SINGLE FAMILY HOME DEVELOPMENT
VARIANCE JUSTIFICATION

This proposal letter is to request and substantiate the grant of a Variance for a residence at 5725 Wiley St in the City of Hollywood. The Variance requested is relatively minor. Further, if granted, this Variance will not bring anything but an improvement to the community where it's located.

Therefore, in this request, WEST PARK HOMES LLC ("Petitioner") is the owner of a 5,192 square foot parcel located at 5725 Wiley St which is located almost at the center of Wiley St between SW 58th Avenue and SW 57th Avenue identified by folio #514124121150 ("Property") in the City of Hollywood ("City"). The property is designated as a Low Residential ("LRES") on the City's Future Land Use Map and is zoned RS-6. The property is also currently undeveloped and has always been this way been like this.

In this request the Petitioner proposes to redevelop with a 2,192 square foot single family home ("Project"). The property was platted as Lot 16, Block 75 subdivision of Hollywood Plat, as recorded in Plat Book 26, Page 36 of the Public Records of Broward County, Florida ("Plat").

As indicated in the Plat, which dates back to 1952 and has all records regarding the property, identifies the parcel boundaries for the Property as it continues to exist today, with a width of fifty feet (50'). The platted fifty foot (50') wide lots are consistent with how the community has been developed over years and are continued to be developed until this day. Most lots in this community like the ones that stand next to the Property have continued to been developed maintaining this same width.

The parcels mentioned before located on the east and west of the Property have been developed with single family homes while the Property has maintained its vacancy. Lot 17, the parcel to the west of the Property, was developed with a single family home on a similarly sized lot between the years of 1988 and 1989. Similarly, Lot 15, the parcel immediately east of the Property was developed with a single family home as well between the years of 1985 and 1986.

Therefore, at the time these single family homes were constructed, Lots 15, 16, and 17 were all separate parcels, independent one from another, and under

separate ownership. Following the construction of the home on Lot 17, it was purchased by Geraldine Crawford in 1988, which had various buyers afterwards, the last being Carmen Roxana Lezma in 2013.

It is obvious to notice that most of the lots located in this community were subdivided as fifty foot (50') lots and most have been developed as such, like the ones located on the east and west immediate to the property. At this moment the Property has remained as a fifty foot (50') lot with adjacent parcels which have already been developed as single family homes well about thirty (30) years ago. However, the City's Land Development Code ("Code") has been amended over the years and the RS-6 zoning district, which applies to the Property, now requires a minimum lot width of sixty feet (60').

In conclusion, the existing lot is legally non-conforming. Further, Petitioner cannot expand the lot as the parcels on each side are both developed with single family residences, leaving the property undevelopable under today's code standards. As such, in order to develop the Project, Petitioner respectfully requests the following:

Variance from Section 4.1.B.2.a. of the City's Code to allow minimum lot width of fifty feet (50') in lieu of sixty feet (60') required.

In order to collaborate with this variance, the Petitioner will demonstrate the following:

(a) the variance maintains its original purpose of the subject regulations, as it changes the stability and appearance of the City;

(b) the variance is completely compatible with the surrounding residences and land uses and is will not bring any harm to the community

(c) the variance is persistent with the Goals, Objectives and Policies of the adoptive Comprehensive Plan, the applicable Neighborhood Plan and all other similar plans adopted by the city; and

(d) the need for the variance is not economically based or self imposed; or

(e) the variance is fundamental to comply with State or Federal Law and is the minimum variance necessary to comply with the applicable law.

(a) the variance maintains its original purpose of the subject regulations, as it changes the stability and appearance of the City;

The variance maintains the basic intent and purpose of the subject regulations, as it affects the stability and appearance of the City. The purpose of the single family zoning districts is to protect the character of the single family neighborhoods. As noted above, the Property, and surrounding residential community, was platted in 1952. At this time, the parcels were subdivided to provide for separate lots, roadways and alleys within the community in order to ensure consistent and desirable development of the community. The majority of the platted lots within this portion of the City were subdivided as fifty foot (50') lots intended for single family residential development.

