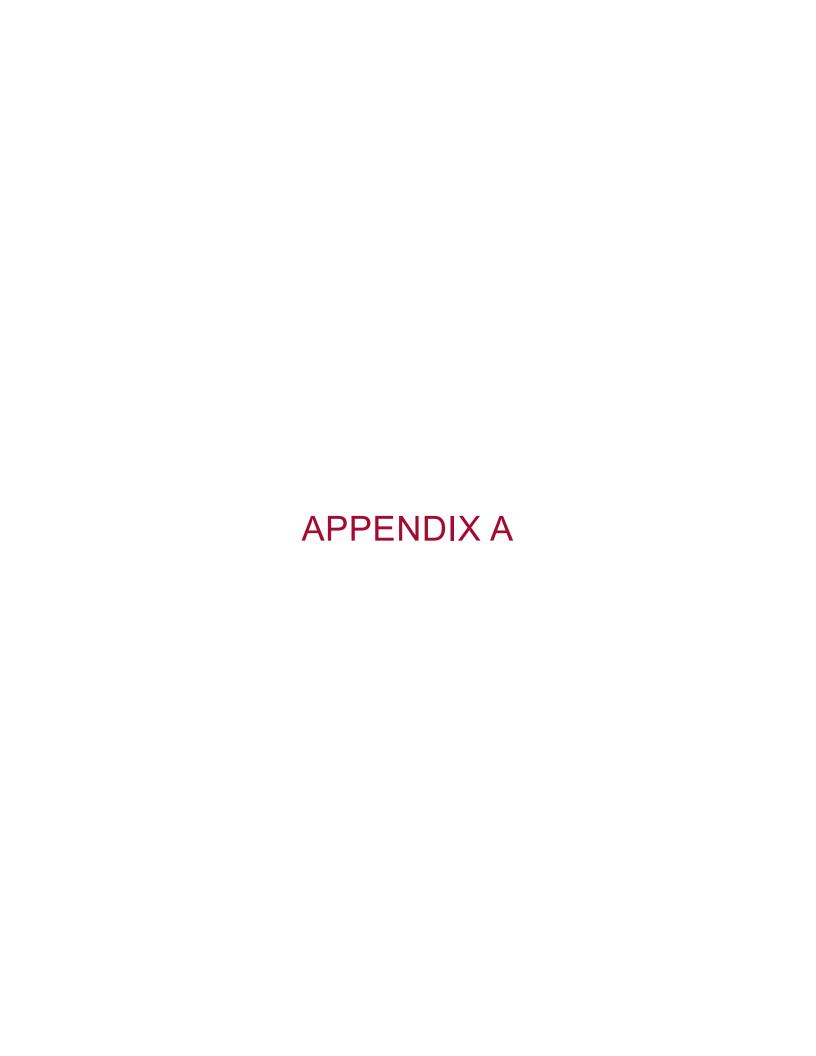

The drainage analysis performed on the applicable storm events indicate that the proposed drainage system can protect the proposed developments described herein. The drainage analysis indicates that the proposed drainage system can protect the proposed building during a 100-Year 72-Hour storm event. Please see the attached drainage calculations in Appendix B.

