**NE 163 ST Emergency Repair** (MDWSD, FL) Remove and replace 48" PCCP force main and deteriorated MHs. After a large sink hole developed on Sunny Isles Blvd, MDWSD required the immediate mobilization and repair of their critical FM out of the beach. Work was completed ahead of schedule and with minimal impact to traffic.

**Turnpike & Sunrise Blvd. Crossings** (Plantation) In-house Design Build of 3 critical directional drills required by the Turnpike to relocate the City's WM within 6 months. The project required quick turnaround of Design, Permits and Construction. Mr. Castillo anticipated all the delays and circumvented the typical red tape delivering the project ahead of schedule and on budget.

**NE 6th Avenue Drainage Improvements** (Oakland Park) Over 2,630 feet of 4x6 box culvert. Original design called for the box culvert to be installed vertically which would have resulted in major utility support and massive de-watering.
