## **GENERAL APPLICATION**

**CERTIFICATION OF COMPLIANCE WITH APPLICABLE REGULATIONS** 

The applicant/owner(s) signature certifies that he/she has been made aware of the criteria, regulations and guidelines applicable to the request. This information can be obtained in Room 315 of City Hall or on our website at <u>www.hollywoodfl.org</u>. The owner(s) further certifies that when required by applicable law, including but not limited to the City's Zoning and Land Development Regulations, they will post the site with a sign provided by the Office of Planning and Development Services. The owner(s) will photograph the sign the day of posting and submit photographs to the Office of Planning and Development Services as required by applicable law. Failure to post the sign will result in violation of State and Municipal Notification Requirements and Laws.

(I)(We) certify that (I) (we) understand and will comply with the provisions and regulations of the City's Zoning and Land Development Regulations, Design Guidelines, Design Guidelines for Historic Properties and City's Comprehensive Plan as they apply to this project. (I)(We) further certify that the above statements and drawings made on any paper of plans submitted herewith are true to the best of (my)(our) knowledge. (I)(We) understand that the application and attachments become part of the official public records of the City and are not returnable.

Signature of Current Owner	Date: 11/29/18

# **Certificate of Product Ratings**

**AHRI Certified Reference Number: 3799429** 

Date: 3/1/2012

Product: Split System: Air-Cooled Condensing Unit, Coil with Blower

Outdoor Unit Model Number: 14AJM49

Indoor Unit Model Number: RHLL-HM4821+RCSL-H\*4821

Manufacturer: RHEEM MANUFACTURING COMPANY

Trade/Brand name: RHEEM 14AJM SERIES

Manufacturer responsible for the rating of this system combination is RHEEM MANUFACTURING COMPANY

Rated as follows in accordance with AHRI Standard 210/240-2008 for Unitary Air-Conditioning and Air-Source Heat Pump Equipment and subject to verification of rating accuracy by AHRI-sponsored, independent, third party testing:

Cooling Capacity (Btuh):46000EER Rating (Cooling):13.00SEER Rating (Cooling):16.00

\* Ratings followed by an asterisk (\*) indicate a voluntary rerate of previously published data, unless accompanied with a WAS, which indicates an involuntary rerate.

## DISCLAIMER

AHRI does not endorse the product(s) listed on this Certificate and makes no representations, warranties or guarantees as to, and assumes no responsibility for, the product(s) listed on this Certificate. AHRI expressly disclaims all liability for damages of any kind arising out of the use or performance of the product(s), or the unauthorized alteration of data listed on this Certificate. Certified ratings are valid only for models and configurations listed in the directory at www.ahridirectory.org.

## **TERMS AND CONDITIONS**

This Certificate and its contents are proprietary products of AHRI. This Certificate shall only be used for individual, personal and confidential reference purposes. Estimated Start Date: (MM/DD/YY) 02/20112 Estimated	ted Finish Date: (MM/DD/YY)	3/3//12
Project Description: REROOF - TILE & FLOI		

Single-family residential home (not for commercial purpose) - If you check this box, skip sections II and III. Review the back of this form and then sign and date this form at the bottom.

## II. PLEASE MARK THE APPROPRIATE BOX(ES) IF APPLICABLE: 1. FACILITY: (Check One)

# Commercial, industrial, or public building

Any residential building with more than four dwelling units

- Two or more residential structures at the same site
- Emergency Any residential property being demolished for commercial purposes or by government order

# 2. ACTIVITY: (Check all that apply)

**Renovations:** Built-up roofing removal (>5580 ft<sup>2</sup>) Exterior alteration (>160 ft<sup>2</sup>) Interior alteration (>160 ft<sup>2</sup>) (Wrecking/dismantling any load-supporting structural member) Demolition: Partial Total

School/College/University

Date:

Unsafe structure

# III. IF ANY BOX IS MARKED UNDER FACILITY AND ACTIVITY THEN THE FOLLOWING ITEMS ARE REQUIRED:

- 1. An original Notice of Demolition or Asbestos Renovation\* DEP form 62-257:900(1) must be filled out and submitted at least ten (10) working-days before start of project, for:
  - all demolitions
  - all renovations involving at least 160 ft<sup>2</sup>, 260 Lft. or 35 ft<sup>3</sup> of regulated asbestos containing material
  - 2. The asbestos survey report must be done in accordance with Broward County Code Chapter 27, Section **180** to indicate the presence or absence of asbestos containing material.
  - 3. Payment of the appropriate fee per fee schedule, if applicable.

I have received information regarding the use of a Florida licensed asbestos professional and understand that I may be subject to the ten (10) working-day advanced notification requirement under the Federal Law regarding demolitions and renovations (See reverse side). Title: Owner/Authorized Agent (Print):

\*Notice of Demolition or Asbestos Renovation form and fee schedule are available at:www.broward.org/air

Is Not Required For Official Use: An Asbestos Survey

# Section E (Tile Calculations)

For Moment-based tile systems, choose either Method 1 or 2. Compared the values for M<sub>r</sub> with the values from M<sub>r</sub>. If the M<sub>r</sub> values are greater than or equal to the M<sub>r</sub> values for each area of the roof, then the tile attachment method is acceptable.