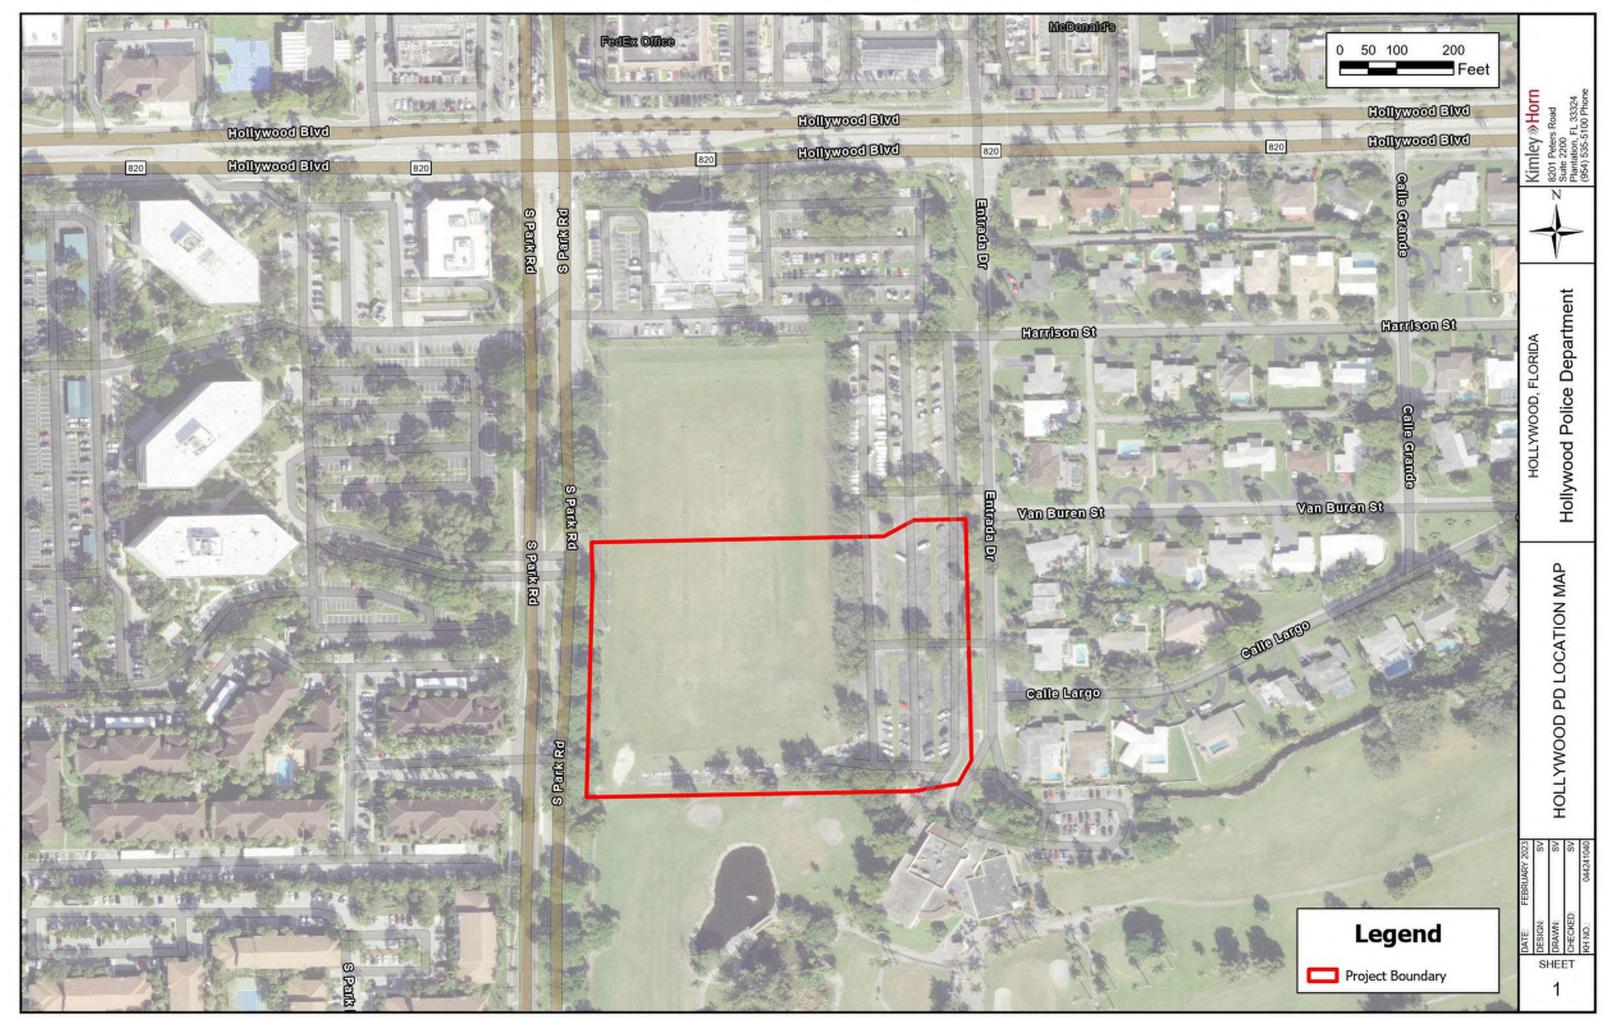

Maximum flood stages resulting from the flood routing model performed with Cascade are provided below. The full model report can be found in Appendix C.

