

# UASI 2008 Project Request Template

## Project Summary Tab

1. Complete "Contact Information" Section
2. Insert Project Title (Example: COOP for City of Lake Worth)
3. Select the Target Capability (TCL) that this project enhances.  
These cells are formatted as a drop down list to ensure accuracy.  
When the cell is selected, a drop down arrow will appear to the right of the cell.  
Projects **must** link to at least one Target Capability.  
Consult the Southeast Florida Urban Area Homeland Security Strategy for complete descriptions of these codes.
4. Enter your project description. The description should clearly explain how it supports the TCL(s) you selected. It is not enough just to link it to a TCL, but how it supports it towards achieving that capability.
5. Total amount requested. Do not fill in this field. It will automatically populate based on the total figure in the "Line Item Detail" tab.

## Line Item Detail Tab

1. Project name & agency will automatically populate based on info entered on the Contact Information on the Project Summary tab.
2. Itemize the components of the project.  
**Important!**  
All items that are equipment related must have an Authorized Equipment List (AEL) number. This is **required!** Items that do not have an AEL will not be considered.  
This list can be accessed and downloaded at <https://www.rkb.mipt.org>.

## Save your file in the following format

PBC UASI 08 LW COOP.xls

NOTE: First few letters should be an abbreviation of your jurisdiction's name.

## Send completed Project Templates to:

*Total amount inserted automatically from Line item Detail tab.*

## Additional Project Summary Information (if needed)

The City of Hollywood is submitting this amendment so it may purchase the following equipment using its 2017 UASI allocation - high definition surveillance cameras with installation, a license plate reader, bleeding control trauma kits, radiological/chemical detectors and access card readers for Hollywood Fire Rescue stations. It is eliminating previously requested projects - SMART boards.
