**FROM:** Paul Quentel, CEO  
EnviroWaste Services Group, Inc. (EWSG)

**RE:** **Project No. 16-7081 Gravity Sewer System Condition Assessment and Renewal and Replacement (Inflow/Infiltration – I/I) Excavated point Repairs, Contract Extension**

**DATE:** April 1, 2019

Dear Mr. Aurelus,

In accordance with the terms included in the current unit price contract between EWSG and the City of Hollywood (City), EWSG hereby confirms that if the City decides to renew (or renew early) the contract for an indefinite period of time, EWSG will honor all the current unit prices, terms and conditions as stipulated in the above referenced Contract No. 16-7081.

As you know, EWSG has had a strong working relationship with the City since 2008, and we are pleased to have provided consistently excellent service and value. The City in turn has been a great partner to us, and we are glad to maintain the City as a top priority in responding to any emergency repair requests or other calls. It is also worth noting that because we are resourced to self-performing the work, we are able to save the City money and valuable time in getting repairs completed.

EWSG understands the need for the City to perform additional evaluations and potential point repairs within other sanitary sewer basins in the City, and we appreciate the opportunity to continue our partnership with you.

Sincerely,  
  
Paul Quentel, CEO