Table 4 - Maximum Flood Stages

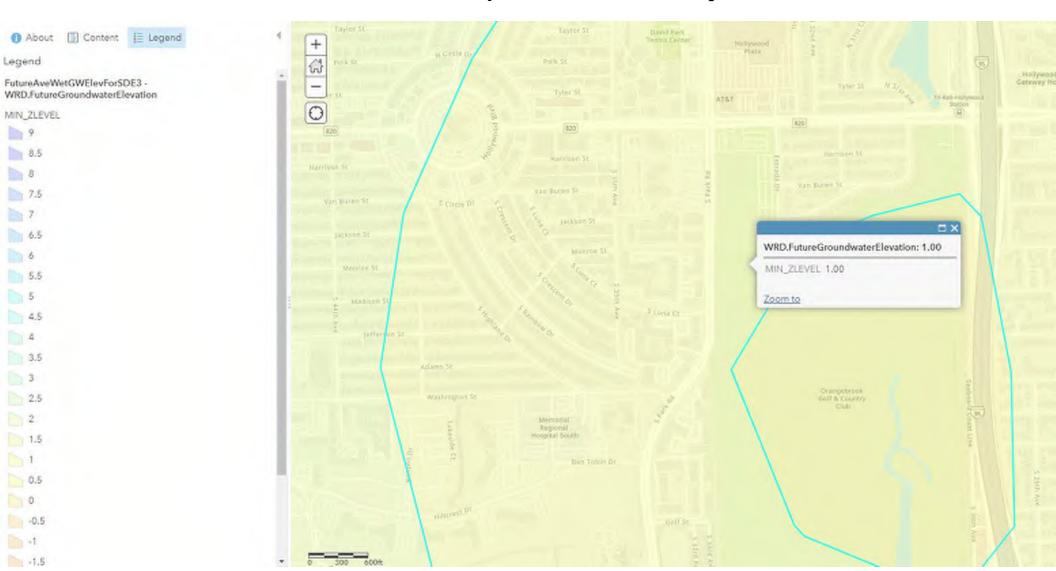

Storm Event	Existing Site Max. Stages (FT NAVD)	Proposed Site Max. Stages (FT NAVD)
5- Year 24-Hour	8.21	5.29
25-Year 72-Hour	8.78	6.73
100-Year 72-Hour	8.94	8.97

Building FFE = 9.0' NAVD

EXISTING LAND USE BREAKDOWN

Existing Area Type	Square Feet	Acres	Percentage
Pervious			
Green	202,366	4.64	74.6%
TOTAL PERVIOUS	202,366	4.64	74.6%
<u>Impervious</u>			
Asphalt	68,677	1.58	25.4%
TOTAL IMPERVIOUS	68,677	1.58	25.4%
	•		
TOTAL SITE AREA	271,043	6.22	100.0%

PROPOSED LAND USE BREAKDOWN

Future Area Type	Square Feet	Acres	Percentage	
<u>Pervious</u>				
Green	83,005	1.91	30.7%	
Gravel	1,739	0.04	0.6%	
TOTAL PERVIOUS	84,744	1.95	31.4%	
<u>Impervious</u>				
Heavy Duty Concrete	15,860	0.36	5.8%	
Concrete	23,059	0.53	8.5%	
Pavers	1,665	0.04	0.6%	
Asphalt	65,899	1.51	24.3%	
Building	79,817	1.83	29.4%	
TOTAL IMPERVIOUS	186,299	4.27	68.7%	
TOTAL SITE AREA	271,043	6.22	100.0%	

