- 3.4.1** Upon determination that an Owner's facility is non-toneable (non-conductive or lacking a conductive element such as a tracer wire). Ground Penetrating Radar shall be used to accurately locate and mark the facility. Facilities consisting of plastic, PVC, HDPE, clay, wood, transite, ACP, PE, Orangeburg, Corrugated Paper, fiber optic or concrete, are non-conductive. Such facilities are therefore non-toneable and invisible to standard RF electromagnetic instruments. GPR will be used to locate these facility types.
- 3.4.2** Using appropriate color marking paint or temporary flags (in accordance with APWA/ULCC/FS 556), mark horizontal position of Owner facilities with 24 from the outside diameter of the facility in accordance with FS 556.
- 3.4.3** Locate with GPR consists of all Owner facilities within the SSOCOF Request to Locate Ticket. One unit quantity of GPR Locate will be paid for use of the GPR system in conjunction with a Standard Locate.

3.5 Locate with Vacuum Excavation

When Standard Locates techniques and GPR fails, the alternative is to locate the underground Facility with a process of trial and error, soft digging until the Facility is exposed. Soft Digging can also be used when the invert elevation of a Facility is required.

- 3.5.1** Upon determination that an Owner's facility is non-toneable (non-conductive or lacking a conductive element such as a tracer wire), or is toneable but does not return a readable signal and Ground Penetrating Radar has proven ineffective in locating the subject facility or facilities, Vacuum Excavation shall be used to accurately locate and mark the facility.
- 3.5.2** Coordinate with utility agency/owners as required by FS 556.
- 3.5.3** Identify all utility owners in the assigned area.
- 3.5.4** Neatly cut and remove existing paving. Cut area not to exceed 225 square inches.
- 3.5.5** Excavate using a method enabling vertical as well as horizontal exploration through this cut
 - 3.5.5.1** Excavate test holes in such a manner as to prevent any damage to wrappings, coatings, or other protective coverings, such as by a vacuum excavation method, hand digging, etc
 - 3.5.5.2** Be responsible for any damage to the utility during excavation of same. Provide a visual survey marker. This marker shall be placed directly over (plumb to) the centerline or edge of the utility as appropriate. The marker shall represent the true horizontal location of the utility. The contractor shall be liable for the actual cover from the utility to the survey marker. The consultant shall also be responsible for recording the location of the survey marker (utility) as appropriate and recording that information on the test hole report.

3.5.5.3 Provide a permanent restoration of the pavement within the limits of the original cut at the time of backfill. In the event the test hole is excavated in an area other than the roadway pavement, the area disturbed shall be restored to the condition prior to the excavation.

3.5.5.4 Provide all traffic control, labor and equipment.

3.5.5.5 Collect GPS Coordinate location of test hole in accordance with bid item 5.

3.5.5.6 Vacuum Locate consists of locating the Owner's facility or facilities within a specified area. One unit quantity for Vacuum Excavation will be paid for each test hole location performed.

3.5.5.7 For each test hole location performed, the contract shall record the GPS coordinate in State Plane Coordinates (NAD83) and will be paid one unit quantity for each GPS Coordinate taken. (See bid item 5).

3.6 Marking

The use of flags or paint strips of a minimum of two (2) inches by twelve (12) inches, or other clearly identifiable materials at distances of every fifteen (15) feet, and at each divergence from a straight line in accordance with current marking standards of the American Public Works Association to show the field locations of Underground Facilities with Reasonable Accuracy (As defined in Part II, Section 2.6, Definitions).

3.7. Placement of Electronic Markers

3.7.1 When the Owner desires a lasting means of locating a facility in the future, a passive electronic marker shall be placed through means of vacuum excavation.

3.7.2 The passive electronic marker shall consist of a MetroTech Metro Mark series MM-16X, or approved equal. The Contractor will furnish and provide the passive electronic markers.

3.7.3 The passive electronic markers shall be of the proper frequency for the facility located and shall be tested to ensure detectability.