Method 1 "Moment-Based Tile Calculations Per RAS 127"

 $(P_1: \frac{49.2}{82.6} \times \lambda \cdot \frac{.289}{.289} = \frac{14218}{23.871}) - Mg: \frac{6.74}{.744} = M_1 \cdot \frac{7.53}{.744} = M_1$ 

NOAM, 86.61 NOAM, 86.61 NOAM, 86.61

Method 2 "Simplified Tile Calculations Per Table Below"

Required Moment of Resistance (M,) From Table Below 34.4

NOAM, 86.61

M Required Moment Resistance\*

Mean Roof Height		C IN C		and the second second second	
Roof Slope	15'	20'	25'	30'	40'
2:12	[34.4]	36.5	38.2	39.7	42.2
3:12	32.2	34.4	36.0	37.4	39.8
4:12	30.4	32.2	33.8	35.1	37.3
5:12	28.4	30.1	31.6	32.8	34.9
6:12	26.4	28.0	29.4	30.5	32.4
7:12	24.4	25.9	27.1	28.2	30.0

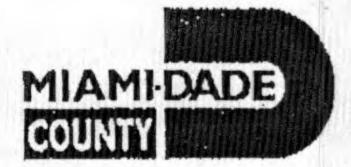

\*Must be used in conjunction with a list of moment-based tile systems endorsed by the Broward County Board of Rules and Appeals.

For Uplift-based tile systems use Method 3. Compared the values for F<sup>1</sup> with the values for F<sub>r</sub>. If the F<sup>1</sup> values are greater than or equal to the F<sub>r</sub> values for each area of the roof, then the tile attachment method is acceptable.

## Method 3 "Uplift-Based Tile Calculations Per RAS 127"

## BUILDING AND NEIGHBORHOOD COMPLIANCE DEPARTMENT (BNC) BOARD AND CODE ADMINISTRATION DIVISION

# NOTICE OF ACCEPTANCE (NOA)

Entegra Roof Tile, Inc. 1289 NE 9<sup>th</sup> Ave. Okeechobee, FL. 34972

# SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed and accepted by Miami-Dade County BNC - Product Control Section to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Section (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BNC reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Section that this product or material fails to meet the requirements of the applicable building code. This product is approved as described herein, and has been designed to comply with the Florida Building Code including the High Velocity Hurricane Zone of the Florida Building Code.

MIAMI-DADE COUNTY PRODUCT CONTROL SECTION

11805 SW 26 Street, Room 208 Miami, Florida 33175-2474 T (786) 315-2590 F (786) 315-2599 <u>www.miamidade.gov/building/</u>

# **DESCRIPTION:** Estate "S" Tile

**LABELING:** Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

**RENEWAL** of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

**TERMINATION** of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

**ADVERTISEMENT:** The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

**INSPECTION:** A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This renews NOA # 10-0518.03 and consists of pages 1 through 6. The submitted documentation was reviewed by Alex Tigera.

NOA No. 11-0510.02 Expiration Date: 08/23/16 1 20 Approval Date: 06/30/11 Page 1 of 6

# **ROOFING ASSEMBLY APPROVAL**

Category: Roofing Sub Category: **Roofing Tiles** Material: Concrete

### SCOPE 1.

This approves a roofing system using Entegra Estate "S" Concrete Roof Tile, as manufactured by Entegra Roof Tile, Inc. in Okeechobee, FL. as described in Section 2 of this Notice of Acceptance, designed to comply with the Florida Building Code for High Velocity Hurricane Zone. For the locations where the pressure requirements, as determined by applicable Building Code, does not exceed the design pressure values obtain by calculations in compliance with RAS 127 using the values listed in section 4 herein. The attachment calculations shall be done as a moment based system.

# **PRODUCT DESCRIPTION**

Manufactured by		Test	Product
Applicant	<b>Dimensions</b>	<b>Specifications</b>	Description
Entegra Estate 'S' Roof Tile	1 = 16-1/2" w = 13"	TAS 112	Low profile, interlocking, extruded concrete roof tile equipped with two nail hole and double roll ribs. For direct deck or battened nail-on, mortar or adhesive set applications
Trim Pieces	l = varies w = varies varying thickness	TAS 112	Accessory trim, concrete roof pieces for use at hips, rakes, ridges and valley terminations. Manufactured for each tile profile.

## TAS 112

01/08/08

# 3. LIMITATIONS:

- 3.1 Fire classification is not part of this acceptance.
- **3.2** For mortar or adhesive set tile applications, a static field uplift test in accordance with TAS 106 may required, refer to applicable building code.
- 3.3 Applicant shall retain the services of a Miami-Dade County Certified Laboratory to perform quarterly test in accordance with TAS 112, appendix 'A'. Such testing shall be submitted to the Building and Neighborhood Compliance Department Product Control Section for review.
- 3.4 Minimum underlayment shall be in compliance with the applicable Roofing Applications Standards listed section 4.1 herein.
- 3.5 30/90 hot mopped underlayment applications may be installed perpendicular to the roof slope unless stated otherwise by the underlayment material manufacturers published literature.
- 3.6 This acceptance is for wood deck applications. Minimum deck requirements shall be in compliance with applicable building code.

NOA No. 11-0510.02 Expiration Date: 08/23/16 Approval Date: 06/30/11 Page 3 of 6

# 4. INSTALLATION

- 4.1 Entegra Estate "S" Concrete Roof Tile and its components shall be installed in strict compliance with Miami Dade County Roofing Application Standard RAS 118, RAS 119, and RAS 120.
- 4.2 Data For Attachment Calculations.

BUILDING AND NEIGHBORHOOD COMPLIANCE DEPARTMENT (BNC) BOARD AND CODE ADMINISTRATION DIVISION

# NOTICE OF ACCEPTANCE (NOA)

Polyfoam Products, Inc. 11715 Boudreaux Road Tomball, TX 77375

## SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed and accepted by Miami-Dade County BNC - Product Control Section to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Section (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BNC reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Section that this product or material fails to meet the requirements of the applicable building code. This product is approved as described herein, and has been designed to comply with the Florida Building Code including the High Velocity Hurricane Zone of the Florida Building Code.

MIAMI-DADE COUNTY PRODUCT CONTROL SECTION 11805 SW 26 Street, Room 208 Miami, Florida 33175-2474 T (786) 315-2590 F (786) 315-2599 www.miamidade.gov/building/

# **DESCRIPTION:** Polypro® AH160

LABELING: Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

**TERMINATION** of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

**ADVERTISEMENT:** The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

**INSPECTION:** A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

CITY OF HOLLYWOOD, FLA.