Throughout time, the surrounding community has been developed in accordance with this original subdivision. As previously noted both parcels adjacent to the Property were developed as fifty foot (50') lots as well as many more around the area. This leaves the Property as undevelopable at no fault of the Petitioner. Granting the variance will maintain the purpose of the single family zoning regulations and maintain the stability and appearance of the City.

In this request Petitioner is proposing to develop the property with a beautiful single family home, as permitted in the RS-6 zoning district and consistent with the purpose of the subject regulations. Further, as the surrounding community is developed mostly with lots of a similar width, the stability of this area within the City will not only be maintained but improved with the construction of a new beautiful single family home.

(b) the variance is completely compatible with the surrounding residences and land uses and is will not bring any harm to the community

It is crucial to notice that the variance is otherwise compatible with the surrounding land uses. The surrounding land uses include single family homes to the east, west, north and south of the Property. The parcels immediately east, west, and north of the Property are also fifty foot (50') in width like the existing condition of the Property and the original subdivision of this area of the community.

Further, Petitioner is proposing to develop the Property with a single family home, which is consistent with uses existing within the neighborhood. As such the variance is compatible with the surrounding land uses.

Further, the variance is not detrimental to the community. Rather, the variance will allow for development of this vacant parcel with a new single family home. The new development in the area will enhance the appearance of the community and may help increase property values in the area. This will also add to the tax base of the City as the new construction will result in higher assessed

value of the Property than in its current, vacant condition. As such, granting the variance and allowing for the development of this vacant parcel with a new single family home will not be detrimental to the community.

(c) the variance is persistent with the Goals, Objectives and Policies of the adoptive Comprehensive Plan, the applicable Neighborhood Plan and all other similar plans adopted by the city

The variance is consistent with the Comprehensive Plan. Specifically, the variance is consistent with the following goals, objectives and policies:

- Objective 5: Encourage appropriate infill development. The property's adjacent lots are already developed with single family homes. Petitioner is proposing to develop this vacant lot within the existing residential community with a compatible single family home.
- Policy 4.9: Placing a priority on protecting, preserving and enhancing residential neighborhoods while incorporating the unique characteristics of redevelopment areas: Petitioner is proposing to redevelop the vacant Property with a single family home that will continue to protect and enhance the existing residential neighborhood.
- Policy 6.3 Maintaining zoning and development regulations that implement standards for different residential densities as stated in the Land Use Element: The Project complies with the density permitted for the Residential Low land use.

The variance is also consistent with the permitted uses and allowable density listed in the City's Comprehensive Plan for the Residential Low land use designation. As such, the variance is consistent with and in furtherance of the Goals, Objectives and Policies of the City's adopted Comprehensive Plan.

(d) the need for the variance is not economically based or self imposed

The need for the variance is not economically based or self imposed. As previously noted above, the Property, and surrounding residential community, was platted in 1952. At this time, the parcels were subdivided to provide for separate lots, roadways and alleys within the community in order to ensure consistent and desirable development of the community. The majority of the platted lots within this portion of the City were subdivided as fifty foot (50') lots intended for single family residential development.

Over the years, the surrounding community was developed in accordance with this original subdivision. As previously noted both parcels adjacent to the Property were developed as fifty foot (50') lots as well as many more around the area. At the time these single family homes were constructed, Lots 15, 16, and 17 were all separate parcels, independent one from another, and under separate ownership. Following the construction of the home on Lot 17, it was purchased by Geraldine Crawford in 1988, which had various buyers afterwards, the last being Carmen Roxana Lezma in 2013.