3.7.4 Placement of Electronic Markers consists of placement of one electronic marker for each utility excavated by means of vacuum excavation. The contractor will be paid one unit quantity for each marker placed.

3.8 Taking and Recording GPS Coordinates

3.8.1 In order to improve the quality of recorded subsurface utility data and when the Owner desires to ensure future locateability of the Owner's facilities, the taking of GPS coordinates shall be utilized.

3.8.2 The Contractor will collect one GPS Coordinate, in State Plane format (NAD83), for each vacuum excavation performed and/or for each facility located by means of vacuum excavation.

3.8.3 GPS Coordinates shall be in the sub-meter accuracy range.

- 3.8.4** GPS coordinates may be taken, at the Owner's direction, on or over facilities located by means of GPR, in order to improve the quality and reliability of utility maps and/or GIS Systems.
- 3.8.5** The contractor shall obtain GPS coordinates in accordance with this specification, by placing the device directly over the located facility and requesting a reading. The GPS equipment utilized shall be capable of recording coordinates in State Plane (NAD83) format, and with accuracies equal to, or better than 1 meter.
- 3.8.6** Taking and Recording of GPS Coordinates consists of collection and permanent recording of sub-meter GPS Coordinates for each facility located or requested. The Contractor will be paid one unit quantity for each GPS Coordinate taken and recorded. The Contractor will be required to deliver GPS coordinates to the Owner in printed and electronic format (raw ASCII format), no less than twice per calendar year, or at intervals mandated by the Owner.

3.9 Emergency Standard Locate

- 3.9.1** Emergency Standard Locates are performed outside normal business hours, on holidays or weekends. Standard business hours are Monday through Friday from 8:00 AM until 5:00 PM.
- 3.9.2** Responses requested outside of normal business hours shall be considered Emergency Standard Locates.
- 3.9.3** The Contractor shall respond to Emergency Standard Locates within two (2) hours of receiving notification.
- 3.9.4** The Contractor shall perform Standard Locates on Owner facilities within the designated area detailed in the Emergency Request. Normal rates will apply in the event GPR is required during an Emergency Locate.
- 3.9.5** Emergency Standard Locate consists of all Owner facilities with a 500 LF area, irrespective of width or number of facilities. Contractor will be paid one Emergency Standard Locate Unit Fee for every 500 LF increment, or portion thereof, located in accordance with the SSOCOF Emergency Request to Locate Ticket, outside of normal business hours.

3.10 Electronic Ticket Management

- 3.10.1** In order to ensure compliance with SSOCOF codes, requests, responses and FS 556, the Contractor shall utilize an Electronic Ticket Management System. The Electronic Ticket Management System shall be Digtrack, as deployed by Bytronics, Inc or approved equal.
- 3.10.2** The Electronic Ticket Management System shall be capable of receiving Request to Locate Tickets from SSOCOF and routing said tickets to the specific locator(s) responsible for the Owner's service area. The system shall be capable of displaying the Request to Locate Ticket on the locator's portable computer, providing the full ticket information including the ticket requestor and all legally required information from SSOCOF.

- 3.10.3** The system shall be capable of recording the precise time of ticket receipt, process, progress and close-out as well as providing the ability for the locator to electronically respond and close the request utilizing the codes for response established by SSOCOF.
- 3.10.4** The system shall generate the necessary Positive Response to the One Call Center and transmit the proper close codes as mandated by SSOCOF and FS 556.
- 3.10.5** The system shall be capable of remote access by the Owner, for screening, review and searching of tickets received within the Owner's service area.
- 3.10.6** The system shall be capable of providing, at least once per calendar year, a CD-ROM containing all Request to Locate tickets, responses and dispositions for each ticket received within the Owner's service area. The CD-ROM will be provided to the Owner by the end of the first quarter of each calendar year.
- 3.10.7** Payment for Electronic Ticket Management shall be made at the rate of one unit quantity for each ticket received for the Owners SSOCOF Member Service Code. The Owner shall be directly responsible to SSOCOF for any fees charged by SSOCOF for ticket receipt, dispatch and handling.
- 3.10.8** The Owner shall receive with each invoice for payment, a report containing a listing of all ticket dispatched and received for the Owner's Member Service Code. The report shall contain each individual ticket number as well as the date and time received and the disposition code associated with each ticket. The Owner shall receive two copies of said report with each application for payment.

