6. DIMENSIONS, QUANTITIES AND SUBSURFACE INFORMATION:

Dimensions, quantities and subsurface information supplied by the City are in no way warranted to indicate true amounts or conditions. SECTION 00100

INSTRUCTIONS TO BIDDERS

All Bids shall remain open for 90 days after the day of the Bid opening. However, the Engineer may, at his sole discretion, release any Bid and return the Bid Guaranty prior to that date. Any Bid may be modified or withdrawn prior to the time scheduled for the opening of Bids.

This information shall be presented on the same day as the bid opening or if the opening is in the afternoon then on the following business day. 15. AWARD OF CONTRACT:

The City Commission reserves the right to reject any or all Bids, or any part of any Bid, to waive any informality in any Bid, or to re-advertise for all or any part of the work contemplated. APPENDIX D TO THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION SUPPLEMENTARY CONDITIONS

American Iron and Steel Requirement

The Contractor acknowledges to and for the benefit of City of Hollywood ("Owner") and the State of Florida (the "State") that it understands that iron and steel products to be installed as a part of this contract must be in compliance with the Federal American Iron Steel (AIS) requirements. For Clean Water SRF funded projects, the AIS requirements can be found in Section 608 of the Federal Water Pollution Control Act (Clean Water Act). Section 608 of the Clean Water Act (33 U.S.C. 1388) includes the following language:

(a) In general

Funds made available from a State water pollution control revolving fund established under this title may not be used for a project for the construction, alteration, maintenance, or repair of treatment works unless all of the iron and steel products used in the project are produced in the United States.

(b) Definition of iron and steel products

In this section, the term "iron and steel products" means the following products made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and construction materials.

(c) Application

Subsection (a) shall not apply in any case or category of cases in which the Administrator finds that—

- (1) applying subsection (a) would be inconsistent with the public interest;
- (2) iron and steel products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or
- (3) inclusion of iron and steel products produced in the United States will increase the cost of the overall project by more than 25 percent.

(d) Waiver

If the Administrator receives a request for a waiver under this section, the Administrator shall make available to the public, on an informal basis, a copy of the request and information available to the Administrator concerning the request, and shall allow for informal public input on the request for at least 15 days prior to making a finding based on the request. The Administrator shall make the request and accompanying information available by electronic means, including on the official public Internet site of the Environmental Protection Agency.

(e) International agreements

This section shall be applied in a manner consistent with United States obligations under international agreements.

For Drinking Water SRF funded projects, the AIS requirements are in Public Law 113-76 and continue in force under continuing resolutions that use similar language, including Section 424 of the "Consolidated Appropriations Act, 2016."

Notwithstanding any other provision of this Agreement, any failure to comply with AIS requirements by the Contractor shall permit the Purchaser or State to recover as damages against the Contractor any loss, expense, or cost (including without limitation attorney's fees) incurred by the Purchaser or State resulting from any such failure (including without limitation any impairment or loss of funding, whether in whole or in part, from the State or any damages owed to the State by the Purchaser). While the Contractor has no direct contractual privity with the State, as a lender to the Purchaser for the funding of its project, the Purchaser and the Contractor agree that the State is a third-party beneficiary and neither this paragraph (nor any other provision of this Agreement necessary to give this paragraph force or effect) shall be amended or waived without the prior written consent of the State.

For waivers to these requirements based on (c) above, contact the State Revolving Fund Program at (850) 245-2835 or SRF.Reporting@dep.state.fl.us.

1) Question: What is the City's overtime rate for inspectors?

ADDENDUM NO. 1

- 2) Question: Can the asphalt pavement reconstruction in the alleys be accomplished in a single 2-inch lift of SP12.5 asphaltic concrete?
Response: Yes. However, the contractor shall be solely responsible for repairing any scratches or gouges observed (no patching allowed) during final walk-throughs.
- 3) Question: We Noted that Pipe Bursting was contained in the Technical Specification, does the city anticipate Pipe Bursting on this project, or is the project to be bid as sole open cut?
Response: Refer to items 1 and 2 above. Bids should be provided based on open-cut methods only.
- 4) Question: Can the pre-bid meeting agenda and sign in sheet be provided?
Response: See attached.
- 5) Question 3: What is the City's project budget?
Response: The project budget established by the City for the project is \$18,000,000.00
- 6) Question 4: There seems to be some discrepancy on the ductile iron fitting coating for Moffett. Below is a picture of the notes on every plan page. Note #1 clearly calls for All to be epoxy coated. I have also attached Spec Section 15060-10 that deals with Pipe & Fittings. (E) calls for fittings to be asphalt coated. Is this correct because this would be a substantial price increase in material?
Response: Refer to item 5 above.
- 7) Question: Within Section 15060, "Pipe and Fittings", page 15060-5, Item D.1, Paragraph #3, the specification states that restrained gaskets must be ACIPCO (Fast Grip) or U.S. Pipe (Field Lok) with no other designs acceptable. Can the McWane "Sure Stop" gasket be added to the list of locking type gaskets that are acceptable for this project?
Response: The City of Hollywood would be happy to meet with the manufacturer's representative and/or evaluate this product. However, there is not enough time to do that prior to the due date of bids for Water Main Replacement Project 14-5122.

ALL OTHER TERMS, CONDITIONS AND SPECIFICATIONS SHALL REMAIN THE SAME.

THIS ADDENDUM SHALL BE ATTACHED TO THE CONTRACT DOCUMENTS AND THE RECEIPT OF THE SAME SHALL BE NOTED IN THE PROPOSAL IN THE SPACE PROVIDED.