STRUCTURAL

This renews NOA# 06-0201.02 and consists of pages 1 through 7. The submitted documentation was reviewed by Alex Figera.

 OVED NOA No.: 11-0124.04

 Expiration Date: 05/10/12

 Approval Date: 04/14/11

 1 2012
 Page 1 of 7

# **ROOFING COMPONENT APPROVAL:**

Category: Roofing Sub Category: Roof tile adhesive Materials: Polyurethane

## SCOPE:

This approves Polypro® AH160 as manufactured by Polyfoam Products, Inc. as described in Section 2 of this Notice of Acceptance. For the locations where the design pressure requirements, as determined by applicable building code, does not exceed the design pressure values obtained by calculations in compliance with Roofing Application Standard RAS 127, for use with approved flat, low, and high profile roof tiles system using Polypro® AH 160. Where the attachment calculations are done as a moment based system for single patty placement, and as an uplift based system for double patty systems

# **PRODUCTS MANUFACTURED BY APPLICANT:**

## Product

Dimensions

**Product Description** 

Specifications Polypro® AH160 N/A **TAS 101** Two component polyurethane foam adhesive Foampro® RTF1000 N/A **Dispensing Equipment** ProPack® 30 & 100 **Dispensing Equipment** N/A

# **PRODUCTS MANUFACTURED BY OTHERS:**

Any Miami-Dade County Product Control Accepted Roof Tile Assembly having a current NOA which list moment resistance values with the use of Polypro AH160 roof tile adhesive.

# **PHYSICAL PROPERTIES:**

Property	Test	Results
Density	ASTM D 1622	1.6 lbs./ft.3

# LIMITATIONS:

- 1. Fire classification is not part of this acceptance. Refer to the Prepared Roof Tile Assembly for fire rating.
- Polypro® AH160 shall solely be used with flat, low, & high tile profiles. 2.
- Minimum underlayment shall be in compliance with the Roofing Application Standard RAS 120. 3.
- Roof Tile manufactures acquiring acceptance for the use of Polypro® AH160 roof tile adhesive with 4. their tile assemblies shall test in accordance with TAS 101.
- Roof Tile manufactures acquiring acceptance for the use of HANDI-STICK roof tile adhesive with 5. their tile assemblies shall test in accordance with TAS 101 with section 10.4 as modified herein.

$$\frac{\left(\frac{F}{2}\right) - W}{F' = \frac{MS}{MS}}$$

NOA No.: 11-0124.04 Expiration Date: 05/10/12 Approval Date: 04/14/11 Page 3 of 7

# INSTALLATION:

- Polypro® AH160 may be used with any roof tile assembly having a current NOA that lists uplift resistance values with the use of Polypro® AH160.
- 2. Polypro® AH160 shall be applied in compliance with the Component Application section and the corresponding Placement Details noted herein. The roof tile assembly's adhesive attachment with the use of Polypro® AH160 shall provide sufficient attachment resistance, expressed as an uplift based system, to meet or exceed the uplift resistance determined in compliance with Miami-Dade County Roofing Application Standards RAS 127. The adhesive attachment data is noted in the roof tile assembly NOA
- Polypro® AH160 roof tile adhesive and its components shall be installed in accordance with Roofing Application Standard RAS 120, and Polyfoam Products, Inc. Polypro® AH160 Operating Instruction and Maintenance Booklet.
- Installation must be by a Factory Trained 'Qualified Applicator' approved and licensed by Polyfoam Products, Inc. Polyfoam Products Inc. shall supply a list of approved applicators to the authority having jurisdiction.
- Calibration of the Foampro® dispensing equipment is required before application of any adhesive. The mix ratio between the "A" component and the "B" component shall be maintained between 1.0-1.15 (A): 1.0 (B). The dispense timer shall be set to deliver 0.0175 to 0.15 pounds per tile as determined at calibration. No other settings shall be approved.
   Polypro® AH160 shall be applied with Foampro RTF1000 or ProPack® 30 & 100 dispensing equipment only.
   Polypro® AH160 shall not be exposed permanently to sunlight.
   Tiles must be adhered in freshly applied adhesive. Tile must be set within 2 to 3 minutes after Polypro® AH160 has been dispensed.
   Polypro® AH160 placement and minimum patty weight shall be in accordance with the 'Placement Details' herein. Each generic tile profile requires the specific placement noted herein.

Table 1: Adhesive Placement For Each Generic Tile Profile					
Tile Profile	Placement Detail	Single Paddy Weight Min. (grams)	Two Paddy Weight per paddy Min. (grams)		
Flat, Low, High Profiles	#1	35	N/A		
High Profile (2 Piece Barrel)	#1	17/side on cap and 34/pan	N/A		
Flat, Low, High Profiles	#2	24	N/A		
Flat, Low, High Profiles	#3		8		

# LABELING:

All Polypro® AH160 containers shall comply with the Standard Conditions listed herein.