3.11 Screened and Cleared Tickets

- 3.11.1** Since the SSOCOF is an imperfect system, the Owner may receive Request to Locate tickets that are technically outside the Owner's Member Service Area, or outside the Owner's legal responsibility to provide services such as; private or commercial property outside of the public rights-of-way.
- 3.11.2** And, since all tickets received by the Owner or his designate are required to receive a response, there shall be a means by which the Contractor can screen, review and respond to such requests.
- 3.11.3** Request to Locate tickets received by the Contractor and determined to be outside the Owner's Member Service Area, or determined to be outside the legal response requirements, shall be closed and noted as screened and cleared by utilizing the SSOCOF applicable close code.
- 3.11.4** Such a response by the Contractor is less costly in that in most cases, no physical presence at the site was necessary and the ticket can generally be immediately cleared. For these cases, a reduced rate of charge is in order.
- 3.11.5** Payment for this item shall be made at one unit quantity for each SSOCOF screened and cleared without need of physical response to the site.

3.12 Three-Dimensional Radar Services (GPiR) General Notes:

- 3.12.1** GPiR is generally used for purposes of design and does not provide a real-time output. GPiR data must be processed into 3D imagery using sophisticated software and computer systems.
- 3.12.2** GPiR is utilized for scanning congruent areas and providing a 3D image of the scanned area.
- 3.12.3** GPiR requires the establishment of a survey baseline from which the system is tracked via survey instrument to produce geospatially accurate location of the subsurface data.
- 3.12.4** The collected GPiR data is processed into 3D images and plotted in various CADD formats (Owner specified) for use in design or GIS applications.
- 3.12.5** Deliverables from the use of GPiR include CADD files, JPEG image slices, Quick Time or AVI movies of slice imagery, PDF files of CADD work, a suggested exploratory excavation sheet and an analysis of the area imaged.
- 3.12.6** The final GPiR output can be certified by a Professional Surveyor as to the accuracy of the imaged area and the position of the facilities imaged within.
- 3.12.7** GPiR is quantified by the square foot of surface area imaged. Payment for GPiR services will be made on a per square foot basis. The cost per square foot includes performing survey baseline establishment, transportation of equipment and personnel to the project site, collection of radar image data, processing of image data and compilation into CADD deliverables including, certification by a registered surveyor.

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see How to get a TIN on page 3.

or								
Employer identification number								

Note: If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Part II Certification

Under penalties of perjury, I certify that:

- The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
- I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
- I am a U.S. person (including a U.S. resident alien).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. (See the instructions on page 4.)

Purpose of Form

A person who is required to file an information return with the IRS, must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

U.S. person. Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

- Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
- Certify that you are not subject to backup withholding, or
- Claim exemption from backup withholding if you are a U.S. exempt payee.

Note: If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Foreign person. If you are a foreign person, use the appropriate Form W-8 (see Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Entities).

Nonresident alien who becomes a resident alien.

Generally, only a nonresident alien individual may use the terms of a tax treaty to reduce or eliminate U.S. tax on certain types of income. However, most tax treaties contain a provision known as a "saving clause." Exceptions specified in the saving clause may permit an exemption from tax to continue for certain types of income even after the recipient has otherwise become a U.S. resident alien for tax purposes.

If you are a U.S. resident alien who is relying on an exception contained in the saving clause of a tax treaty to claim an exemption from U.S. tax on certain types of income, you must attach a statement that specifies the following five items:

- The treaty country. Generally, this must be the same treaty under which you claimed exemption from tax as a nonresident alien.
- The treaty article addressing the income.
- The article number (or location) in the tax treaty that contains the saving clause and its exceptions.
- The type and amount of income that qualifies for the exemption from tax.
- Sufficient facts to justify the exemption from tax under the terms of the treaty article.