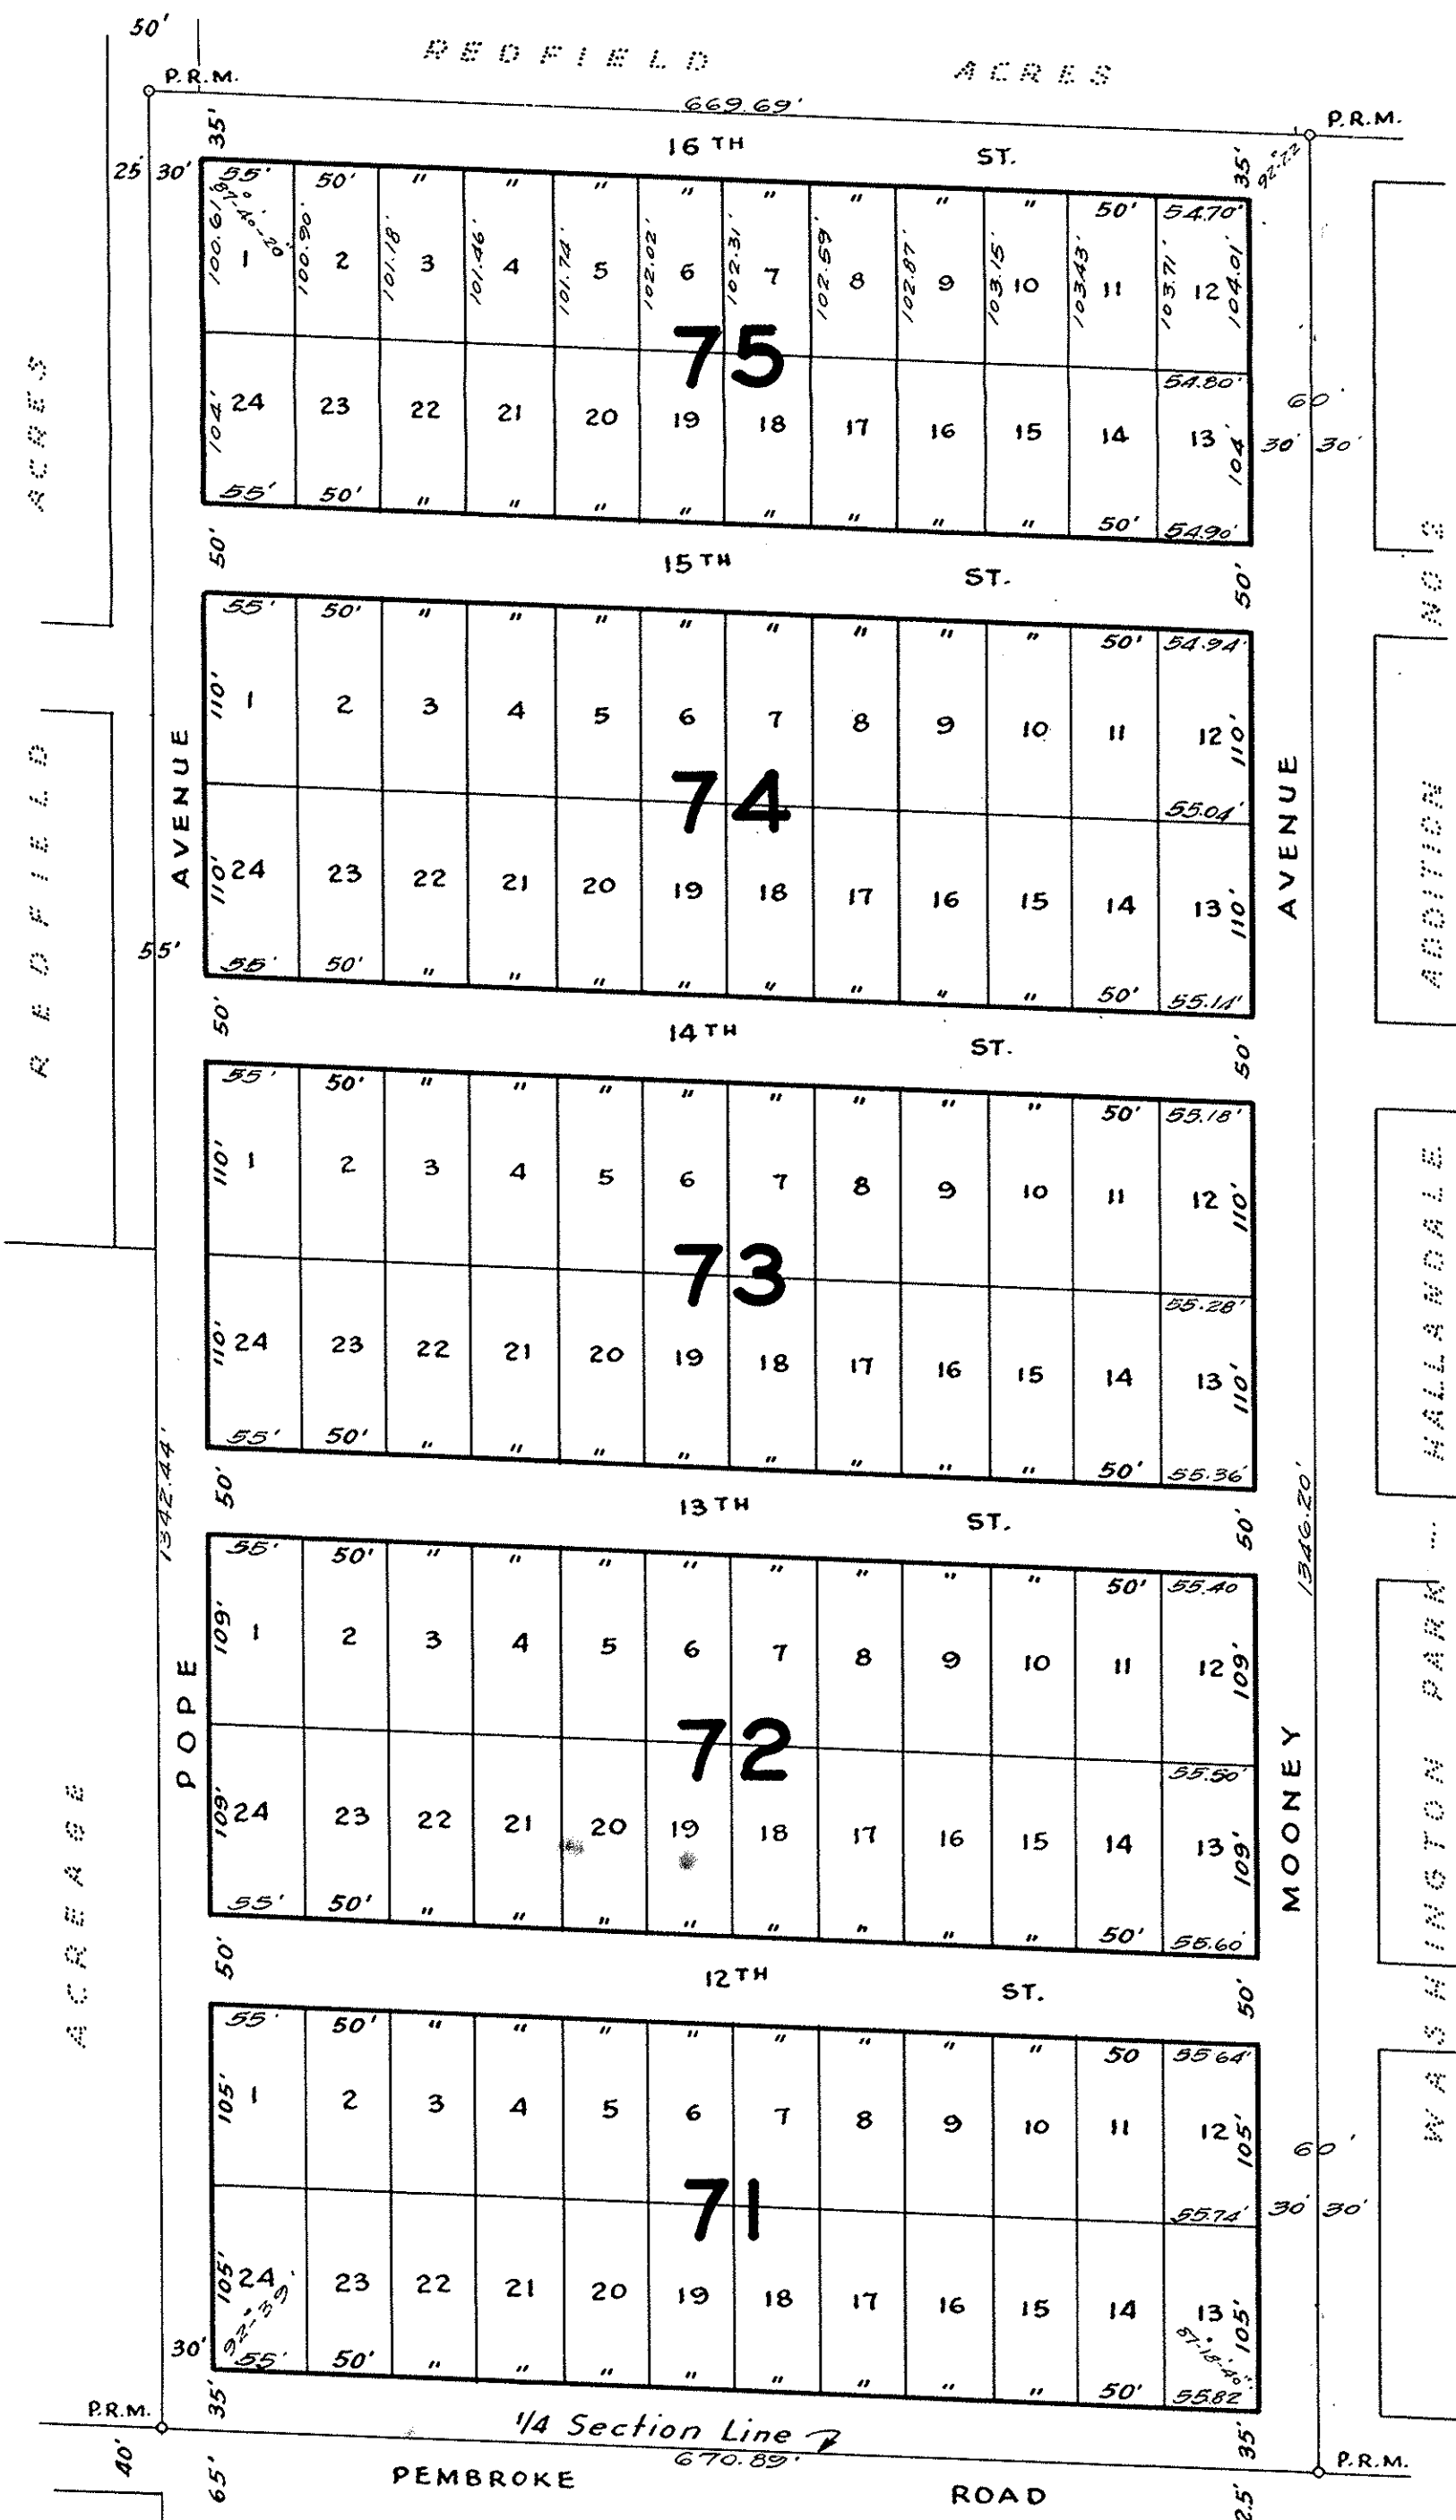

It is important to acknowledge the fact that the Petitioner was not involved in any of these prior transactions and is only seeking to develop the vacant Property with a new single family home that is consistent with much of the development in the surrounding area.

In conclusion, without the variance, the lot is legally non-conforming and Petitioner would not be able to make use of the property for any purpose, despite the original subdivision of the Property almost one hundred (100) years ago and the resulting development pattern within the community. As such, the variance is not economically based or self imposed.

(e) the variance is fundamental to comply with State or Federal Law and is the minimum variance necessary to comply with the applicable law.