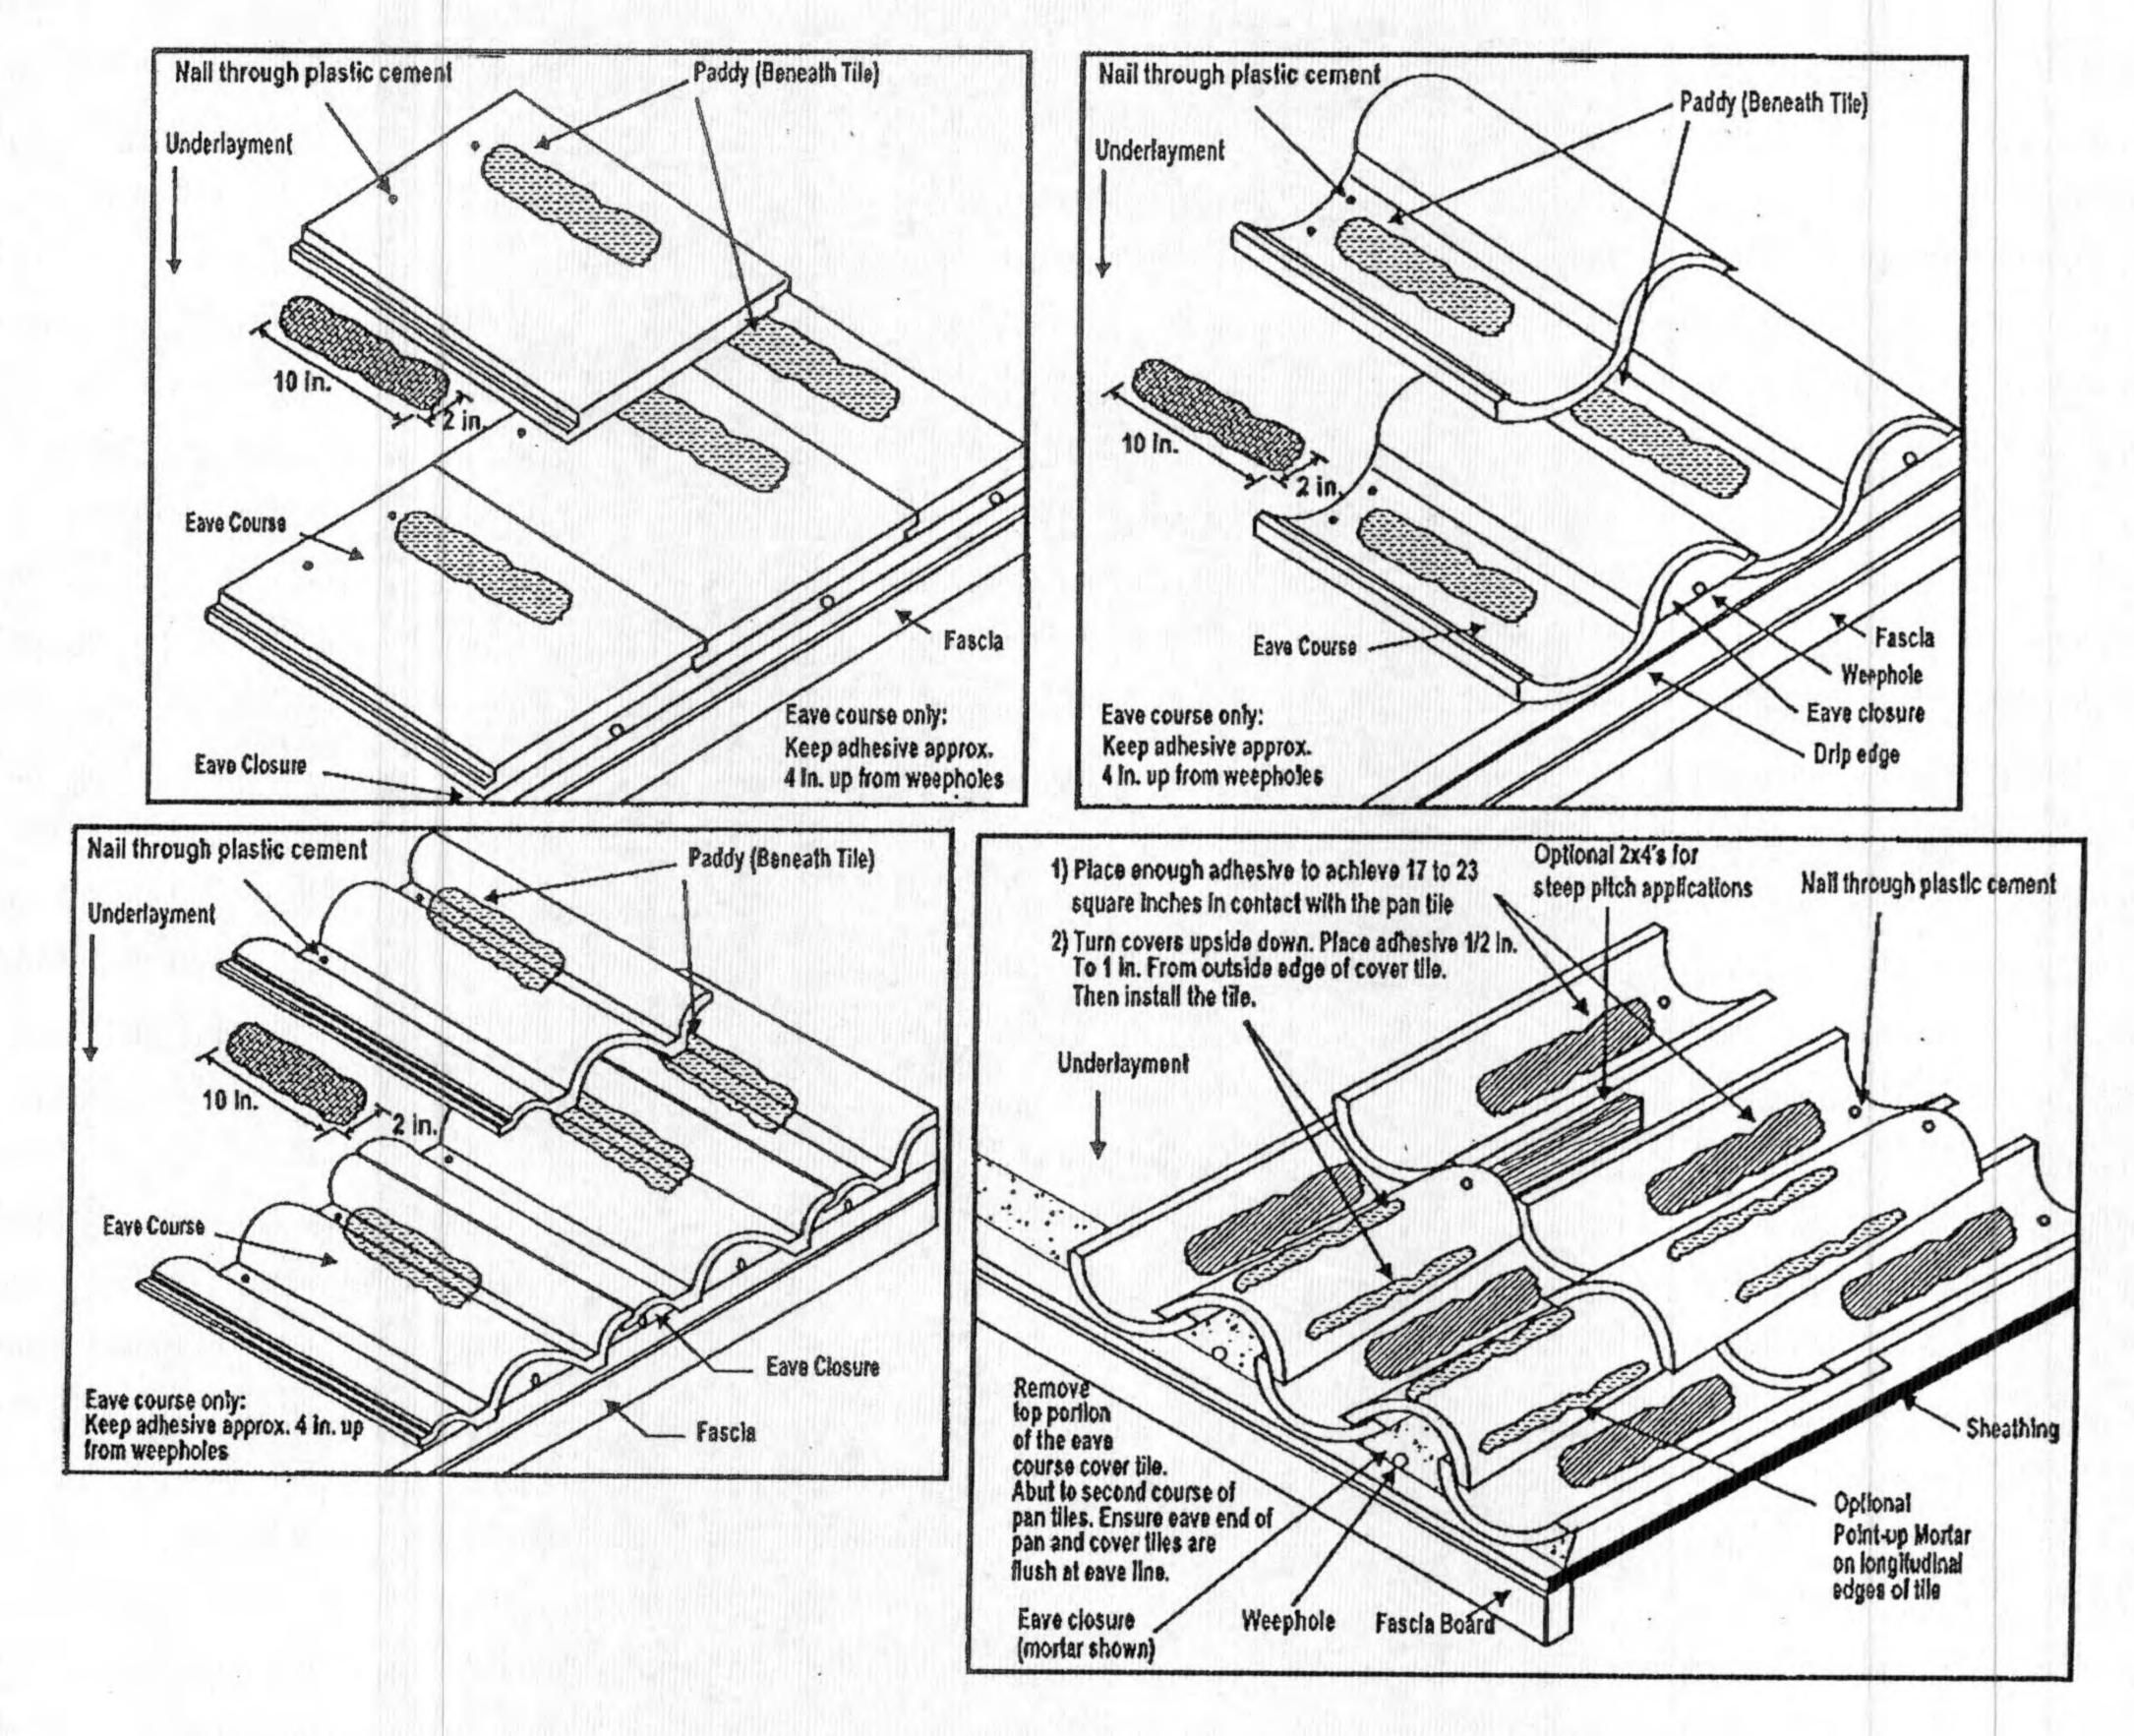

## **BUILDING PERMIT REQUIREMENTS:**

As required by the Building Official or applicable building code in order to properly evaluate the installation of this system.

## **SECTION 1524** HIGH VELOCITY HURRICANE ZONES REQUIRED OWNERS NOTIFICATION FOR ROOFING CONSIDERATIONS

1524.1 As it pertains to this section, it is the responsibility of the roofing contractor to provide the owner with the required roofing permit, and to explain to the owner the content of this section... The provisions of Chapter 15 of the Florida Building Code, Building govern the minimum requirements and standards of the industry for roofing system installations. Additionally, the following items should be addressed as part of the agreement between the owner and the contractor. The owner's initial in the adjacent box indicates that the item has been explained.