Example. Article 20 of the U.S.-China income tax treaty allows an exemption from tax for scholarship income received by a Chinese student temporarily present in the United States. Under U.S. law, this student will become a resident alien for tax purposes if his or her stay in the United States exceeds 5 calendar years. However, paragraph 2 of the first Protocol to the U.S.-China treaty (dated April 30, 1984) allows the provisions of Article 20 to continue to apply even after the Chinese student becomes a resident alien of the United States. A Chinese student who qualifies for this exception (under paragraph 2 of the first protocol) and is relying on this exception to claim an exemption from tax on his or her scholarship or fellowship income would attach to Form W-9 a statement that includes the information described above to support that exemption.

If you are a **nonresident alien or a foreign entity** not subject to backup withholding, give the requester the appropriate completed Form W-8.

What is backup withholding? Persons making certain payments to you must under certain conditions withhold and pay to the IRS 30% of such payments (29% after December 31, 2003; 28% after December 31, 2005). This is called "backup withholding." Payments that may be subject to backup withholding include interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

You will **not** be subject to backup withholding on payments you receive if you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return.

Payments you receive will be subject to backup withholding if:

1. You do not furnish your TIN to the requester, or
2. You do not certify your TIN when required (see the Part II instructions on page 4 for details), or
3. The IRS tells the requester that you furnished an incorrect TIN, or
4. The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only), or
5. You do not certify to the requester that you are not subject to backup withholding under 4 above (for reportable interest and dividend accounts opened after 1983 only).

Certain payees and payments are exempt from backup withholding. See the instructions below and the separate **Instructions for the Requester of Form W-9.**

Penalties

Failure to furnish TIN. If you fail to furnish your correct TIN to a requester, you are subject to a penalty of \$50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

Civil penalty for false information with respect to withholding. If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a \$500 penalty.

Criminal penalty for falsifying information. Willfully falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

Misuse of TINs. If the requester discloses or uses TINs in violation of Federal law, the requester may be subject to civil and criminal penalties.

Specific Instructions

However, if you have changed your last name, for instance, due to marriage without informing the Social Security Administration of the name change, enter your first name, the last name shown on your social security card, and your new last name.

Generally, individuals (including sole proprietors) are not exempt from backup withholding. Corporations are exempt from backup withholding for certain payments, such as interest and dividends.

Note: *If you are exempt from backup withholding, you should still complete this form to avoid possible erroneous backup withholding.*

Exempt payees. Backup withholding is **not required** on any payments made to the following payees:

1. An organization exempt from tax under section 501(a), any IRA, or a custodial account under section 403(b)(7) if the account satisfies the requirements of section 401(f)(2);
2. The United States or any of its agencies or instrumentalities;
3. A state, the District of Columbia, a possession of the United States, or any of their political subdivisions or instrumentalities;

Interest and dividend payments	All exempt recipients except for 9
Broker transactions	Exempt recipients 1 through 13. Also, a person registered under the Investment Advisers Act of 1940 who regularly acts as a broker
Barter exchange transactions and patronage dividends	Exempt recipients 1 through 5
Payments over \$600 required to be reported and direct sales over \$5,000 ¹	Generally, exempt recipients 1 through 7 ²

¹ See Form 1099-MISC, Miscellaneous Income, and its instructions.
² However, the following payments made to a corporation (including gross proceeds paid to an attorney under section 6045(f), even if the attorney is a corporation) and reportable on Form 1099-MISC are **not exempt** from backup withholding: medical and health care payments, attorneys' fees; and payments for services paid by a Federal executive agency.

Part I. Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. If you are a **resident alien** and you do not have and are not eligible to get an SSN, your TIN is your IRS individual taxpayer identification number (ITIN). Enter it in the social security number box. If you do not have an ITIN, see **How to get a TIN** below.

If you are a **sole proprietor** and you have an EIN, you may enter either your SSN or EIN. However, the IRS prefers that you use your SSN.

