## Humphries House

5405 North Surf Road
Hollywood, FL 33019

## LEGAL DESCRIPTION

LOTS 17, BLOCK 193, OF 'HOLLYWOOD CENTRAL BEACH', ACCORDING TO THE PLAT THEREOF, RECORDED IN PLAT BOOK 4, PAGE 20, OF THE PUBLIC RECORDS OF BROWARD COUNTY, FLORIDA.

## PROJECT INFORMATION

The design intent for this project is to develop a new (3) three Story new home comparable in footprint, massing and height to the recent homes constructed in the immediate area of Surf road. However, this design is more modern, with expressive materials including:

- Smooth architectural finished concrete walls
- Ample glass for thru property transparency
- Stone veneer finish
- Wood garage door
- Dark painted aluminum frames
- Ample landscaping
- Stainless steel railings

The total $A / C$ square footage of the new house is 3,635 square feet split into (3) three floor with the roof to be utilized as a sun deck to take advantage of direct ocean views. The new house is located on the east side of Surf Road directly facing the ocean. The design creates a dynamic structure along Surf Road with well-proportioned interior spaces and allows for the maximum use of the property.

Humphries Beach House<br>5405 North Surf Road<br>Hollywood, FL 33019<br>Applicable Criteria

VARIANCE - TO AMEND THE CONDITION OF THE COVERED ROOF DECK, SECTION 4.22(E)(15)
TO ALLOW FOR A SCENERY LOFT FROM 10\% TO 40\% OF THE FIRST OR GROUND FLOOR
AREA, THE 40\% EQUATES TO $29 \%$ OF THE ROOF LEVEL.

## CRITERIA 1

The requested Variance maintains the basic intent and purpose of the subject regulations particularly as it affects the stability and appearance of the city.

Analysis:
Our proposed design "sculpts" the overall massing of each level of the house, and the ground floor has the smallest footprint compared to the upper and roof areas. Our commitment to reduce the massing of the overall house, particularly as it relates to the ground floor, aligns with the overall massing of homes in this specific neighborhood, and the addition of a functional, safe rooftop structure, open on all sides, is compatible and in-line with previously constructed homes in this neighborhood.

This variance allows for the continuity of an integrally designed rooftop structure that does not exceed previously approved variances while providing a functional and usable rooftop terrace that takes advantage of the spectacular oceanfront views of this property.

## CRITERIA 2

That the requested Variance is otherwise compatible with the surrounding land uses and would not be detrimental to the community.

## Analysis:

The roof deck variance is necessary to complete the function and safe level incorporated into a dynamic design that is compatible with the overall massing of the recently completed homes in this area of the North Beach Development District. As these are found in numerous homes in this area, the variance will not be detrimental to the community and instead offers a more complete, compatible design to this area.

## CRITERIA 3

That the requested Variance is consistent with and in further of the Goals, Objectives, and Policies of the adopted Comprehensive Plan, as amended from time to time, the applicable Neighborhood Plan, and all other similar plans adopted by the city.

Analysis:
The proposed design is consistent with the goals, objectives, and policies of the adopted comprehensive plan as identified in numerous other similar 3-story with rooftop deck buildings in this area that have similar rooftop decks and covered areas.

## CRITERIA 4

That the need for requested Variance is not economically based or self-imposed.
Analysis:
The requested variance is the minimum amount needed to provide a functional, safe rooftop structure that is open on all sides, for the homeowners and their guests to gather out of the sun, while still compatible and in line with previously approved rooftop variance in this neighborhood. Maintaining a proportionate roof design complies with several similar 3-story buildings with roof decks in this immediate area of North Beach Development District.

This variance allows for the continuity of an integrally designed rooftop structure that does not exceed previously approved variances while providing a functional and usable rooftop terrace that takes advantage of the spectacular oceanfront views of this property.

## CRITERIA 5

That the Variance is necessary to comply with State or Federal Law and is the minimum Variance necessary to comply with the applicable law.

January 17, 2023

RE: $\quad 5405$ North Surf Road, Hollywood, FL 33019
To Whom It May Concern:
We are Stephen and Jodi Straley and have lived adjacent to the above referenced property at 5409 North Surf Road, Hollywood, Florida 33019 for approximately 35 years. We are writing to the City of Hollywood to express our support for the proposed project and variance requests for 5405 North Surf Road as we previously did in 2017.

We understand that Heidi Humphries, the current owner, and Craig Chassen, our neighbor, have been working together on this project for the past year. We have had several conversations with Craig pertaining to the vision for the construction of the new residence on the existing lot. We support their variance request for the reduction of the side setback of 7.5 ft to 5 ft on both the north and south property lines based on the current drawings and sketches Craig has provided us. In addition, they have told us they will not build or erect anything more than 10 feet East of the existing house. They have respected our right to privacy and in return have agreed to limit the windows on the North side of the house and make the North roof deck wall solid concrete.

We have known Craig for 15 years. He has been an asset to the revitalization of the North Beach community. He has a wealth of building construction and real estate knowledge and expertise. As a licensed Realtor, he has successfully listed and sold several homes and parcels of land on the barrier island. He also has completed several improvements to his home and even oversaw the construction of a new residential home for his own family. Craig has participated in many different variance requests over the past 10 years and has established relationships with many city officials in the building and zoning divisions and fully understands the variance process. Thank you for your consideration.