6 1. Aesthetics-Workmanship: The workmanship provisions of Chapter 15 (High Velocity Hurricane Zone) are for the purpose of providing that the roofing system meets the wind resistance and water intrusion performance standards. Aesthetics (appearance) issues are not a consideration with respect to workmanship provisions. Aesthetic issues such as color or architectural appearance, that are not part of a zoning code, should be addressed as part of the agreement between the owner and the contractor.

2. Renailing Wood Decks: When replacing roofing, the existing wood roof deck may have to be renailed in accordance with the current provisions of Chapter 16 (High Velocity Hurricane Zones) of the Florida Building Code. (The roof deck is usually concealed prior to removing the existing roof system).

3. Common Roofs: Common roofs are those which have no visible delineation between neighboring units (i.e. townhouses, condominiums, etc.). In buildings with common roofs, the roofing contractor and/or owner should notify the occupants of adjacent units of roofing work to be performed.

A. Exposed Ceilings: Exposed, open beam ceilings are where the underside of the roof decking can be viewed from below. The owner may wish to maintain the architectural appearance; therefore, roofing • nail penetrations of the underside of the decking may not be acceptable. The Florida Building Code provides the option of maintaining this appearance. See Shaled area

() \_\_\_\_\_\_5. Ponding Water: The current roof system and/or deck of the building may not drain well and may cause water to pond (accumulate) in low-lying areas of the roof. Ponding can be an indication of structural distress and may require the review of a professional structural engineer. Ponding may shorten the life expectancy and performance of the new roofing system. Ponding conditions may not be evident until the original roofing system is removed. Ponding conditions should be corrected.

8 KB 6. Overflow scuppers (wall outlets): It is required that rainwater flows off so that the roof is not overloaded from a build up of water. Perimeter/edge walls or other roof extensions may block this discharge if overflow scuppers (wall outlets) are not provided. It may be necessary to install overflow scuppers in accordance with the Florida Building Code, Plumbing.

7. Ventilation: Most roof structures should have some ability to vent natural airflow through the interior of the structural assembly (the building itself). The existing amount of attic ventilation shall not be reduced. It may be beneficial to consider additional venting which can result in extending the service life of the roof.

## CITT of HOLLYWOOL, FLORIDA

DEPARTMENT OF DEVELOPMENT ADMINISTRATION

### PERMIT APPLICATION CHECKLIST

#### GENERAL

Please verify that your permit application package contains all applicable items which are required for permit issuance.

- Permit and Sub Permit application completely filled out
- Two (2) sets of plans drawn to scale (signed and sealed by designer when required by Code)
- Two (2) plot plans or surveys
- Two (2) product approvals (must submit all sheets and additional information required by the approval) for roofs, utility sheds, windows, exterior doors, metal awnings, shutters, skylights, etc.
- · Two (2) sets of energy calculation forms and heating/cooling load calculations
- Proof of approval by Department of Natural Resource Protection for new building, additions to non-residential buildings, bedroom additions on sewer, interior commercial alterations, commercial re-roofs, commercial pools, land clearing and demolition
- Proof of approval by Department of Business Regulation for restaurants
- Proof of approval by HRS, Broward Public Health Unit for septic tanks, ACLF (17 or more residents), bars/ lounges (COP beverage license, no food service and not located in a hotel setting), child care centers, detention facilities, fraternal and civic associations, hospitals, movie theaters, (serving traditional movie house fare), nursing homes, schools, "other" institutional type settings, (churches offering food to the public, for example), bedroom additions on septic tanks, etc.
- Proof of approval by Army Corps of Engineers & Department of Natural Resource for dredge and fill activities
  of structures within jurisdictional waterways
- Occupational license obtained (business locations only)
- Engineer's letter for special inspector
- Sanitation form for trash removal

I have reviewed the checklist, filled it out completely and all applicable items are in my application package in duplicate.

Application is hereby made to obtain a permit to do work and installations as indicated. I certify that no work or installation has commenced prior to the issuance of a permit and that all work will be performed to meet the standards of all laws regulating construction in the City of Hollywood, Florida. understand that a separate permit must be secured for ELECTRICAL WORK, PLUMBING, SIGNS, WELLS, POOLS, BOILERS, TANKS, AIH CONDITIONERS, ETC.

OWNER'S AFFIDAVIT: I certify that all the foregoing information is accurate and that all work will be done in compliance with all applicable laws regulating construction and zoning.

WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOUR PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR AN ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT.

#### DISCLOSURE STATEMENT

Owners of property when acting as their own contractor and providing all material supervision themselves, when building or improving farm outbuildings or one-family or two-family residences on such property for the occupancy of use of such owners and not offered for sale or lease, or building or improving commercial building at a cost of under \$25,000 on such property for the occupancy or use of such owners and not offered for sale or lease. In an action brought under this part proof of the sale or lease, or offering for sale or lease. In an action brought under this part proof of the sale or lease, or offering for sale or lease. This subsection does not exempt any person who is employed by such owner and who acts in the capacity of e contractor.

#### SUBSOIL INVESTIGATION

1134 Jefferson St. Hollywood, Fl.

Dear Sir:

Pursuant to your request, Florida Engineering & Testing has conducted a subsoil investigation on Jan/5/95 at the above referenced site. The purpose of our investigation was to obtain subsoil information relative to a swimming pool foundation design and preparation.

A total of two (2) auger boring test and two (2) static cone penetration test were performed down to a depth of ten (10) feet below existing ground surface. (See attached sheets for locations and soil profiles). The following is a general condition for the subject site:

FROM TO	SOIL DESCRIPTION
0" - 12"	Topsoil & Vegetation
12" - 48"	Tan Sand W/Some Lime Rock
48" - 54"	Black Silty Sand
54 <sup>#</sup> - 78 <sup>#</sup>	Lt. Grey Marl
78" - 96"	Grey Silica Sand
96" -120"	Brown Silica Sand

Water Table Elevation # 24"

The boring logs attached present a detailed description of the soils encountered at each location. The soil stratification shown on the boring logs is based on the examination of recovered soil samples and interpretation of the driller's field logs. It indicates only the approximate boundaries between soil types. The actual transitions between adjacent soil strata may be gradual.