If you are a single-owner **LLC** that is disregarded as an entity separate from its owner (see **Limited liability company (LLC)** on page 2), enter your SSN (or EIN, if you have one). If the LLC is a corporation, partnership, etc., enter the entity's EIN.

Note: See the chart on page 4 for further clarification of name and TIN combinations.

How to get a TIN. If you do not have a TIN, apply for one immediately. To apply for an SSN, get **Form SS-5**, Application for a Social Security Card, from your local Social Security Administration office or get this form on-line at www.ssa.gov/online/ss5.html. You may also get this form by calling 1-800-772-1213. Use **Form W-7**, Application for IRS Individual Taxpayer Identification Number, to apply for an ITIN, or **Form SS-4**, Application for Employer Identification Number, to apply for an EIN. You can get Forms W-7 and SS-4 from the IRS by calling 1-800-TAX-FORM (1-800-829-3676) or from the IRS Web Site at www.irs.gov.

If you are asked to complete Form W-9 but do not have a TIN, write "Applied For" in the space for the TIN, sign and date the form, and give it to the requester. For interest and dividend payments, and certain payments made with respect to readily tradable instruments, generally you will have 60 days to get a TIN and give it to the requester before you are subject to backup withholding on payments. The 60-day rule does not apply to other types of payments. You will be subject to backup withholding on all such payments until you provide your TIN to the requester.

Note: Writing "Applied For" means that you have already applied for a TIN or that you intend to apply for one soon.

Caution: A disregarded domestic entity that has a foreign owner must use the appropriate Form W-8.

Part II. Certification

To establish to the withholding agent that you are a U.S. person, or resident alien, sign Form W-9. You may be requested to sign by the withholding agent even if items 1, 3, and 5 below indicate otherwise.

For a joint account, only the person whose TIN is shown in Part I should sign (when required). Exempt recipients, see **Exempt from backup withholding** on page 2.

Signature requirements. Complete the certification as indicated in 1 through 5 below.

1. Interest, dividend, and barter exchange accounts opened before 1984 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

2. Interest, dividend, broker, and barter exchange accounts opened after 1983 and broker accounts considered inactive during 1983. You must sign the certification or backup withholding will apply. If you are subject to backup withholding and you are merely providing your correct TIN to the requester, you must cross out item 2 in the certification before signing the form.

3. Real estate transactions. You must sign the certification. You may cross out item 2 of the certification.

4. Other payments. You must give your correct TIN, but you do not have to sign the certification unless you have been notified that you have previously given an incorrect TIN. "Other payments" include payments made in the course of the requester's trade or business for rents, royalties, goods (other than bills for merchandise), medical and health care services (including payments to corporations), payments to a nonemployee for services, payments to certain fishing boat crew members and fishermen, and gross proceeds paid to attorneys (including payments to corporations).

5. Mortgage interest paid by you, acquisition or abandonment of secured property, cancellation of debt, qualified tuition program payments (under section 529), IRA or Archer MSA contributions or distributions, and pension distributions. You must give your correct TIN, but you do not have to sign the certification.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to provide your correct TIN to persons who must file information returns with the IRS to report interest, dividends, and certain other income paid to you, mortgage interest you paid, the acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA or Archer MSA. The IRS may also provide this information to the Department of Justice for civil and criminal litigation, and to cities, states, and the District of Columbia to carry out their tax laws. We may also disclose this information to other countries under a tax treaty, or to Federal and state agencies to enforce Federal nontax criminal laws and to combat terrorism.

You must provide your TIN whether or not you are required to file a tax return. Payers must generally withhold 30% of taxable interest, dividend, and certain other payments to a payee who does not give a TIN to a payer. Certain penalties may also apply.

