A Resolution Of The City Commission Of The City Of Hollywood, Florida, Approving Execution Of The Attached Community Aesthetic Feature Agreement Between The City Of Hollywood And The Florida Department Of Transportation To Facilitate Installation Of Decorative Vinyl Art-Wrap Coverings On Traffic Signalization Controller Cabinets Located Throughout The City With Project Funding Provided By The Hollywood Community Redevelopment Agency And Further Authorizing Execution By The Appropriate City Officials Of Any Required Permit Documents Required By Broward County Government And Necessary For Approval And Implementation Of The Project.

Staff Recommends: Approval of attached Resolution.

### Explanation:

This item involves installation of decorative art-wrap coverings on County-owned traffic signal controller cabinets. The project is funded by the Community Redevelopment Agency. As such, the design of the art-wraps depicts imagery intended to promote the municipal Beach and Broadwalk. Art-wraps are proposed for twenty-four (24) traffic signal controller cabinets at the locations depicted in Exhibit "A". Project management is provided by the Development Services Department

Competitive bids were solicited for fabrication and installation of the wraps and the lowest total cost is \$9,576.00 by Car Wrap Solutions/Perfect Image Signs of Fort Lauderdale, Florida. Wraps will be installed using best industry practices and life expectancy is five years. The material being used has an anti-graffiti coating and is cleanable without damaging the graphic. Cabinets wrapped previously have been less prone to graffiti tagging. Code Compliance staff will abate any graffiti on an as-needed basis.

Prior to commencing the project, the Florida Department of Transportation (FDOT) must approve the proposed designs for any cabinet located within FDOT right-of-way and a Community Aesthetic Feature Agreement (CAFA) encompassing these locations must be executed between the City and FDOT. All of the cabinets are owned by Broward County and a permit from the Broward County Public Works Department, Highway Construction & Engineering Division is required prior to installation. The project is expected to be conducted in two phases, with the locations requiring FDOT approval being installed in Phase 2.

This item seeks approval for the appropriate City staff to execute the documents required by FDOT and Broward County to facilitate implementation of the project.

Recommended for inclusion on the agenda by:

Dr. Wazir Ishmael, City Manager

Gus Zambrano, Assistant City Manager for Sustainable Development

Jorge Camejo, Executive Director, Hollywood CRA

Thomas Barnett, Director, Development Services