Organic material was encountered in both borings at a depth of 48" below existing grade down to approximately 78" below existing grade. Florida Engineering & Testing should be onsite to monitor the excavation of the organic material to ensure complete removal.

Based on our understanding of the proposed structure and the information obtained from our field boring logs; we recommend the following procedures for foundation preparation:

- Locate pool and deck area, excavate and remove all organic materials and dispose of it.
- All excavations shall maintain a minimum of 2 Horizontal to 1 Vertical (2:1) next to all foundations to prevent undermining of existing footings.
- De-water the bottom of the excavation and compact with a heavy self-propelled vibratory roller to a minimum of 95% of AASHTO T-180C.
- Backfill to proper pool bottom elevation if needed using a clean granular material placed in lifts not to exceed 12 inches in thickness and compacted as per item 3.
- 5) Care should be taken when using vibration in case of existing structures in the vicinity of the construction area. If vibration cannot be used for compaction, static compaction may be applied. However, in this case, the compacted layer should not exceed six (6) inches in thickness.
- 6) All construction fill material shall be clean granular soil, free of organics or other deleterious material, and shall contain no more than five (5) percent fines passing a U.S. Standard No. 200 sieve (0.075mm).
- Verify all densification procedures by taking an adequate number of field density tests probing 12 inches into the underlying soils.

8) Please note that soil material found at depths other then the layer of Topsoil/Vegetation, and organic material is considered clean fill and can be re-used as clean granular material.

The above foundation recommendations being achieved and verified; it is our opinion that the site soils are suitable for the construction of a swimming pool structure with a permissible soil bearing pressure not to exceed 2000 P.S.F.

Regardless of the thoroughness of a geotechnical exploration, there is always a possibility that conditions may be different from those of the test locations; therefore, FLORIDA ENGINEERING & TESTING does not guarantee any subsoil conditions between the bore test holes. The data from these soil borings is for foundation analysis only. It is not to be used for excavating or backfilling estimates.

Florida Engineering & Testing appreciates the opportunity to be of service to you on this project. If you have any questions or comments please feel free to call on us. We would be pleased to help any way we can.

Sincerely

Allen/With, P.E. Florida Engineering & Testing Florida Reg. No. 39681

## ACCEPTANCE No.: 94-0614.03

- APPROVED : JUL 2 5 1994
- EXPIRES : JUL 2 5 1997

### NOTICE OF ACCEPTANCE: SPECIFIC CONDITIONS

I Description:

This approves overhead doors 9'-0 wide x 8'-0 thru 6'-6" high with 24 gauge steel skin, coated with G-60 galvanizing, baked on primer and baked on polyester top coat.

The door shall be constructed and reinforced as detailed in the approved drawing #101182

Model	Ives
78	Flush Panels
91	Smooth Texture
93 or 83	Wood Grain Texture Steel
94 or 84A	Wood Grain Texture & Painted Style

: Lise

This door is approved for a maximum design pressure of -46psf and -48psf and its use is restricted to this pressure. The door passed the impact and cyclic test, therefore it does not require protection devices.

The door shall meet the burglary security requirements of Section 3603.2 (c) 2 (aa) of the South Florida Building Code.

The door operating mechanism (not included in this approval) shall be certified by Underwriter Laboratories or other recognized agency

3 Installation:

The door shall be installed as shown on drawing #101182 or other methods approved by the professional drenof for the structure. Wood in coastst with concrete or cement shall be treated with an approved preservative as set forth in paragraph 29112 (a) (a) or shall be a dumble spece as defined in subprargraph 3912 (a) (a) (a) or the door be done by a dimensional definition of the door and the

METROPOLITAN DADE COUNTY, FLORIDA METRO-DADE FLAGLER BUILDING

# PRODUCT CONTROL NOTICE OF ACCEPTANCE

450 West McNab Road Ft. Lauderdale FL 33309

Your application for Product Approval of Galvanized 18 ga. and 20 ga. Steel Storm Panels

under Chapter 8 of the Metropolitan Dade County Code governing the use of Alternate Materials and Types of Construction, and completely described in the plans, specifications and calculations as submitted by:

Applicant, along with Knezwich & Associates, Inc. Drawings Na. 94-98.1 and Na. 94-98.2 dated 01694, review of w 21.174, signal and seated by V.J. Encarrich, P. E.; Construction Research Laboratory, Inc. Test Reports Na. CRL-S1013 and CRL-S1013, dated 63094, tipped and sealed by Mpin N. Tolot, P.E.

has been recommended for acceptance by the Building Code Compliance office to be used in Dade Courny, Florida under the specific conditions set forth on pages 2 et. seq. and the Standard Conditions on page 3.

This spowed shull be statified for a period of three years. The Office of Code Compliance servers the right to secure the pirodest or material at expinise loss a jobitie or materializatore's plate for sullay cosmol testions. If this product or material faits to perform in the approved manage, the Code Compliance Department may revelve, mosify, or compared the use of public product or material inagentiate's. The Building Code Compliance Department reserves the right to require retesting of this product or material should any manchemes to the South Florids Building Code be constant effecting the product or material should any manchemes to the South Florids Building Code be constant effecting the product or material should any manchemes to the South Florids Building Code be constant effecting the powels or material should any material should any second states of the south or the south of the south or the south of the south

The expense of such seiting will be accurred by the manufacturer.