APPENDIX "A"

Definitions:

1. **Business Day:** Any day other than Saturday, Sunday or any legal federal, state or local holiday
2. **Excavation:** Any operation in which earth, rock or other material on or below the surface of the ground is moved or otherwise displaced by any means (except the tilling of soil less than twelve (12) inches in depth for agricultural purposes, or road and ditch maintenance that does not change the original road grade or ditch flow line).
3. **Excavation Site:** The area where an Excavator intends to perform or actually performs Excavation
4. **Excavator:** Any person who engages directly in Excavation and/or the designee of Excavation, and who requests the location of Underground Facilities.
5. **Excavator Notification:** Notification given to the Excavator that Underground Facilities are not present at the Excavation Site
6. **Facility Owner:** The owner of a specific Underground Facility
7. **Identified, But Un-locatable:** An Underground Facility, the presence of which is known but which cannot be field marked with Reasonable Accuracy (as defined in Part II, Item 2.6, Definitions). Alternate methods such as GPR or Vacuum Excavation must be used to obtain the accurate position of the facility. GPS readings will be taken to provide future reference of the facility location.
8. **Locate Request:** Notice of proposed Excavation made by an Excavator to the One-Call Locator Service Center
9. **Locatable Underground Facility:** An Underground Facility which can be field marked with Reasonable Accuracy (as defined in Part II, Item 2.6, Definitions) by using devices capable of identifying and locating underground facilities within the required range of accuracy, or by use of Owner provided Maps, Records, and GIS.
10. **Reasonable Accuracy:** By Definition A Tolerance zone shall exist encapsulating an area within twenty-four (24) inches of the outside dimensions of both sides of an Underground Facility.
11. **Underground Facility:** Any item buried or placed below the surface of the ground for use in connection with the storage or conveyance of potable water, sewage, raw water, reused water, electronic communications.
12. **Standard Locate:** Most of the locates are standard and can be defined as those locates that can be done with the use of Radio Frequency (RF) locators, and/or based on the accurate information provided in the Facility system plans, GIS, and/or guided by superficial Facility components such as valves, hydrants, manholes, others.
13. **Standard Locate – Street Illumination Lighting:** Most of the locates are standard and can be defined as those locates that can be done with the use of conductive radio frequency (RF) locators, and/or based on the accurate information provided in the facility system plans, GIS, and/or guided by superficial

facility components such to include by not limited to: electrical conduit, optical cable, electrical junction boxes, communications cable, sign control panels, electrical switches and relays.

14. Locate with Ground Penetrating Radar (GPR): GPR technology allows location of underground utilities made of non-conductive materials such as concrete, clay, PVC and others. It can be used as a second option to locate underground utilities. GPR requires expensive equipment and a highly trained specialist to operate it. It also requires significantly more time than Standard Locates. As with all technology, it has its limitation. In some cases factors such as depth of the Facility, water content of the soil, water table and type of soil, may limit the ability of the equipment to effectively locate the underground Facility.

15. Locate with Vacuum Excavation: When Standard Locates techniques and GPR fails, the alternative is to locate the underground Facility with a process of trial and error, soft digging until the Facility is exposed. Soft Digging can also be used when the invert elevation of a Facility is required.

16. Locate with Three-Dimensional Radar Technologies: A Subset patented technologies recognized as "GPiR" Systems, Ground Penetrating *Imaging* Radar Capable of providing detailed three-dimensional subsurface images. DPiR technologies have been tested and utilized for more than ten-years in surveys in major cities in the US and Europe. These systems utilize a highly efficient GPR array which can be towed or pushed by a vehicle or similar equipment at speeds of 1 to 3 km/h.

these systems rely on precise geometry control provided by a self-tracking laser theodolite or GPS (Global Positioning system). As the GPiR array moves along the ground, the system records the geometry data and independently from the radar data and merged the two data streams using information provided by an internal trigger wheel that controls firing of the radar antennas. As part of standard GPiR surveys, the service provider also performs and provides a map of surface features such as curbs, manholes, valve covers, fire hydrants and light posts to provide a reference map for the final 3D radar images.

3D GPiR images clearly show the shape and depth of buried pipes and other underground structures, such as trench walls or concrete footings. GPiR images also contain information about the material composition of buried structures (metal vs. plastic), approximate size and soil conditions. Special patented image processing software is used to extract and highlight utility lines and conduits.
