

UPsafety Permits and Enforcement Solution

**Draft Quote Prepared for City of
Hollywood, FL**

UPDATED: June 03, 2026

Quote Summary

T2 Systems has provided the enclosed budgetary cost estimates for the City of Hollywood, FL for your parking and police beach enforcement program. These estimates are based on our prior discussions with multiple stakeholder groups within the city, including a detailed vendor on-site visit at the end of February. Any custom development required would need to be confirmed through a formal scoping process prior to implementation.

The UPsafety solution is a robust, complete enterprise solution including complex permit management and sales, fleet management, the industry's best enforcement and citation management capability, fully automated multi-step appeals and adjudication, dynamic back-office dashboards, and device insights to visually review enforcement patterns and status. The solution includes a full patron portal for permit purchase, account management, and citation payment with multiple payment methods for citations. In addition, T2 Systems has a fully licensed collection entity, T2's Citation and Collection Services, which provides parking-specific collection services and is fully integrated into the UPsafety solution.

The UPsafety software subscription includes all the various modules – the handheld enforcement solution, the back-office management module, permit management, appeals and adjudication and the patron portal within the base license.

We have also included the UPsafety police beach enforcement software in a separate section of this quote. The police beach enforcement module integrated seamlessly into the UPsafety back-office management tools and patrol portal, providing a seamless management process, and a common interface for constituents to pay for both parking and police beach enforcement violations.

We have revised the structure of our bid for UPsafety to reflect the feedback on your desired financial model, as well as the required quantity of hand-held and back-office licenses for both the parking and beach police beach enforcement programs.

This quote includes the updated pricing for out-of-state DMV lookups and patron portal transaction fees:

- Out-of-state DMV lookups: Charged at \$1.50 per successful returned look-up
- Patron portal transaction charges: Charged at \$2.50 flat rate per transaction for all UPsafety patron portal transactions

Cost Estimate Summary – Permits and Enforcement Solution

*City of Hollywood FL