Acceptance No.: 94-0701.04 (supersedes No.: 93-1201.07)

Received Hardense Kann Con	10 13059297441 P.03	
	APPROVED : 40 1 5 1994	
	EXPIRES : MAR 1 4 1997	

### NOTICE OF ACCEPTANCE: SPECIFIC CONDITIONS

### 1. DESCRIPTION

- 1.1 This approves a galvanized 18 ga. and 20 ga. steel storm panel designed to comply with the South Florida Building Code Impact Test Requirement and ASCE 7.88 "Minimum Design Loads for Buildings and Other Structures", for the following locations:
  - s. Noe-coastal building zone,
  - b. Coastal building zone.

### 2. MATERIAL CHARACTERISTICS

- 2.1. The storm pagels shall be constructed as indicated on approved drawings No.94-98.2 and No.94-98.1, using guivanized 16 gapse (0475° thick) and 20 gaps (0355° thick) steel, with Fy = 4 kai tain. and Fy = 49 kai min, respectively, conforming to ASTM A 446-91 Structural Quality, minimum grade C, with a 6 90 minimum conting.
- 2.2 Panels have a nominal width of 13.00" and a total width of 14.25", forming 1 7/8" deep ribs.
- 2.3 Components shall be aluminum alloys 6063-T6, 2" x 5" x .125" angle and extruded parts.

### 3. LIMITATIONS

- 3.1 The design will be dependent on the maximum panel (span) height;
- 3.1.1 7-11.5" (95.5") for Ceiling/Inside Mount .

3.1.2 8- 5\* (101) for Wali Mount and Build-out Mount; to be installed only as outlined on drawings No. 94-98.1 and No. 94-98.2.

- 3.2.3 Minimum separation to existing plass to protect shall be: 2.1/4" for 18 ga steel panels.
- 3.2.2 Minimum asparation to existing plass to protect shall be: 3 1/8" for 20 ga, steel panels.
- 3.3 Maximum clearance between top of panel and inside of header shall be 1/4".
- 3.4 Seccial Requirement:

Reinforcing fasteners, consisting of a 1/4"-20 x 1" SS sidewalk holts secured with a washered wingmer, located at neidspan, shall be used at overlaps of all panels within the opening.

### 4. INSTALLATION

4.1 The pagels shall be installed only in the following conditions:

<u>Will ident</u> (16 gs. resel parels in CBS opening) (15 gs. 220 gs. pasels on wood family The pacels are secured inside a top track ("It" bracky: at the head, which it enchared to the wall, fatered to the "SAD" continuous suided animum magic as the still, using 14°-20 x 50° reads wathered wingung speced at 13° oc. as shown on approved detailed drawings No. 94-98.1 and N 9+95-23, "Wall hours Section", bearing the Dade County Product Control supervisit samp.

b. Buildout Mount (For both 15 ga, and 20 ga, steel panels)

The panels are fastrined to the "EAB" continuous studded aluminoum angle at the head, using 1/4"  $\times$  5/8" groups wiwashared wingmot spaced at 13" o.e., this angle is secured with 1/4"-20 Marchine screw & nut, spaced at 13" o.e. to a continous 2"  $\times$  5"  $\times$  1/8" aluminum angle used to provide the buildout and which is anchored to the wall, this same arrangement is reversed anglused at the state.

APPROVED		ADE 1 5 1994			
EXPIRES `	ł	MR 1 4 1997			

### NOTICE OF ACCEPTANCE: SPECIFIC CONDITIONS

- as shown on detailed drawings No. 94-98.1 and No. 94-98.2, "Build-Out Mount Section", being the Dade County Product Control approval stamp.
- c. Celling/inside Mount (For both 18 gs and 20 gs steel panels)
- The panels are secured inside a top track ("U" backer) at its head, which is anothered to the inside of opening, and fastmer's to the "BAD" continues analyted aluminum angles at the still, using 1/4\*-00 r. 3/8\* studs viv senteed wingant paned at 12\* on. as shown can called differentiage No. 94-98.1 and No. 94-98.2, "Ceiling/Inside Mourt Section", bearing the Dade County Product Counted approval stamp.
- d. Wall Mount (For 20 ga. steel panels)
- The panels are fastened to the "EAB" continuous student atuminum maple at the band, using 14"-10 x 3/3" studies of westered wingput spaced at 13" o.c., this again a source of the wall, this same arrangement is reversed and used at the still, as shown on detailed drawing No. 94-98.1, "Wall Mount Section", bearing the Dube Courty Product Control approval samp.
- e. Any combination of the above
- 4.2 Anchorage of the aluminum backets and angles shall be to concrete, manony and/or wood framing and shall consist of only the anchora, embeddment and spacing specified on Drawings No. 94-98.1 and No. 94-98.2. Substitution of anchora type or indicated embedment is unaccompable and mayir a to be engineered separately. Essenser must have their one Notice of Acceptace
- 4.3 Permanant's at fastener components, ambedded anchor boirs, threaded comes or menal shields, act to use, must be protected against corronion, consemination and damage at all time.

### 5. IDENTIFICATION

3.1 Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement. Total County Fooder Control Approved<sup>1</sup>. Also a "Wanting Zool shall be permanently stanged in each paped advistag the house owner or statem that the storm panels will not offer humsterne protection unless <u>all instanction boils</u> are properly installed.

### 6. USE

- 6.1 Application for building permit shall be accompanied by two copies of the following:
  - This Notice of Acceptance.
  - Completely dimensioned drawing showing size and location, including beight above grade, of openings to receive shutters; mean root height, tength and width of building.
  - c. Duplicate prints of approved drawings No. 94-98 I and No. 94-98 2, bearing the approval stamp, Notice of Acceptance number and date by Dade County Product Control Section, clearly marked to show the components selected for the spropred functionalization.
- 6.2 This revision supersedes Notice of Acceptance No 97-1201.07 dated 92/14/94 and issued to: Alteor Aluminum Products Company (Dwision of Broward Hurricabe Panel Co.)
