GENERAL APPLICATION

Tel: (954) 921-3471

Fax: (954) 921-3347

This application must be completed in full and submitted with all documents to be placed on a Board or Committee's agenda.

The applicant is responsible for obtaining the appropriate checklist for each type of application.

Applicant(s) or their authorized legal agent must be present at all Board or Committee meetings.

At least one set of the submitted plans for each application must be signed and sealed (i.e. Architect or Engineer).

Documents and forms can be accessed on the City's website at

<http://www.hollywoodfl.org/DocumentCenter/Home/View/21>

APPLICATION TYPE (CHECK ONE):

- ☐ Technical Advisory Committee ☒ Historic Preservation Board
☐ City Commission ☐ Planning and Development Board

Date of Application: September 16 2019

Location Address: 1380 Hollywood Blvd

Lot(s): 30, West of Lot 29 Block(s): 8 Subdivision: Hollywood Lakes

Folio Number(s): 5142 1401 1682

Zoning Classification: R5G Land Use Classification: RESIDENTIAL

Existing Property Use: VACANT LOT Sq Ft/Number of Units: 1(one)

Is the request the result of a violation notice? () Yes (✓) No If yes, attach a copy of violation.

Has this property been presented to the City before? If yes, check all that apply and provide File Number(s) and Resolution(s): _____

GENERAL APPLICATION

CERTIFICATION OF COMPLIANCE WITH APPLICABLE REGULATIONS

The applicant/owner(s) signature certifies that he/she has been made aware of the criteria, regulations and guidelines applicable to the request. This information can be obtained in Room 315 of City Hall or on our website at www.hollywoodfl.org. The owner(s) further certifies that when required by applicable law, including but not limited to the City's Zoning and Land Development Regulations, they will post the site with a sign provided by the Office of Planning and Development Services. The owner(s) will photograph the sign the day of posting and submit photographs to the Office of Planning and Development Services as required by applicable law. Failure to post the sign will result in violation of State and Municipal Notification Requirements and Laws.

(I)(We) certify that (I) (we) understand and will comply with the provisions and regulations of the City's Zoning and Land Development Regulations, Design Guidelines, Design Guidelines for Historic Properties and City's Comprehensive Plan as they apply to this project. (I)(We) further certify that the above statements and drawings made on any paper or plans submitted herewith are true to the best of (my)(our) knowledge. (I)(We) understand that the application and attachments become part of the official public records of the City and are not returnable.

CRITERIA APPROPRIATENESS FOR DESIGN

1380 Hollywood Blvd

WILKES FAMILY COME

CRITERION: INTEGRITY OF LOCATION

This property is a vacant lot, located at Southeast Corner Lot of Hollywood Blvd and 14 Avenue; the site has 70' frontage by 121' depth; it sits in the heart of it sits in the heart of Hollywood Lakes.

CRITERION: SETTING

The setting of the New Construction Residence tries to contribute to the area with a high-quality profile with materials that are integrated into the nature of southern Florida preserving the landscaping typical of the area.

CRITERION: MATERIALS

All materials that will be used in the New Construction Residence proposal will be carefully selected under the minimum quality standards required for safety, hurricane zone as well as considering an harmonious integration with the surroundings properties.

CRITERION: ASSOCIATION

The New Construction Residence has been designed with a soft contemporary conceto to be integrated to the style that predominates in the district, with materials, colors and landscaping that work in a harmonious way, also contributing the high quality that the district requires.

CRITERION: WORKMANSHIP

Workmanship in proposal New Construction Residence will be a guaranty that all State & City Regulations are to be upheld. All security a fencing element will be used. All practices will meet requirements of the Florida Building Code 2017 and the State of Florida Department of Environmental Protection.

Please feel free to contact as for any questions.

Re: Garage
1350-1352 Hollywood Boulevard
Hollywood, FL

Mr. Goldboim,

We have successfully completed the removal of the Asbestos Materials at the above-mentioned facility. The abated items were identified in ARS Environmental Asbestos survey report # 20162253.

The materials removed consisted of Roof Material Membrane & Roof Flashing.

As required by EPA 40 CFR part 61 requirements, we submitted a NESHAP notification to the Broward County Air Quality Division notifying them of our intent to perform asbestos abatement.

The work was performed in accordance with currently known applicable State, Federal, and local regulations for Asbestos abatement, employee protection, and disposal of Asbestos containing materials.

The abatement is completed and the next phase of construction / demolition can now commence.

If you have any questions or comments please do not hesitate to contact me

Respectfully submitted,

Robert Lozano

Recommendations

The above referenced Asbestos Contained Building Materials may be left in place if deemed to be in good condition and no repairs or renovations are scheduled which would disturb them. Care should be taken to ensure that the materials not be disturbed during repair, renovation or remodeling activities which could possibly release fibers into the air. To reduce the intrinsic liability to the owners, the ultimate solution may be to have the material removed. However, at the minimum, a formal Operations and Maintenance (O&M) Program is recommended to minimize potential fiber releases, monitor any future deterioration, and to ensure proper record keeping.