REQUIRED WATER QUALITY VOLUME

- 1) Compute the first inch of runoff from the developed site: = $1 in. x Site Area x \binom{1 ft}{12 in.}$ = 1 in. x 6.22 acres $x \left(\frac{1}{ft} \right)_{12 in.} = 0.518 ac - ft$
- 2) Compute 2.5 times the percentage of imperviousness.
 - a. Site area for water quality pervious/impervious calculations only:
 - = Total Project (Water Surface + Roof)
 - $= 6.22 \ acres (0.00 \ acres + 1.83 \ acres) = 4.39 \ acres$
 - b. Impervious area for water quality pervious/impervious calculations only:
 - = (Site Area for Water Quality) Pervious
 - $= 4.39 \ acres 1.95 \ acres = 2.44 \ acres$
 - c. Percentage of imperviousness for water quality:
 - = (Impervious Area for Water Quality/Site Area for Water Quality)x100%
 - $= (2.44 \ acres/_{6.22 \ acres})x100\% = 55.58\%$
 - d. For 2.5 inches times the percentage impervious:
 - = 2.5 in. x Percentage Impervious
 - = 2.5 in. x 55.58% = 1.3895 in. to be treated
 - e. Compute volume required for quality detention:
 - = Inches to be Treated x (Total Site Lake)
 - = 1.3895 in. x (6.22 acres 0.00) $x \left(\frac{1 ft}{12 in.}\right) = 0.72 ac ft$

0.72 ac-ft (8.64 ac-in) of water quality volume is required as a minimum.

ONE-HALF INCH PRE-TREATMENT REQUIREMENT

- 1) Compute volume generated by 1/2" of rainfall:
 - = $\frac{1}{2}$ in x Site Area $x \left(\frac{1}{ft}\right)_{12}$ in.
 - $= \frac{1}{2} in. x 6.22 acres x (\frac{1}{12} ft)_{12} in = 0.259 ac ft$

0.26 ac-ft (3.11 ac-in) of pre-treatment is required as a minimum.

Provided Water Quality Calculations

Volume Provided in North Retention Area

Vertical Area:	5,669 sq ft
Bank Area:	7,008 sq ft
Top Elevation:	6.00 NAVD
Bottom Elevation:	3.00 NAVD
Actual Volume of Retention:	0.63 ac-ft

Volume Provided in South Retention Area

Vertical Area:	5,212 sq ft
Bank Area:	2,071 sq ft
Top Elevation:	6.00 NAVD
Bottom Elevation:	3.00 NAVD
Actual Volume of Retention:	0.43 ac-ft

Volume Provided by Retention Area: 1.062 ac-ft
--

TOTAL PROVIDED WATER QUALITY

Retention/Detention Pond Volume:	1.06 ac-ft
Credited Exfiltration Trench Volume (credit applied):	0.00 ac-ft
Additional Exfiltration Trench Volume (no credit applied):	0.00 ac-ft

TOTAL WATER QUIALITY VOLUME PROVIDED:	1.06 ac-ft

EXHIBIT B-4Project: Hollywood PD KHA No.: 044241040

SOIL STORAGE (EXISTING CONDITIONS):

Average Elevation of Existing Site:	8.00	NAVD		
Average Water Table Elevation:	1.00	NAVD		
Average Depth to Water Table:	7.00	ft.		
Soil Type:	Flatw	woods		
Available Storage (S _p):	8.18	in.		
Percent Pervious (pervious area/total area):	74.6%			
SOIL STORAGE = $S_p x$ Percent Pervious:	6.10	in.		

SOIL STORAGE (PROPOSED CONDITIONS):

Average Elevation of Developed Site:	8.50	NAVD	
Average Water Table Elevation:	1.00	NAVD	
Average Depth to Water Table:	7.50	ft.	
Soil Type:	Flatwoods		
Available Storage (S _p):	8.18	in.	
Percent Pervious (pervious area/total area):	31.4%		
SOIL STORAGE = S _p x Percent Pervious:	2.56	in.

Project Name: Hollywood PD

Reviewer: KHA

Project Number: 044241040

Period Begin: Jan 01, 2000;0000 hr End: Jan 04, 2000;0600 hr Duration: 78 hr

Time Step: 0.2 hr, Iterations: 10

Basin 1: Proposed

Method: Generalized Unit Hydrograph Rainfall Distribution: SFWMD - 3day

Design Frequency: 100 year 3 Day Rainfall: 16.0001 inches

Area: 6.22 acres

Ground Storage: 2.56 inches
Time of Concentration: 0.2 hours

Peak Rate Factor: 0
Initial Stage: 1 ft NAVD

Stage (ft NAVD)	Storage (acre-ft)
