

Kevin Betancourt, P.E. Project Manager

kbetancourt@thomaseg.com

Education

B.S.
Civil Engineering
Florida International University

Professional Licenses

Florida Professional Engineer
#83361

Kevin currently serves as a licensed Professional Engineer and Project Manager for Thomas Engineering Group. Kevin brings over seven years of experience providing comprehensive civil engineering design and consulting services to the team. Early in his career, Kevin gained experience in the environmental field working in a private environmental engineering firm where he began to form a background in environmental compliance with experience in site assessment, groundwater monitoring, and remedial systems design. This foundation helped transition to land development throughout South Florida.

Kevin has experience with zoning research and analysis, storm water management design and modeling, utility design and regulatory permitting. His duties currently include project management, design, permitting and construction related services for numerous projects. Typical projects include a variety of municipal, commercial, mixed use, multi-family and residential properties. Level of detail for projects range from conceptual layouts to design of construction level site plan packages inclusive of drainage studies and permitting at the local, county, state and federal level.