Under the FDEP regulations, Category I non-friable asbestos-containing materials may be left in place during demolition under wet conditions. However, OSHA regulations require that disposal of asbestos-containing materials and debris is disposed of in a leak-tight and labeled container. The container may be plastic bags so long as the holding is leak-tight. All materials must be disposed of in a Class I landfill and manifest as Category I Non-Friable Asbestos containing material.

To meet the requirements of a wet demolition, it is the responsibility of the demolition contractor to control any visible emissions by adequately applying water on the structure. Furthermore, the work practices for the demolition of a building containing asbestos must be in regulatory compliance with OSHA 1926.1101. All materials must be kept thoroughly wet or saturated during the demolition to assist in preventing the release of asbestos fibers. A certified asbestos supervisor must perform or supervise the work. If during the demolition process visible emissions are observed, the asbestos-containing materials must then be abated.

The regulations of the Occupational Safety and Health Administration (OSHA) applies to any detectable amount of asbestos in building materials or on facility components. This requirement covers worker training, work practices, and disposal methods. In summary, removing asbestos in a commercial setting requires training, specific work practices, and disposal methods for the asbestos and asbestos-containing debris.

However, if Category I Materials have become friable or are in poor condition, they must be removed before demolition or renovation begins by a Florida Licensed Asbestos Abatement Contractor. When implementing the response actions, parties responsible for final selection should remember that actions shall be sufficient to protect human health and the environment, but may also be the least burdensome method. Nothing in these recommendations should be construed as prohibiting or discouraging removal.

Category I - Non-Friable Asbestos Containing Material

Sample Number	Description / Material Class	Location	Approximate Size	Sample Condition	Physical Damage	Water Damage	Material Contact	Sample Friability	Asbestos Detected
Sample 11	Roof Material; Membrane	Over this building.	440 sq. ft.	Fair	None	Yes	Low	Non-friable	YES
Layer	Miscellaneous								
Sample 12	Roof Material; Flashing	Over this building around roof perimeter.	84 ln. ft.	Fair	None	Yes	Low	Non-friable	YES
Layer	Miscellaneous								

Recommendations

The above referenced Asbestos Contained Building Materials may be left in place if deemed to be in good condition and no repairs or renovations are scheduled which would disturb them. Care should be taken to ensure that the materials not be disturbed during repair, renovation or remodeling activities which could possibly release fibers into the air. To reduce the intrinsic liability to the owners, the ultimate solution may be to have the material removed. However, at the minimum, a formal Operations and Maintenance (O&M) Program is recommended to minimize potential fiber releases, monitor any future deterioration, and to ensure proper record keeping.

Under the FDEP regulations, Category I non-friable asbestos-containing materials may be left in place during demolition under wet conditions. However, OSHA regulations require that disposal of asbestos-containing materials and debris is disposed of in a leak-tight and labeled container. The container may be plastic bags so long as the holding is leak-tight. All materials must be disposed of in a Class I landfill and manifest as Category I Non-Friable Asbestos containing material.

To meet the requirements of a wet demolition, it is the responsibility of the demolition contractor to control any visible emissions by adequately applying water on the structure. Furthermore, the work practices for the demolition of a building containing asbestos must be in regulatory compliance with OSHA 1926.1101. All materials must be kept thoroughly wet or saturated during the demolition to assist in preventing the release of asbestos fibers. A certified asbestos supervisor must perform or supervise the work. If during the demolition process visible emissions are observed, the asbestos-containing materials must then be abated.

The regulations of the Occupational Safety and Health Administration (OSHA) applies to any detectable amount of asbestos in building materials or on facility components. This requirement covers worker training, work practices, and disposal methods. In summary, removing asbestos in a commercial setting requires training, specific work practices, and disposal methods for the asbestos and asbestos-containing debris.

However, if Category I Materials have become friable or are in poor condition, they must be removed before demolition or renovation begins by a Florida Licensed Asbestos Abatement Contractor. When implementing the response actions, parties responsible for final selection should remember that actions shall be sufficient to protect human health and the environment, but may also be the least burdensome method. Nothing in these recommendations should be construed as prohibiting or discouraging removal.

