4. I am currently not involved in a club.
5. I would be able to attend regular committee meetings.
6. I would like to see better access to public infrastructure for commuters in the city.

Please answer these five questions above. 1. Why do you want to join the committee? 2. Have you attended any committee meetings? If so, how many? 3. What knowledge, skills, and abilities would you bring to the committee if appointed? 4. What other organizations, clubs, or associations are you involved in? 5. Are you available to attend regular committee and subcommittee meetings? Regular meetings are held monthly with subcommittee meetings held as needed. 6. What types of projects would you like to see the committee work on?

Are you interested in serving on more than one board/committee?*

Yes

If so, how many?*

2

Applicant must attend at least one board/committee meeting prior to consideration of application for every board applied. Please list board/committee meetings you attended in the last year?*

I did not attend

Are you currently on a County or City Board?*

No

If yes, please describe

If you are applying for a board / committee, which has specific requirements / categories, please detail how your background and/or experience meets the required criteria.*

My background not only comes from a more practical hands-on approach, but also a design driven approach. I have held many leadership positions in both university and work, and I find that I would be a key player in such a role.

Please describe your professional and/or volunteer experience or background, which best qualifies you for selection to the board / committee.*

My work experience can be shown in my online portfolio. The link is <https://www.cainewilson.com/>. I have volunteered through university clubs as well as leadership positions in my fraternity. I would say that both would contribute well.

Are you presently employed by the City of Hollywood?*

No

If so, in what capacity?*

Not currently employed.

EDUCATION

Politecnico di Milano (2023 – 2024)

Emphasis: Masters in Yacht Design

Clemson University (2018 – 2022)

Emphasis: B. S. Industrial Engineering

WORK RELATED EXPERIENCE

Advanced Product Engineer

Invincible Boat Company

January 2024-Present

Opa-Locka, FL; Mérida, Mexico

- Audited and built documentation for lamination processes, supported cloth and core kitting for the infusion of large parts, and revised lamination schedules at the Mérida manufacturing facility
- Lead mold modification projects to bring infusion capabilities to production tooling
- Trained engineers and laminators vacuum assisted resin infusion (VARI) and transferred production processes from hand layup to infusion on hulls, deck liners, and ring decks across all models
- Designed an infusion manifold for the 36' Catamaran to implement a process change to primary bond stringers and bulkheads within the hull and its paneling within the same infusion process
- Assisted in the product design and production implementation of the new 36' Catamaran by guiding rework procedures on the prototype boat, building and revising engineering drawings and build book
- Developed assembly models within Solidworks to reflect internal part numbering schemes, build stages, and updated surface models to reflect part geometry from tooling changes
- Defined project scopes, performed drawings, built documentation and Bills of Materials, managed production integration, and ensured client expectations of custom options within production models
- Managed communication, product design work, and part revisions with vendors and 3rd parties for new options of products and components
- Implemented new components and products on production models such as drum windlasses, Seakeeper Ride systems, trolling motors, and Seakeeper gyroscopes and brackets
- Designed a model refresh to include a new dual row seating arrangement on an existing production model while minimizing additional tooling investments
- Audited and revised build processes within the 46' Catamaran Pilothouse to decrease production variation, improve quality, revise interior components, and to ensure ABYC regulatory compliance
- Audited assembly processes to ensure compliance with ABYC regulations and lead efforts to resolve regulatory compliance issues with quality control and production teams

Junior Production Manager

Eurocompositi S.R.L

September 2023-November 2023

Massa, Tuscany, Italy

- Acquired practical fabrication knowledge regarding the process of vacuum assisted resin infusion (VARI), and the construction and assembly of multideck ship structures
- Assisted in fabrication and closing of structural diesel tanks within the hulls of Riva production yachts
- Researched elements of the VARI process to support experimentation and analysis of resin flow with different experimental considerations
- Supported a Six Sigma project to optimize the setup of the VARI process to reduce material waste, standardize infusion manifolds, and understand changes in resin flow between different lamination schedules, geometries, and inclinations
- Contributed analysis of lean manufacturing principles within the Six Sigma project to study the cost differences between hand-layup construction and the VARI process considering cost savings of resin

usage when lowering resin-to-glass ratios and differences in Value-Added processes between the two composite fabrication typologies

- Assisted in project management of the composite construction, fairing, and assembly of the 110' Riva Dolce Vita Yacht at different production stages

Industrial Engineering Intern

Invincible Boat Company

May 2021–December 2021

Opa Locka, FL; Mérida, Mexico

- Documented the build processes of monohull and catamaran boats with attention to lamination techniques specific to hull type, order and typology of knitted fabrics used, laminate ply overlapping, atmospheric clamping of closed-cell PVC core, gel times and peak exotherm temperatures of materials, and cycle times of lamination procedures
- Built work instructions for lamination and assembly procedures to be implemented within production
- Reviewed and revised lamination schedules for hulls, ring decks, deck liners, stringers, hardtops, and small parts under the direction of the engineering department
- Taught engineers and laminators the build procedures, lamination techniques, and rework procedures of the 33' and 36' monohull boats at the Mérida, Mexico manufacturing facility
- Performed gel time studies on resin and gelcoat materials with suppliers with an emphasis on observing viscosity and styrene gassing between the use of different MEKP catalysts and weight percent catalyst levels
- Worked alongside the engineering team to identify issues and execute solutions to improve both the manufacturing process and the assembly of fiberglass parts
- Tested and implemented different core bonding compounds to increase the strength, and to decrease voids and weight in hardtop construction
- Documented and assigned internal identification numbers of materials, internal tools, FRP molds, and FRP parts into a Bill of Materials
- Assisted in new product integration of the 33' Catamaran by reviewing the assembly and lamination procedures of the first prototype and developed work instructions for manufacturing

Boat Building and Marine Restoration Specialist

Charlie's Custom Marine LLC,

January 2020 – February 2022

Anderson, SC

- Executed bodywork, fairing, paint preparation, and gelcoat tooling for restoration procedures
- Built stringers, structural knees, transoms, floors, settees, and other structural fiberglass panels
- Completed mold preparation with consoles, outboard cowlings, and hull extension molds
- Completed fabrication of fiberglass molded parts
- Assembled and rigged outboard and inboard engines to dashboards and other marine accessories