SURVEYOR'S NOTES

1. BASIS OF BEARINGS AS INDICATED ON SKETCH.
2. LEGAL DESCRIPTION PROVIDED BY CLIENT.
3. THE LANDS SHOWN HEREON WERE NOT ABSTRACTED BY THIS OFFICE FOR EASEMENTS, RIGHT-OF-WAYS, OWNERSHIP OR OTHER INSTRUMENTS OF RECORD.
4. UNDERGROUND OR INTERIOR PORTIONS OF FOOTINGS, FOUNDATIONS, WALLS OR OTHER NON-VISIBLE IMPROVEMENTS WERE NOT LOCATED.
5. ELEVATIONS ARE BASED ON THE NORTH AMERICAN VERTICAL DATUM OF 1988 UNLESS OTHERWISE SHOWN.
6. FENCE TIES ARE TO THE CENTER-LINE OF FENCE. WALL TIES ARE TO THE FACE OF WALL.
7. IN SOME INSTANCES GRAPHIC REPRESENTATIONS HAVE BEEN EXAGGERATED TO MORE CLEARLY ILLUSTRATE THE CONTROL THE LOCATION OF THE IMPROVEMENTS OVER SCALED POSITIONS.
8. THE DIMENSIONS AND DIRECTIONS SHOWN HEREON ARE IN SUBSTANTIAL AGREEMENT WITH RECORD VALUES UNLESS OTHERWISE NOTED.
9. PARTY WALLS ARE CENTERED ON PROPERTY LINE AND ARE 0.7' WIDE UNLESS OTHERWISE NOTED.
10. EXISTING CORNERS FOUND OFF WITNESS PROPERTY CORNERS
11. OBSTRUCTED CORNERS ARE WITNESSED BY IMPROVEMENTS.
12. NO ATTEMPT WAS MADE TO LOCATE WRITTEN OR UNWRITTEN EASEMENTS OR RIGHTS-OF-WAY, OTHER THEN THOSE SHOWN HEREON.

THE ARCHITECT SHALL RETAIN ALL COMMON LAW COPYRIGHT AND OTHER RESERVED WRITTEN DIMENSIONS SHALL HAVE PRECEDENCE OVER SCALE.

This document, together with the concepts and designs presented herein, is intended only for the specific purpose and client for which it was prepared. Reuse of and improper reliance on this document without written authorization and adaptation by Green Earth Landscape Architect, shall be without liability to Green Earth Landscape Architecture.

GENERAL NOTES & SPECIFICATIONS

- All proposed plant material shall be a minimum of Florida No. 1 or better as described in Grades and Standards for Nursery Plants, Parts I and II, latest edition published by the Florida Department of Agriculture and Consumer Services.
- All planted areas shall contain a three (3) inch layer of shredded sterilized Eucalyptus or Melaleuca mulch such as Flori-mulch. Keep mulch a min. 12" away from tree trunks. Create min. 5' diameter mulch tree rings around all trees not within a shrub or groundcover bed.
- All sod or seed shall be certified (if applicable), and weed and insect free.
- Contractor shall be responsible for locating existing utilities or other obstructions which may interfere with plant installation. Call Sunshine One service for underground utility locations 48 hours prior to any excavation or digging 1-800-432-4770.
- Corner clip and visibility triangles shall be maintained for clear sight visibility in accordance with Local and County roadway clear sight requirements.
- The landscape plans were designed to comply with Florida Friendly Landscape principles with specific consideration of water needs, shade/sun tolerances, structural heat gain, and site opportunities and constraints.
- A Tree Permit will be required prior to any construction, native vegetative removal within the dripline of a tree, and/or site tree work.
- Local Utility and Fire Rescue Clearance Zones shall be provided around all above ground or at grade meters and equipment.
- Where overhead power lines exist, all proposed trees and palm setbacks shall conform with the Florida Power and Light (FPL) Guidelines for setbacks from overhead utility lines.
- Plant quantities are provided for convenience. In the event of discrepancies between plant list counts and plan, plan quantities and layout shall take precedence based on symbols and center-to-center spacing specified on plant list.
- All landscape planting areas shall have amended planting soil of uncompacted coarse loam that is a minimum of 12 inches deep. Soils shall be appreciably free of gravel, stones, rubble or trash. All compacted soil, contaminated soil or roadbase fill shall be removed. Amended planting soil shall be premixed off site and shall be a ratio by volume mixture of 50% pulverized topsoil/Florida muck organic content and 50% clean, screened sand, free of nematodes and vegetative growth. 10% sphagnum peat or other organic amenity is acceptable in the amended soil mix.
- All sod shall be St. Augustine 'Floratum' (*Stenotaphrum secundatum* 'Floratum') variety except where noted as "bahiagrass sod" which shall be Argentine variety of Bahiagrass (*Paspalum notatum* 'Argentine'). All sod shall be in solid, full pieces. Lay sod tight with staggered joints and roll if necessary to produce a smooth, even finish grade. Infill any gaps or voids in or between pieces with course sand. See detail this page.
- All plant materials shall be guaranteed by the contractor for a period of one year to be in a thriving, healthy condition that is indicative of each species. Any plants that fail within that period shall be replaced immediately with like kind, size, and specs.
- Remove any and all prohibited exotic vegetation from site.
- All landscaped areas shall have an automatic irrigation system with rain sensor and programmable automatic controller as permitted by South Florida Water Management District, County, and Local Codes.
- Other than existing Mahogany tree to remain, all existing vegetation, turf, weeds, groundcover, and other deleterious materials are to be removed in their entirety prior to planting preparation. See landscape planting details and notes herein for amended soil mix and planting preparation.
